The Archaeology of Mesoamerican Animals Kitty F. Emery, Christopher M. Gotz, 2013-11-15 Recognition of the role of animals in ancient diet economy politics and ritual is vital to understanding ancient cultures fully while following the clues available from animal remains in reconstructing environments is vital to understanding the ancient relationship between humans and the world around them In response to the growing interest in the field of zooarchaeology this volume presents current research from across the many cultures and regions of Mesoamerica dealing specifically with the most current issues in zooarchaeological literature Geographically the essays collected here index the different aspects of animal use by the indigenous populations of the entire area between the northern borders of Mexico and the southern borders of lower Central America This includes such diverse cultures as the north Mexican hunter gatherers the Olmec Maya Mixtec Zapotec and Central American Indians The time frame of the volume extends from the earliest human occupation the Preclassic Classic Postclassic and Colonial manifestations to recent times The book s chapters written by experts in the field of Mesoamerican zooarchaeology provide important general background on the domestic and ritual use of animals in early and classic Mesoamerica and Central America but deal also with special aspects of human animal relationships such as early domestication and symbolism of animals and important yet otherwise poorly represented aspects of taphonomy and zooarchaeological methodology Spanish language version also available ISBN 978 1 937040 12 3 **Migrations in Late**

Mesoamerica Christopher S. Beekman, 2019-10-14 Bringing the often neglected topic of migration to the forefront of ancient Mesoamerican studies this volume uses an illuminating multidisciplinary approach to address the role of population movements in Mexico and Central America from AD 500 to 1500 the tumultuous centuries before European contact Clarifying what has to date been chiefly speculation researchers from the fields of archaeology biological anthropology linguistics ethnohistory and art history delve deeply into the causes and impacts of prehistoric migration in the region They draw on evidence including records of the Nahuatl language murals painted at the Cacaxtla polity ceramics in the style known as Coyotlatelco skeletal samples from multiple sites and conquest era accounts of the origins of the Chich n Itz Maya from both Native and Spanish scribes The diverse datasets in this volume help reveal the choices and priorities of migrants during times of political economic and social changes that unmoored populations from ancestral lands Migrations in Late Mesoamerica shows how migration patterns are vitally important to study due to their connection to environmental and political disruption in both ancient societies and today s world A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase **Maya Zooarchaeology** Kitty F. Emery, 2004-12-31 A comprehensive work combining traditional

zooarchaeological reports and various state of the art summaries of methods and theoretical perspectives This combination of detailed discussions of basic zooarchaeological data with reviews of important themes in Maya zooarchaeology emphasizes the central issues that guide our research from basic data collection through final comparative interpretation The chapters emphasize the newest developments in technical methods the most recent trends in the analysis of social zooarchaeology and the broadening perspectives provided by a new geographic range of investigations The main focus of the volume remains on fostering cooperation among Mesoamerican zooarchaeologists at the levels of both preliminary analysis and final theoretical reconstruction

The Conquest of the Last Maya Kingdom Grant D. Jones,1998 On March 13 1697 Spanish troops from Yucatán attacked and occupied Nojpeten the capital of the Maya people known as Itzas the inhabitants of the last unconquered native New World kingdom This political and ritual center located on a small island in a lake in the tropical forests of northern Guatemala was densely covered with temples royal palaces and thatched houses and its capture represented a decisive moment in the final chapter of the Spanish conquest of the Mayas The capture of Nojpeten climaxed more than two

years of preparation by the Spaniards after efforts by the military forces and Franciscan missionaries to negotiate a peaceful surrender with the Itzas had been rejected by the Itza ruling council and its ruler Ajaw Kan Ek. The conquest far from being final initiated years of continued struggle between Yucatecan and Guatemalan Spaniards and native Maya groups for control over the surrounding forests. Despite protracted resistance from the native inhabitants thousands of them were forced to move into mission towns though in 1704 the Mayas staged an abortive and bloody rebellion that threatened to recapture Nojpeten from the Spaniards. The first complete account of the conquest of the Itzas to appear since 1701 this book details the layers of political intrigue and action that characterized every aspect of the conquest and its aftermath. The author critically reexamines the extensive documentation left by the Spaniards presenting much new information on Maya political and social organization and Spanish military and diplomatic strategy. This is not only one of the most detailed studies of any Spanish conquest in the Americas but also one of the most comprehensive reconstructions of an independent Maya kingdom in the history of Maya studies. In presenting the story of the Itzas the author also reveals much about neighboring lowland Maya groups with whom the Itzas interacted often violently.

The Maya and Their Central American Neighbors Geoffrey E. Braswell, 2014-04-16. The ancient Maya created one of the most studied and best known civilizations of the Americas. Nevertheless Maya civilization is often considered either within a vacuum by sub region and according to modern political borders or with reference to the most important urban civilizations of central Mexico. Seldom if ever are the Maya and their Central American neighbors of El Salvador and Honduras considered together despite the fact that they engaged in mutually beneficial trade intermarried and sometimes made war on each other. *The Maya and Their Central American Neighbors* seeks to fill this lacuna by presenting original research on the archaeology of the whole of the Maya area from Yucatan to the Maya highlands of Guatemala western Honduras and El Salvador. With a focus on settlement pattern analyses architectural studies and ceramic analyses this ground breaking book provides a broad view of this important relationship allowing readers to understand ancient perceptions about the natural and built environment the role of power the construction of historical narrative trade and exchange multiethnic interaction in pluralistic frontier zones the origins of settled agricultural life and the nature of systemic collapse.

The Ethics of Anthropology and Amerindian Research Richard J. Chacon, Rubén G. Mendoza, 2011-12-15. The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and or violence is one that weighs heavily on anthropologists. This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces. Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported. This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities. This work documents the various ethical dilemmas that confront anthropologists

and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves

Maya Postclassic State Formation John W. Fox, 1987 John Fox here offers a fresh and persuasive view of the crucial Classic Postclassic transition that determined the shape of the later Maya state Drawing this data from ethnographic analogy and native chronicles as well as archaeology he identifies segmentary lineage organisation as the key to understanding both the political organisation and the long distance migrations observed among the Quiche Maya of Guatemala and Mexico The first part of the book traces the origins of the Quiche Itza and Xiu to the homeland on the Mexican Gulf coast where they acquired their potent Toltec mythology and identifies early segmentary lineages that developed as a result of social forces in the frontier zone Dr Fox then matches the known anthropological characteristics of segmentary lineages against the Mayan kinship relationships described in documents and deduced from the spatial patterning within Quiche towns and cities His conclusion that the inherently fissile nature of segmentary lineages caused the leapfrogging migrations of up to 500km observed amongst the Maya offers a convincing solution to a problem that has long puzzled scholars
