in this area Syzygies and Hilbert Functions explores fresh developments in the field as well as fundamental concepts

Localization and Perturbation of Zeros of Entire Functions Michael Gil',2009-12-04 One of the most important problems in the theory of entire functions is the distribution of the zeros of entire functions Localization and Perturbation of Zeros of Entire Functions is the first book to provide a systematic exposition of the bounds for the zeros of entire functions and variations of zeros under perturbations It also offers a new a *Simple Extensions with the Minimum Degree Relations of Integral Domains* Susumu Oda,Ken-ichi Yoshida,2007-03-05

Intrinsically noncommutative spaces today are considered from the perspective of several branches of modern physics including quantum gravity string theory and statistical physics From this point of view it is ideal to devise a concept of space and its geometry that is fundamentally noncommutative Providing a clear introduction to noncommutat *Commutative Algebra* Marco

Fontana,Salah-Eddine Kabbaj,Bruce Olberding,Irena Swanson,2010-09-29 Commutative algebra is a rapidly growing subject that is developing in many different directions This volume presents several of the most recent results from various areas related to both Noetherian and non Noetherian commutative algebra This volume contains a collection of invited survey articles by some of the leading experts in the field The authors of these chapters have been carefully selected for their important contributions to an area of commutative algebraic research Some topics presented in the volume include generalizations of cyclic modules zero divisor graphs class semigroups forcing algebras syzygy bundles tight closure Gorenstein dimensions tensor products of algebras over fields as well as many others This book is intended for researchers and graduate students interested in studying the many topics related to commutative algebra

Topological Groups and the Pontryagin-van Kampen Duality Lydia Außenhofer,Dikran Dikranjan,Anna Giordano Bruno,2021-11-22 This book provides an introduction to topological groups and the structure theory of locally compact abelian groups with a special emphasis on Pontryagin van Kampen duality including a completely self contained elementary proof of the duality theorem Further related topics and applications are treated in separate chapters and in the appendix Multiplicative Ideal Theory in Commutative Algebra James W. Brewer,Sarah Glaz,William Heinzer,Bruce Olberding,2006-12-15

For over forty years Robert Gilmer s numerous articles and books have had a tremendous impact on research in commutative algebra It is not an exaggeration to

say that most articles published today in non Noetherian ring theory and some in Noetherian ring theory as well originated in a topic that Gilmer either initiated or enriched by his work This volume a tribute to his work consists of twenty four articles authored by Robert Gilmer s most prominent students and followers These articles combine surveys of past work by Gilmer and others recent results which have never before seen print open problems and extensive bibliographies In a concluding article Robert Gilmer points out directions for future research highlighting the open problems in the areas he considers of importance Robert Gilmer s article is followed by the complete list of his published works his mathematical genealogical tree information on the writing of his four books and reminiscences about Robert Gilmer s contributions to the stimulating research environment in commutative algebra at Florida State in the middle 1960s The entire collection provides an in depth overview of the topics of research in a significant and large area of commutative algebra

Multiplicative Ideal Theory and Factorization Theory Scott Chapman,Marco Fontana,Alfred Geroldinger,Bruce Olberding,2016-07-29 This book consists of both expository and research articles solicited from speakers at the conference entitled Arithmetic and Ideal Theory of Rings and Semigroups held September 22-26 2014 at the University of Graz Graz Austria It reflects recent trends in multiplicative ideal theory and factorization theory and brings together for the first time in one volume both commutative and non commutative perspectives on these areas which have their roots in number theory commutative algebra and algebraic geometry Topics discussed include topological aspects in ring theory Prüfer domains of integer valued polynomials and their monadic submonoids and semigroup algebras It will be of interest to practitioners of mathematics and computer science and researchers in multiplicative ideal theory factorization theory number theory and algebraic geometry
