**Summa Theologica, Part I-II (Pars Prima Secundae)** Thomas Aquinas, 2021-12-12 Summa Theologica Part I II Pars Prima Secundae Thomas Aquinas The Summa Theologiae Latin Compendium of Theology or Theological Compendium also subsequently called the Summa Theologica or simply the Summa written 1265 1274 is the best known work of Thomas Aquinas c 1225 1274 and although unfinished one of the classics of the history of philosophy and one of the most influential works of Western literature It is intended as a manual for beginners in theology and a compendium of all of the main theological teachings of the Church It presents the reasoning for almost all points of Christian theology in the West The Summa's topics follow a cycle the existence of God Creation Man Man's purpose Christ the Sacraments and back to God courtesy of wikipedia com This is part 1 2 Pars Prima Secundae In a chain of acts of will man strives for the highest end They are free acts insofar as man has in himself the knowledge of their end and therein the principle of action In that the will wills the end it wills also the appropriate means chooses freely and completes the consensus Whether the act be good or evil depends on the end The human reason pronounces judgment concerning the character of the end it is therefore the law for action Human acts however are meritorious insofar as they promote the purpose of God and his honor By repeating a good action man acquires a moral habit or a quality which enables him to do the good gladly and easily This is true however only of the intellectual and moral virtues which Aquinas treats after the manner of Aristotle the theological virtues are imparted by God to man as a disposition from which the acts here proceed while they strengthen they do not form it The disposition of evil is the opposite alternative An act becomes evil through deviation from the reason and from divine moral law

Morality and the Nature of Law Kenneth Einar Himma, 2019-03-07 Morality and the Nature of Law explores the conceptual relationship between morality and the criteria that determine what counts as law in a given society the criteria of legal validity Is it necessary condition for a legal system to include moral criteria of legal validity Is it even possible for a legal system to have moral criteria of legal validity The book considers the views of natural law theorists ranging from Blackstone to Dworkin and rejects them arguing that it is not conceptually necessary that the criteria of legal validity include moral norms Further it rejects the exclusive positivist view arguing instead that it is conceptually possible for the criteria of validity to include moral norms In the process of considering such questions this book considers Raz's views concerning the nature of authority and Shapiro's views about the guidance function of law which have been thought to repudiate the conceptual possibility of moral criteria of legal validity The book then articulates a thought experiment that shows that it is possible for a legal system to have such criteria and concludes with a chapter that argues that any legal system like that of the United States which affords final authority over the content of the law to judges who are fallible with respect to the requirements of morality is a legal system with purely source based criteria of validity

**The Oxford Handbook of Theological Ethics** Gilbert Meilaender, William Werpehowski, 2007-08-09 Annotation What are the practical and theoretical issues that concern and shape theological ethics This handbook offers a guide to the discipline

Written by an international group of 30 scholars the book is aimed at all students and academics who want to explore more fully essential topics in Christian ethics Human Rights and Common Good John Finnis, 2011-04-07 This central volume in the Collected Essays brings together John Finnis's wide ranging contribution to central issues in political philosophy The volume begins by examining the general theory of political community and social justice It includes the powerful and well known Maccabaeen Lecture on Bills of Rights a searching critique of Ronald Dworkin's moral political arguments and conclusions of the European Court of Human Rights approach to fundamental rights and of judicial review as a constitutional institution It is followed by an equally searching analysis of Kant's thought on the intersection of law right and ethics Other papers in the book's opening section include an early assessment of Rawls's A Theory of Justice a radical re interpretation of Aquinas on limited government and the significance of the private public distinction and a challenging paper on virtue and the constitution The volume then focuses on central problems in modern political communities including the achievement of justice in work and distribution the practice of punishment war and justice the public control of euthanasia and abortion and the nature of marriage and the common good There are careful and vigorous critiques of Nietzsche on morality Hart on punishment Dworkin on the enforcement of morality and on euthanasia Rawls on justice and law Thomson on the woman's right to choose Habermas on abortion Nussbaum and Koppelman on same sex relations and Dummett and Weithman on open borders The volume's previously unpublished papers include a foundational consideration of labour unions a fresh statement of a new grounding for the morality of sex a surprising reading of C S Lewis's Abolition of Man on contraception and an introduction reviewing some of the remarkable changes in private and public morality over the past half century Summa Theologica Part II ("Secunda Secundae") (Annotated Edition) St. Thomas Aquinas, 2012 This is the extended and annotated edition including an extensive biographical annotation about the author and his life The Summa Theologi Latin Compendium of Theology or Theological Compendium also subsequently called the Summa Theologica or simply the Summa written 1265 1274 is the best known work of Thomas Aquinas c 1225 1274 and although unfinished one of the classics of the history of philosophy and one of the most influential works of Western literature It is intended as a manual for beginners in theology and a compendium of all of the main theological teachings of the Church It presents the reasoning for almost all points of Christian theology in the West The Summa's topics follow a cycle the existence of God Creation Man Man's purpose Christ the Sacraments and back to God courtesy of wikipedia com This is part 2 2 Secunda Secundae In a chain of acts of will man strives for the highest end They are free acts insofar as man has in himself the knowledge of their end and therein the principle of action In that the will wills the end it wills also the appropriate means chooses freely and completes the consensus Whether the act be good or evil depends on the end The human reason pronounces judgment concerning the character of the end it is therefore the law for action Human acts however are meritorious insofar as they promote the purpose of God and his honor By repeating a good action man acquires a moral habit or a quality which enables him to do the

good gladly and easily This is true however only of the intellectual and moral virtues which Aquinas treats after the manner of Aristotle the theological virtues are imparted by God to man as a disposition from which the acts here proceed while they strengthen they do not form it The disposition of evil is the opposite alternative An act becomes evil through deviation from the reason and from divine moral law Therefore sin involves two factors its substance or matter is lust in form however it is deviation from the divine law Contents Treatise on the theological virtues qq 1 to 46 Treatise on the cardinal virtues qq 47 to 170 Treatise on prudence qq 47 to 56 Treatise on justice qq 57 to 122 Treatise on fortitude and temperance qq 123 to 170 Treatise on gratuitous graces qq 171 to 182 Treatise on the states of life qq 183 to 189 **Objective NCERT Xtract**
