Long Run To Tobruk:

Long Run to Tobruk Gordon Landsborough, 1975-01-01 *Besieged* Paul K. Davis, 2003 From ancient times to the present great sieges have had an enormous impact on the shaping of world history Now in this spectacular fully illustrated volume one hundred of the world's most monumental and mind boggling sieges are laid out in detail *Besieged* covers the most important sieges from around the world throughout history from Joshua's assault on Jericho in the fifteenth century B C to the Russian attack on the Chechen capital of Grozny at the end of the twentieth Each entry provides the name and date of the siege its exact location in terms of today's world the number of forces engaged when known the names of the commanders on each side and the overall importance of the siege in its historical context Thoroughly examining the actions of both the attackers and the defenders the book explores the motivations of both and strategically surveys the technical and tactical innovations and conditions both inside besieged positions and in the besiegers ranks The entries detail the historical setting the particular circumstances of the event itself and the long term results of the siege These riveting accounts are enhanced by illustrations over seventy maps and references for further reading A glossary and a comprehensive index complete the book Global in scope and with stirring accounts of familiar sieges as well as many lesser known conflicts *Besieged* is essential reading for military buffs and everyone interested in how the modern world came to be Includes the sieges of Jericho 1405 B C Troy 1250 B C Acre 1189 1191 Constantinople 1453 Tenochtitlan 1521 La Rochelle 1627 1628 Leningrad 1941 1944 Malta 1940 1942 Dien Bien Phu 1954 Khe Sanh 1968 Beirut 1982 Sarajevo 1991 1995 **Death of the Wehrmacht** Robert M. Citino, 2007-10-22 For Hitler and the German military 1942 was a key turning point of World War II as an overstretched but still lethal Wehrmacht replaced brilliant victories and huge territorial gains with stalemates and strategic retreats In this major reevaluation of that crucial year Robert Citino shows that the German army's emerging woes were rooted as much in its addiction to the war of movement attempts to smash the enemy in short and lively campaigns as they were in Hitler's deeply flawed management of the war From the overwhelming operational victories at Kerch and Kharkov in May to the catastrophic defeats at El Alamein and Stalingrad *Death of the Wehrmacht* offers an eye opening new view of that decisive year Building upon his widely respected critique in *The German Way of War* Citino shows how the campaigns of 1942 fit within the centuries old patterns of Prussian German warmaking and ultimately doomed Hitler's expansionist ambitions He examines every major campaign and battle in the Russian and North African theaters throughout the year to assess how a military geared to quick and decisive victories coped when the tide turned against it Citino also reconstructs the German generals view of the war and illuminates the multiple contingencies that might have produced more favorable results In addition he cites the fatal extreme aggressiveness of German commanders like Erwin Rommel and assesses how the German system of command and its commitment to the independence of subordinate commanders suffered under the thumb of Hitler and chief of staff General Franz Halder More than the turning point of a war 1942 marked the

death of a very old and traditional pattern of warmaking with the classic German way of war unable to meet the challenges of the twentieth century Blending masterly research with a gripping narrative Citino's remarkable work provides a fresh and revealing look at how one of history's most powerful armies began to founder in its quest for world domination
