Politica Y Estado:

Abortion in Latin America and the Caribbean Ligia De Jesús Castaldi, 2020-06-25 Abortion in Latin America and the Caribbean is the first major book to analyze the abortion laws of the Latin American and Caribbean nations that are parties to the American Convention on Human Rights Making use of a broad range of materials relating to human rights and abortion law not yet available in English the first part of this book analyzes how Inter American human rights bodies have interpreted the American Convention's prenatal right to life The second part examines Article 4 1 of the American Convention comparing and analyzing the laws regarding prenatal rights and abortion in all twenty three nations that are parties to this treaty Castaldi questions how Inter American human rights bodies currently interpret Article 4 1 Against the predominant view she argues that the purpose of this treaty is to grant legal protection of the unborn child from elective abortion that is broad and general not merely exceptional Abortion in Latin America and the Caribbean offers an objective analysis of national and international laws on abortion proposing a new interpretation of the American Convention's right to life provision that is nonrestrictive and provides general protection for the unborn The book will appeal not only to students and scholars in the field of international human rights but also to human rights advocates more generally **Bibliotheca Mexicana, Or, A**

Handbook of Social Movements across Latin America Paul Almeida, Allen Cordero Ulate, 2015-07-14 This handbook covers social movement activities in Latin American countries that have had profound consequences on the political culture of the region. It examines the developments of the past twenty years such as a renewed upswing in popular mobilization, the ending of violent conflicts and military governments, new struggles and a relatively more democratic climate. It shows that from southern Chiapas to Argentina, social movements in the 1990s and especially in the 2000s have reached new heights of popular participation. There is a lack of research on the politics of this region in the contemporary era of globalization; this volume partially fills the void and offers a rich resource to students, scholars, and the general public in terms of understanding the politics of mass mobilization in the early twenty-first century. The contributors each address social movement activity in their own nation, and together they present a multidisciplinary perspective on the topic. Each chapter uses a case study design to bring out the most prominent attributes of the particular social struggle: for instance, the main protagonists in the campaigns, the grievances of the population, and the outcomes of the struggles. This Handbook is divided into seven substantive themes providing overall coherence to a broad range of social conflicts across countries, issues, and social groups. These themes include: 1. theory of Latin American social movements; 2. neoliberalism; 3. indigenous struggles; 4. women's movements; 5. movements and the State; 6. environmental movements; and 7. transnational mobilizations.
