Psychic Energy David M. Moriarty, 1964 The Dynamics of Human Aggression Ana-Maria Rizzuto, W.W. Meissner, Dan H. Buie, 2004-03-01 This book seeks to resolve an issue that has divided psychoanalysts and other scholars of aggression for decades namely the nature of aggression The work expands and unifies the Freudian drive based explanation of aggression into contemporary psychoanalytic theory and practice and brings Freudian theory into the 21st Century Female Aggression Helen Gavin, Theresa Porter, 2014-12-15 This critique explodes the stereotypical assumption that men are more prone than women to aggression A cogent and holistic assessment of the theoretical positions and research concerning female aggression Examines the treatment punishment and community response to female aggressive behavior Examines topics including sexual power serial murder and the evolution of gendered aggression Treats female aggression in its own right rather than as a counterpart to male violence **Psychoanalysis, Violence and Rage-Type Murder** Duncan Cartwright, 2014-05-22 What turns an apparently normal individual into a killer Many people who commit rage type murders have no history of violence Using psychoanalytic theory and a number of case studies this book isolates key psychological factors that appear to help explain why such acts of extreme violence occur Starting from a psychoanalytic standpoint Psychoanalysis Violence and Rage Type Murder argues for a pluralistic approach to understanding aggression and claims that the origins of aggression have no single source or cause Drawing broadly on psychological criminological and psychoanalytic research the author outlines the clinical features of the act and explores the possible role that psychopathology and personality might play in the build up to murder These observations raise a number of questions about the so called normality of the individual alongside the capacity to commit murder and how we might understand the stability of such offenders Psychoanalysis Violence and Rage Type Murder will be of great interest to psychotherapists forensic psychotherapists psychoanalysts psychologists criminologists and health care workers A Curious Calling Michael B. Sussman, 2007-10-23 This book presents a comprehensive survey of motivations to practice psychotherapy through the extensive review of the available literature and discussion of the result of a qualitative study of therapists conducted by the author BOOK JACKET **Group Dynamics in Occupational Therapy** Marilyn B. Handbook of Aggressive and Destructive Behavior in Psychiatric Patients

Robert T. Ammerman, Michel Hersen, L.A. Sisson, 2012-12-06 Scarcely a day passes without the media detailing some form of human aggression whether it be on its grandest scale in the form of war random bombings and shootings in the streets torture in a prison camp murder by gangs wife abuse resulting in the murder of the husband or the physical abuse of children sometimes resulting in their death Frequently perpetrators of human aggression when arrested and tried in court resort to a psychiatric defense But are all such aggressors indeed appropriately psychiatric patients And if so what are their particular diagnoses and how do these relate to aggression Also of concern is aggression directed against self as evidenced in the rising incidence of suicide among young people or the self mutilation of patients suffering from certain personality disorders Both violence directed outward and aggression toward oneself pose considerable challenges to clinical management whether in the therapist s office or in the inpatient unit Although we have not been able to find successful deterrents to aggression a sizeable body of evidence does exist certainly of a descriptive nature Such data for psychiatric patients are scattered however and can be found in literatures as diverse as the biological ethological epidemiological legal philosophical psychological psychiatric and criminological Therefore given the increased frequency with which mental health professionals encounter cases of violence in their day to day work we believed it important that existing data be adduced in one comprehensive volume
