palm plantations in West Papua Indonesia showing how Indigenous Marind communities understand and navigate the social political and environmental demands of the oil palm plant As Chao notes it is no secret that the palm oil sector has destructive environmental impacts it greatly contributes to tropical deforestation and is a major driver of global warming Situating the plant and the transformations it has brought within the context of West Papua s volatile history of colonization ethnic domination and capitalist incursion Chao traces how Marind attribute environmental destruction not just to humans technologies and capitalism but also to the volition and actions of the oil palm plant itself By approaching cash crops as both drivers of destruction and subjects of human exploitation Chao rethinks capitalist violence as a multispecies act In the process Chao centers how Marind fashion their own changing worlds and foreground Indigenous creativity and decolonial approaches to anthropology Duke University Press Scholars of Color First Book Award recipient *Settling for Less* Lachlan McNamee, 2023-01-17 Why countries colonize the lands of indigenous people Over the past few centuries vast areas of the world have been violently colonized by settlers But why did states like Australia and the United States stop settling frontier lands during the twentieth century At the same time why did states loudly committed to decolonization like Indonesia and China start settling the lands of such minorities as the West Papuans and Uyghurs *Settling for Less* traces this bewildering historical reversal explaining when and why indigenous peoples suffer displacement at the hands of settlers Lachlan McNamee challenges the notion that settler colonialism can be explained by economics or racial ideologies He tells a more complex story about state building and the conflicts of interest between indigenous peoples states and settlers Drawing from a rich array of historical evidence McNamee shows that states generally colonize frontier areas in response to security concerns Elite schemes to populate contested frontiers with loyal settlers however often fail As societies grow wealthier and cities increasingly become magnets for migration states ultimately lose the power to settle frontier lands *Settling for Less* uncovers the internal dynamics of settler colonialism and the diminishing power of colonizers in a rapidly urbanizing world Contrasting successful and failed colonization projects in Australia Indonesia China and beyond this book demonstrates that economic development by thwarting colonization has proven a powerful force for indigenous self determination *South Coast New Guinea Cultures* Bruce M. Knaft, 1993-03-25 The communities of south coast New Guinea were the subject of classic ethnographies and fresh studies in recent decades have put these rich and complex cultures at the centre of anthropological debates Flamboyant sexual practices such as ritual homosexuality have attracted particular interest In the first general book on the region Dr Knaft reaches striking new comparative conclusions through a careful ethnographic analysis of sexuality the status of women ritual and cosmology political economy and violence among the region s seven major language culture areas The findings suggest new Melanesian regional contrasts and provide for a general critique of the way regional comparisons are constructed in anthropology Theories of practice and political economy as well as post modern insights are drawn upon to provide a generative theory of indigenous social and symbolic development **The**
