Between Two Motherlands Theodora Dragostinova, 2011-04-15 In 1900 some 100 000 people living in Bulgaria 2 percent of the country's population could be described as Greek whether by nationality language or religion The complex identities of the population proud heirs of ancient Hellenic colonists loyal citizens of their Bulgarian homeland members of a wider Greek diasporic community devout followers of the Orthodox Patriarchate in Istanbul and reluctant supporters of the Greek government in Athens became entangled in the growing national tensions between Bulgaria and Greece during the first half of the twentieth century In Between Two Motherlands Theodora Dragostinova explores the shifting allegiances of this Greek minority in Bulgaria Diverse social groups contested the meaning of the nation shaping and reshaping what it meant to be Greek and Bulgarian during the slow and painful transition from empire to nation states in the Balkans In these decades the region was racked by a series of upheavals the Balkan Wars World War I interwar population exchanges World War II and Communist revolutions The Bulgarian Greeks were caught between the competing agendas of two states increasingly bent on establishing national homogeneity Based on extensive research in the archives of Bulgaria and Greece as well as fieldwork in the two countries Dragostinova shows that the Greek population did not blindly follow Greek nationalist leaders but was torn between identification with the land of their birth and loyalty to the Greek cause Many emigrated to Greece in response to nationalist pressures others sought to maintain their Greek identity and traditions within Bulgaria some even switched sides when it suited their personal interests National loyalties remained fluid despite state efforts to fix ethnic and political borders by such means as population movements minority treaties and stringent citizenship rules The lessons of a case such as this continue to reverberate wherever and whenever states try to adjust national borders in regions long inhabited by mixed populations

Nationalisms in the European Arena Margarita Gómez-Reino, 2017-11-21 This book explores how the multiplicity of nationalist parties across the European Union have embraced or refused the process of European integration and made it a platform for transnational coordination in the European arena The author analyzes how opposing pro European minority nationalist

parties and Eurosceptic populist nationalist parties have diversely politicized European integration over the past three decades and engage in different patterns of Europeanization Tracing their divergent trajectories of transnational coordination the book examines the common challenges these opposing nationalist party families face and their systematic fragmentation in the European arena The book offers a novel approach to understanding the conditions for the emergence of truly European nationalist party families based on the interaction of ideological strategic and institutional variables that underpin the Europeanization of heterogeneous nationalisms Nationalisms in the European Arena will be of interest to students and scholars across a range of disciplines including sociology and political science It contributes to the increasing literature on identity politics in the European Union and reveals the mechanisms behind why the European arena is adverse to the political translation and organization of domestic nationalisms as distinctive European actors

Minority Rights and Minority Protection in Europe Timofey Agarin, Karl Cordell, 2016-03-24 In order to gain access to the EU nations must be seen to implement formal instruments that protect the rights of minorities This book examines the ways in which these tools have worked in a number of post communist states and explores the interaction of domestic and international structures that determine the application of these policies Using empirical examples and comparative cases the text explores three levels of policy making within sub state and national politics and within international agreements laws and policy blueprints This enables the authors to establish how domestic policymakers negotiate various structural factors in order to interpret rights norms and implement them long enough to gain EU accession Showing that it is necessary to focus upon the states of post communist Europe as autonomous actors and not as mere recipients of directives and initiatives from the West the book shows how underlying structural conditions allow domestic policy actors to talk the talk of rights protection without walking the walk of implementing minority rights legislation on their territories
