Policing the Media David D. Perlmutter, 2000-02-10 *Policing the Media* is an investigation into one of the paradoxes of the mass mediated age Issues events and people that we see most on our television screens are often those that we understand the least David Perlmutter examined this issue as it relates to one of the most frequently portrayed groups of people on television police officers *Policing the Media* is a report on the ethnography of a police department derived from the author's experience riding on patrol with officers and joining the department as a reserve policeman Drawing upon interviews personal observations and the author's black and white photographs of cops and the clients Perlmutter describes the lives and philosophies of street patrol officers He finds that cops hold ambiguous attitudes toward their television comrades for much of TV copland is fantastic and preposterous Even those programs that boast gritty realism little resemble actual police work Moreover the officers perceive that the public's attitudes toward law enforcement and crime are directly and largely nefariously influenced by mass media This in turn he suggests influences the way that they themselves behave and perform on the street and that unreal and surreal expectations of them are propagated by television cop shows This cycle of perceptual influence may itself profoundly impact the contemporary criminal justice system on the street in the courts and in the hearts and minds of ordinary people

We Are What We Sell Danielle Sarver Coombs, Bob Batchelor, 2014-01-15 For the last 150 years advertising has created a consumer culture in the United States shaping every facet of American life from what we eat and drink to the clothes we wear and the cars we drive In the United States advertising has carved out an essential place in American culture and advertising messages undoubtedly play a significant role in determining how people interpret the world around them This three volume set examines the myriad ways that advertising has influenced many aspects of 20th century American society such as popular culture politics and the economy Advertising not only played a critical role in selling goods to an eager public but it also served to establish the now world renowned consumer culture of our country and fuel the notion of the American dream The collection spotlights the most important advertising campaigns brands and companies in American history from the late 1800s to modern day Each fact driven essay provides insight and in depth analysis that general readers will find

New Media, Campaigning and the 2008 Facebook Election Thomas J. Johnson, David D. Perlmutter, 2013-12-16 Some political observers dubbed the 2008 presidential campaign as the Facebook Election Barack Obama in particular employed social media such as blogs Twitter Flickr Digg YouTube MySpace and Facebook to run a grassroots style campaign The Obama campaign was keenly aware that voters particularly the young are

not simply consumers of information but conduits of information as well. They often replaced the professional filter of traditional media with a social one. Social media allowed candidates to do electronically what previously had to be done through shoe leather and phone banks: contact volunteers and donors and schedule and promote events. The 2008 Election marked a new era where the candidates no longer had complete control over their campaign message. The individual viewer in a campaign crowd with a cell phone can record a candidate's gaffe, post it on YouTube or Flickr, and within days millions will be gasping or guffawing. The traditional campaign with its centralized power and planning, although not dead now, coexists with an unstructured digital democracy.

New Media Campaigning and the 2008 Facebook Election examines the way social media changed how candidates campaigned, how the media covered the election, and how voters received information. This book is based on a special issue of *Mass Communication Society*. — *Image Bite Politics* Maria Elizabeth Grabe, Erik Page Bucy, 2009-03-02

Image Bite Politics is the first book to systematically assess the visual presentation of presidential candidates in network news coverage of elections and to connect these visual images with shifts in public opinion. Presenting the results of a comprehensive visual analysis of general election news from 1992–2004 encompassing four presidential campaigns, the authors highlight the remarkably potent influence of television images when it comes to evaluating leaders. The book draws from a variety of disciplines including political science, behavioral biology, cognitive neuroscience, and media studies to investigate the visual framing of elections in an incisive, fresh, and interdisciplinary fashion. Moreover, the book presents findings that are counterintuitive and challenge widely held assumptions yet are supported by systematic data. For example, Republicans receive consistently more favorable visual treatment than Democrats, countering the conventional wisdom of a liberal media bias, and image bites are more prevalent and in some elections more potent in shaping voter opinions of candidates than sound bites. Finally, the authors provide a foundation for promoting visual literacy among news audiences and bring the importance of visual analysis to the forefront of research. — *Campaigning for Hearts and Minds* Ted Brader, 2020-07-08

It is common knowledge that televised political ads are meant to appeal to voters' emotions, yet little is known about how or if these tactics actually work. Ted Brader's innovative book is the first scientific study to examine the effects that these emotional appeals in political advertising have on voter decision making. At the heart of this book are ingenious experiments conducted by Brader during an election with truly eye-opening results that upset conventional wisdom. They show, for example, that simply changing the music or imagery of ads while retaining the same text provokes completely different responses. He reveals that politically informed citizens are more easily manipulated by emotional appeals than less involved citizens and that positive enthusiasm ads are in fact more polarizing than negative fear ads. Black and white video images are ten times more likely to signal an appeal to fear or anger than one of enthusiasm or pride, and the emotional appeal triumphs over the logical appeal in nearly three quarters of all political ads. Brader backs up these surprising findings with an unprecedented survey of emotional appeals in contemporary political campaigns. Politicians do set out to campaign
