Prospects For Future Climate A Special Us Ussr Report On Climate And Climate Change:

Soviet Climate Change Science Jonathan D. Oldfield, Vladimir Jankovic, Katja Doose, Nina Kruglikova, Denis J.B. Shaw, Julia Lajus, 2025-11-10 Soviet Climate Change Science explores the character and range of Soviet contributions to the emerging understanding of large scale anthropogenic climate change during the post 1945 period More specifically it examines the role of Soviet scientists in helping to shape the debate both domestically and on the international stage and with a particular focus on the period 1960s to the 1980s The book details the institutional underpinnings of Soviet activity in this area the main scientific debates evident within key centres of climate related science and the activities of Soviet scientists with respect to a range of international collaborations such as the 1972 US USSR Agreement on Cooperation in the Field of Environmental Protection the early work of the Intergovernmental Panel on Climate Change IPCC and the Greenhouse Glasnost initiative which included the world s first teleconference on climate change It concludes with a reflection on the extent to which Soviet scientific legacies continued to shape Russian approaches to climate change post 1991 This book will be of interest to those working on the historical and sociocultural aspects of climate change providing the first detailed assessment of Soviet involvement in this critical area of scientific activity

Climate Change and Energy Policy L. Rosen, R. Glasser, 1992-05-01 The first conference of its kind explicitly designed to encourage the integration of the climate change community with the energy policy making and research communities The book looks at climate change on many levels including its economic impact and its effect on energy technologies Of interest to energy researchers and policy makers

Climate Change Discourse in Russia Marianna Poberezhskaya, Teresa Ashe, 2018-08-06 This book explores the development of climate change discourses in Russia It contributes to the study of climate change as a cultural idea by developing the extensive Anglophone literature on environmental science politics and policy pertaining to climate change in the West to consider how Russian discourses of climate change have developed Drawing on contributors specialising in numerous periods regions disciplines and topics of study the central thread of this book is the shared attempt to understand how environmental issues particularly climate change have been understood investigated and conceptualised in Soviet and post Soviet Russia The chapters aim to complement work on the history of the discursive political construction of climate change in the West by examining a highly contrasting but intimately related cultural context Russia remains one of the world s largest greenhouse gas emitters with one of the most carbon intensive economies As the world begins to suffer the extreme consequences of anthropogenic climate change finding adequate solutions to global environmental problems necessitates the participation of all countries Russia is a central actor in this global process and it therefore becomes increasingly important to understand climate change discourse in this region Insights gained in this area may also be illuminating for examining environmental discourses in other resource rich regions of the world with alternative economic and political experiences to that of the West e g China Middle East This book will be of great interest to students and scholars of Russian environmental

policy and politics climate change discourses environmental communication and environment and sustainability in general

Climate Change and International History Ruth A. Morgan, 2024-01-25 A 2024 CHOICE OUTSTANDING ACADEMIC TITLE Exploring how climate change has configured the international arena since the 1950s this book reveals the ways that climate change emerged and evolved as an international problem and how states scientists and non governmental organizations have engaged in diplomatic efforts to address it Developing amidst the Cold War decolonization and a growing transnational environmental consciousness it asks how this wider historical context has shaped international responses to the greatest threat to humankind to date Thinking beyond the science of climate change to the way it is received and responded to Ruth Morgan shows how climate science has been mobilised in the political sphere paying particular attention to the North South dynamics of climate diplomacy The privileging of climate science and the mobilisation of climate scepticism are explored to consider how they have undermined efforts to remedy this planetary problem Studying climate change and international history in tandem this book explains the origins of the debates around this environmental emergency the response of political leaders attempting to address the threat and the barriers to creating an international regime to resolve the climate crisis

Global Climate Change Pathfinder Chestalene Pintozi, Douglas E. Jones, 1992 Confronting Climate Change Irving M. Mintzer, 1992-06-11 Confronting Climate Change is a guide to the risks dilemmas and opportunities of the emerging political era in which the impacts of a global warming could affect all regional public and even individual decisions Written by a renowned group of scientists political analysts and economists all with direct experience in climate change related deliberations Confronting Climate Change is a survey of the best available answers to three vital questions What do we know so far about the foreseeable dangers of climate change How reliable is our knowledge What are the most rewarding ways to respond The book begins by exploring the key linkages and feedbacks that connect the risks of rapid climate change to other important environmental economic and political problems of our time Recognizing persistent uncertainties in the scientific understanding of climate change the book draws attention to those areas of research which may reveal surprises which could change the sense of political urgency surrounding the climate problem as did the discovery of the Antarctic ozone hole It explores the geological record of climate change over the Earth s history seeking a better understanding of how the climate has changed rapidly in countries while minimizing the long term environmental damages which otherwise will result from continuing the current patterns of energy supply and use The book is written to cross discipline boundaries so that policy makers economists scientists risk assessors environmentalists and development advocates may understand each other s concerns It shows how the international debate on managing the risks of rapid climate change may be re shaped for the benefit of people in every nation on the planet

,1981 **Making America Green and Safe** Alan D. Hecht,2018-10-01 Since history is a critical part of future planning the
 eight chapters of this book offer both academics and the general public a historical perspective of the evolution of science
 and policy actions on climate change and steps toward building a resilient and sustainable society especially at the
 Environmental Protection Agency EPA Reflecting the world today especially at the EPA the author who is a long time
 academic and government policy maker and researcher acknowledges that as David Barry once said March 22 1999 We live
 in troubled times but I feel good about myself about my homeland and about all nations and yes about the future of humanity
 And I will tell you why I am on painkillers Pain killers are not what we want for the future Given the pressures of many
 megatrends business and government must take bipartisan actions to move toward a resilient and sustainable world The
 book provides detailed insights into how best to deal with the nexus of environmental social and economic problems and how
 to ensure strong economic growth while protecting the environment Adapting to Climate Change Joel B. Smith,Neeloo
 Bhatti,Gennady V. Menzhulin,Ron Benioff,Max Campos,Bubu Jallow,Frank Rijsberman,Mikhail I. Budyko,R.K.
 Dixon,2012-12-06 Global climate change is one of the most important environmental issues facing the world today The United
 Nations Framework Convention on Climate Change FCCC acknowledges the potential for global climate change to have
 major effects on the world economy The work of the Intergovernmental Panel on Cli mate Change IPCC is focused on
 evaluating the scientific data on climate change and analyzing the potential responses to it One of the primary issues in the
 global climate change debate is how to adapt to any change that might occur The process of identifying adaptation measures
 and evaluating their effectiveness is the focus of this book In dealing with climate change adaptation the sequence of events

in conducting these types of analyses can be generalized as follows Develop scenarios for the possible range of climate change Assess the vulnerability of various sectors of the national economy and infrastructure to climate change and Identify and evaluate measures in each sector to adapt to the climate change It is this third step that is the subject of this book In presenting this material Chapter 1 gives an overview of the concept of climate change adaptation and the general principles guiding the conduct of analyses in this area Chapters 2-7 give the results of evaluating climate change adaptation options in the agriculture water resources coastal resources forest and ecosystems fisheries and human settlements sectors
