Oxford In The History Of The Nation:

Rescuing History from the Nation Prasenjit Duara, 1996-11-20 Prasenjit Duara offers the first systematic account of the relationship between the nation state nationalism and the concept of linear history Focusing primarily on China and including discussion of India Duara argues that many historians of postcolonial nation states have adopted a linear evolutionary history of the Enlightenment colonial model As a result they have written repressive exclusionary and incomplete accounts The backlash against such histories has resulted in a tendency to view the past as largely constructed imagined or invented In this book Duara offers a way out of the impasse between constructionism and the evolving nation he redefines history as a series of multiple often conflicting narratives produced simultaneously at national local and transnational levels In a series of closely linked case studies he considers such examples as the very different histories produced by Chinese nationalist reformers and partisans of popular religions the conflicting narratives of statist nationalists and of advocates of federalism in early twentieth century China He demonstrates the necessity of incorporating contestation appropriation repression and the return of the repressed subject into any account of the past that will be meaningful to the present Duara demonstrates how to write histories that resist being pressed into the service of the national subject in its progress or stalled progress toward modernity

Nation and the Writing of History in China and Britain, 1880-1930 Asier Hernández

Aguirresarobe, 2022-08-19 *Nation and the Writing of History in China and Britain* explores through a comparative approach the reception of the nationalist worldview and its effects on the practice of history in China and Britain This book proposes that nationalism rather than a political doctrine is a way of making sense of the world which results from the combination of a set of definite assumptions The work analyzes how each one of these premises was accepted and negotiated by literati intellectuals historians and other scholars in the late nineteenth and early twentieth centuries The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past the present and the future in both societies and decisively framed cultural social and political debate In addition they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities This book is perfect for readers interested in China and Britain during this time period but also to anyone attracted to new ways of conceiving nationalism and its role in our world

Power and the Nation in European History Len Scales, Oliver Zimmer, 2005-06-09

Few would doubt the central importance of the nation in the making and unmaking of modern political communities The long history of the nation as a concept and as a name for various sorts of imagined community likewise commands such acceptance But when did the nation first become a fundamental political factor This is a question which has been and continues to be far more sharply contested A deep rift still separates modernist perspectives which view the political nation as a phenomenon limited to modern industrialised societies from the views of scholars concerned with the pre industrial world who insist often vehemently that nations were central to pre modern political life also This book engages with these questions by drawing on

Nation Branding in Modern History Carolin Viktorin,Jessica C. E. Gienow-Hecht,Annika Estner,Marcel K. Will,2018-08-24 A recent coinage within international relations nation branding designates the process of highlighting a country s positive characteristics for promotional purposes using techniques similar to those employed in marketing and public relations Nation Branding in Modern History takes an innovative approach to illuminating this contested concept drawing on fascinating case studies in the United States China Poland Suriname and many other countries from the nineteenth century to the present It supplements these empirical contributions with a series of historiographical essays and analyses of key primary documents making for a rich and multivalent investigation into the nexus of cultural marketing self representation and political power **Nations And States** Hugh Seton-watson,2019-06-03 This major book by one of the
