Leadership and the Rise of Great Powers Xuetong Yan, 2020-12-22 A leading foreign policy thinker uses Chinese political theory to explain why some powers rise as others decline and what this means for the international order Why has China grown increasingly important in the world arena while lagging behind the United States and its allies across certain sectors Using the lens of classical Chinese political theory Leadership and the Rise of Great Powers explains China s expanding influence by presenting a moral realist theory that attributes the rise and fall of great powers to political leadership Yan Xuetong shows that the stronger a rising state s political leadership the more likely it is to displace a prevailing state in the international system Yan shows how rising states like China transform the international order by reshaping power distribution and norms and he considers America s relative decline in international stature even as its economy education system military political institutions and technology hold steady Leadership and the Rise of Great Powers offers a provocative alternative perspective on the changing dominance of states

has implications for other major maritime players in the Pacific and Indian Oceans especially Australia the Republic of Korea and Japan as well as the US This book identifies possible cooperative and confidence building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition *Superpower, China? Historicizing Beijing's New Narratives Of Leadership And East Asia's Response Thereto* Niv Horesh, Hyun Jin Kim, Peter Mauch, 2014-10-27 This book sets out to answer how China's rise can best be understood from both East Asian and Western perspectives It also assesses the prospect of realignment away from the US hegemony in East Asia in light of persistent regional rivalries Throughout the book the authors show that for China's neighbours as well as for its own intellectuals historicizing the country's rise provides one way of understanding its current ascendant trajectory on the one hand and acute social problems on the other To which historical precedent should one turn Did Japanese Prime Minister Abe Shinzo get it right when he recently likened the contemporary Sino Japanese relationship to that of Germany and Britain on the eve of World War I Is Harvard Law School's Noah Feldman correct in his assertion that China and the United States are on the verge not of a Cold War but of a Cool War in which a classic struggle for power is unfolding at the same time as economic cooperation is becoming deeper The authors examine these questions and also focus on other observations that becloud China's rise **Sea Power and the Asia-Pacific** Geoffrey Till, Patrick Bratton, 2012-02-07 With particular focus on the Asia Pacific region this book examines the rise and fall of sea powers In the Asia Pacific region there has been significant expansion of sea based economies together with burgeoning naval power Many claim that these processes will transform the world's future economic and security relationships The book addresses the question of to what extent the notion of Asia rising is reflected by and dependent on its developing sea power A central theme is the Chinese challenge to long term Western maritime ascendancy and what might be the consequences of this In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant as well as its role both historic and contemporary in the rise and fall of great powers This book will be of much interest to students of naval power Asian politics strategic studies war and conflict studies IR and security studies *Power Transition in Asia* David Walton, Emilian Kavalski, 2016-08-12 Current preoccupations with the rise of Asia attest to the nascent contestation of the very idea of what the pattern of international politics should look like and how it should be practiced In this respect the growing reference to a shift to the East in global politics has become a popular shorthand for the nascent power transition in world affairs This volume offers a detailed conceptual and empirical investigation of the dynamics of power transition in Asia and details the accommodation strategies and coping mechanisms of different small and middle powers in Asia and importantly China's responses to these approaches China's Growth as a Regional Economic Power U.S.-China Economic and Security Review Commission, 2003 Contains testimony and prepared statements by various experts as well as remarks by members of the Commission China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the

most significant factors for contemporary international relations is the growth of China's economic military and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive or even aggressive in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. China's Power and Asian Security will be of huge interest to students and scholars of Asian politics, Chinese politics, security studies, and international security and international relations more generally.

[The Evolving Maritime Balance of Power in the Asia-Pacific](#) Lawrence W. Prabhakar, Joshua Ho, Walter Samuel Grono Bateman, 2006. The Asia-Pacific region has emerged as the hub of global geo-political, geo-economic, and geo-strategic significance in the post-Cold War period. The rise of China and the resurgence of India will be the hallmark for the next 50 years. How this surge in power is accommodated by the incumbent powers like the United States and Japan, and how the new regional powers like China and India manage the power politics that emerge, will be the key determinants of regional stability. This volume examines the national maritime doctrines as well as the nuclear weapons developments at sea of the four major powers in the Asia-Pacific, namely China, India, Japan, and the United States, to see if the evolving dynamic is a cooperative or a competitive one. In particular, the volume looks at the evolving paradigms of maritime transformation in strategy and technology, the emergent new maritime doctrines, and evolving force postures in the naval orders of battle, the role and operations of nuclear navies in the Asia-Pacific, and the implications and impact of nuclear weapons, ballistic missiles, and sea-based missile defence responses in the region.

Sample Chapter's: Chapter 1: Cooperation or Competition in Maritime Asia-Pacific (544 KB); Chapter 3: Maritime Strategic Trends in the Asia-Pacific: Issues and Challenges (1534 KB); Contents: Issues, Trends, and Paradigms in Maritime Asia-Pacific; National Maritime Doctrines and Capabilities; Nuclear Weapons and Missile Defences; The Maritime Dimension in the Asia-Pacific.

Readership: Policy makers, academics, research analysts, and students interested in maritime security in the Asia-Pacific region.
