Reflections on Slope Stability Engineering Edward N. Bromhead, 2023-09-19 Slope stability engineering is both an art and a science practised by many civil and geotechnical engineers involved in work on landslides earth dams breakwaters coastal defence earthworks slopes for roads canals railways pipelines housing developments and other related developments This book contains the detailed reflections of its author who has practised and researched in the field for over a half century It is written in an informal style that makes it an interesting and thought provoking practitioner guide to landslides and slope problems and their investigation analysis and remediation considering both natural and man made slopes and earthworks and without the need for the usual equations and illustrations Reflections on Slope Stability Engineering is targeted primarily at practitioners working in the investigations of slope instability and the design and construction of treatments of the problem especially those early in their careers but the accessible style also suits students who are developing an interest in the subject and even those engineers with only a casual interest in this branch of geotechnics **Earthquake**

Ashley Morris, Svitlana Kokhan, 2007-09-14 On June 28 through July 1 2006 a NATO advanced research workshop was held in Kyiv Ukraine This meeting of scholars from both NATO and NATO partner countries brought together the leading researchers in the field of Fuzziness and Uncertainty in GIS for Environmental Security and Protection The papers based upon the presentations at this meeting are included in this book They were all quite good some focusing on the use of fuzzy sets in geography others focusing on explicit environmental concerns in Ukraine What this book cannot show is the camaraderie and spirit of cooperation that permeated the atmosphere of this workshop These researchers many of whom had never met before are now colleagues and are continuing to collaborate on research to this day and probably beyond Scholars from various positions and countries have chosen to work together in the spirit of cooperation to make the ideas presented in this book come to fruition At press time we do not know if Ukraine will become a NATO member or not In any case the editors wish to thank the NATO Science Committee for their funding encouragement and work in making this workshop a reality We hope that the spirit of cooperation and intellectual curiosity that was so lively at the conference will encourage the reader in the perusal of this work Submarine Mass Movements and Their Consequences D.C. Mosher, Craig Shipp, Lorena Moscardelli, Jason Chaytor, Chris Baxter, Homa Lee, Roger Urgeles, 2009-10-27 Recent global events such as the devastating 1998 Papua New Guinea tsunami the 2004 Sumatran tsunami and the 2006 SE Asia undersea network cable failure underscore the societal and economic effects of submarine mass movements These events call upon the scientific community to understand submarine mass movement processes and consequences to assist in hazard assessment mitigation and planning Additionally submarine mass movements are beginning to be recognized as prevalent in continental margin geologic sections As such they represent a significant if not dominant role in margin sedimentary processes They also represent a potential hazard to hydrocarbon exploration and development but also represent exploration indicators and targets This volume consists of a collection of the latest scientific research by international experts in geological geophysical engineering and environment aspects of submarine mass failures focussed on understanding the full spectrum of challenges presented by submarine mass movements and their consequences **PRESIDENTIAL ELECTIONS 6TH EDITION** Nelson W. Polsby, Aaron B. Wildavsky, 1984 **Landslides and Climate Change: Challenges and Solutions** Robin McInnes, Jenny Jakeways, Helen Fairbank, Emma Mathie, 2007-05-10 Investigates the relationship between landslides and climate change Considers proactive approaches to hazard and risk management combining geohazard modelling and prediction with effective risk management and informed planning policy as a means of safeguarding the sustainability of communities at risk Trails Plowed Under Charles Marion Russell, 1927 Cowpunchers Indians and horses are the heroes and villains of these tales from the early days of Montana and Wyoming Eastward Louis Couperus, 1924 **Family origin histories** Edward Sapir, Morris Swadesh, Alexander Thomas, John Thomas, 2009-01-01 Nuuchah-nulth family histories are actually tribal histories since their idea of family encompasses the tribe Eighteen such histories are presented here

chronicling the origins and resources of a number of tribal families In lieu of written records these oral traditions stood as Nuuchah-nulth history and were recited formally in public on ceremonial occasions Several accounts give long lists of foods Others describe the acquisition of important technological advances such as a salmon trap Half of the texts are short focusing on a particular item like a mask or a house decoration One text lists hundreds of Nuuchah-nulth place names given mythically by Swan Women to the Port Alberni region which was previously Salish in population and language Generally these histories explain how the world came to be and set forth family claims to material and spiritual resources Each account belonged to the family which had the exclusive right to tell it publicly Summary outlines are provided in the introduction
