New Potty:

The New Potty (Little Critter) Mercer Mayer, Gina Mayer, 2003-06-10 Mercer Mayer's Little Critter is dealing with his little sister learning to use the potty in this classic funny and heartwarming book. Whether he's trying to help her make it to the bathroom encouraging her when she does well or getting frustrated when she doesn't, both parents and children alike will relate to this beloved story. A perfect way to teach children about potty training and how to be a good older sibling. **Koko Bear's New Potty** Vicki Lansky, 1997 Koko Bear sets an example as he goes from wearing diapers to using his very own potty chair. **Your New Potty** Joanna Cole, 1989-10-16 Steffie and Ben learn how to use the potty as they make the transition from diapers to underpants. **The Potty Journey** Judith A. Coucouvanis, 2023-01-01 Parents of children with autism or other special needs frequently struggle with toilet training their child. Toileting a child with special needs is more difficult because there are often additional challenges such as communication difficulties, sensory issues, behavioral concerns, resistance to change, inability to generalize a newly learned skill, and the need for routine. Using traditional toilet training books and methods are not always helpful because the autism population does not think the same way a neurotypical child does. The child with autism may not care about pleasing parents or receiving verbal praise. Because there may be significant developmental delays, the toileting process may not be started until after the age of four. Using a diaper to eliminate has been the routine for several years, and this can be hard to change. Children's books to introducing toilet training may not be appropriate because the child is too big for a potty chair or using the potty chair then transitioning to the toilet becomes yet another change and obstacle in this process. All of these concerns may feel insurmountable and overwhelming when making the decision to begin toilet training. Judith Coucouvanis has come to the rescue with her new book *The Potty Journey: Guide to Toilet Training Children with Special Needs Including Autism and Related Disorders* that empowers parents and professionals with practical information to make this journey a success. She uses the concept of a journey trip, and all the things one would need to do to make the trip a successful one. It is these planning tips and manageable steps that make toileting doable. One of the biggest quandaries parents face is not knowing when to start toileting. Judy outlines considerations when to begin toileting in the second chapter. She discusses mental age, which is not the same as chronological age, the ability to remain dry for 1-2 hours at a time, and being over the age of four when bodily functions are more mature. It is also important that you, as the parent, are emotionally ready for this commitment, which takes several weeks, and that there are no additional life stressors such as a move, divorce, job change, or major illness. One key to successful toileting is using a team approach. Everyone who spends time with that child should be involved in the toileting process. Children with autism don't generalize from one situation to the next, so for success to occur, there has to be a consistent toileting routine and approach throughout the child's day, which may unfold in several places. The author introduces the Daily Progress Record (DPR) in chapter 3, which is the foundation of the toileting process. She teaches how to practice toileting use.

rewards and supports the child's learning with visual examples. She dedicates two chapters to troubleshooting problems. The book is peppered with thoughts from parents and professionals who have gone through this journey. Their comments offer positive support and encouragement. The final chapter is dedicated for stories from those who have completed the toileting journey. Ms. Coucouvanis also writes about creating independence with toileting: how to fade prompts and your presence in the bathroom. She also discusses bathroom use in other locations such as the school and public restrooms. The hidden curriculum rules for boys and girls' public bathroom use are outlined. Most mothers are not aware of how different a men's public bathroom is from a women's. *The Potty Journey* takes parents and professionals through the toileting journey, which is a challenge but well worth the effort. Toileting with independence and confidence is a life-long skill. Without this skill, a person's choices are limited and they are dependent on someone else for one of their most basic needs. — Jacqueline Golding, 2006-01-01

Millions of children over the age of five wet their beds every night. Many parents think they must be doing something wrong when their five-year-old is still in diapers while their friends' children are perfectly trained by eighteen months of age. This undoubtedly is a very embarrassing and frustrating problem for both the parent and child and can interfere with family dynamics and a child's ability to enjoy ordinary social situations. *It's Not Your Fault* offers evidence-based strategies for parents who need assistance with toilet training and helping their child with urinary control issues. Dr. Joseph Barone, M.D., provides proven techniques that bring bedwetting to a happy conclusion. Frequently, parents are misguided by bad advice from friends. TV talk shows, the Internet, or parenting books. With many years of clinical experience, Dr. Barone shares valuable practical information for parents to guide them through the basics of toilet training and bedwetting and presents management plans to resolve any difficulties that occur. A comprehensive guide, this book covers everything parents need to know about normal toilet training and bedwetting as well as step-by-step solutions based on testing and research in a real-world setting to help children suffering from delayed toilet training, bedwetting, and daytime urinary wetting. *It's Not Your Fault* provides hope and guidance to those desperate to help their children overcome urinary control and toilet training problems. Dr. Barone sets parents on a course that makes things better for both themselves and their children. — **Housetraining For Dummies** Susan McCullough, 2019-07-05
