Does Regulation Kill Jobs? Cary Coglianese, Adam M. Finkel, Christopher Carrigan, 2014-01-06 As millions of Americans struggle to find work in the wake of the Great Recession politicians from both parties look to regulation in search of an economic cure Some claim that burdensome regulations undermine private sector competitiveness and job growth while others argue that tough new regulations actually create jobs at the same time that they provide other benefits Does Regulation Kill Jobs reveals the complex reality of regulation that supports neither partisan view Leading legal scholars economists political scientists and policy analysts show that individual regulations can at times induce employment shifts across firms sectors and regions but regulation overall is neither a prime job killer nor a key job creator The challenge for policymakers is to look carefully at individual regulatory proposals to discern any job shifting they may cause and then to make regulatory decisions sensitive to anticipated employment effects Drawing on their analyses contributors recommend methods for obtaining better estimates of job impacts when evaluating

regulatory costs and benefits They also assess possible ways of reforming regulatory institutions and processes to take better account of employment effects in policy decision making Does Regulation Kills Jobs tackles what has become a heated partisan issue with exactly the kind of careful analysis policymakers need in order to make better policy decisions providing insights that will benefit both politicians and citizens who seek economic growth as well as the protection of public health and safety financial security environmental sustainability and other civic goals Contributors Matthew D Adler Joseph E Aldy Christopher Carrigan Cary Coglianese E Donald Elliott Rolf F re Ann Ferris Adam M Finkel Wayne B Gray Shawna Grosskopf Michael A Livermore Brian F Mannix Jonathan S Masur Al McGartland Richard Morgenstern Carl A Pasurka Jr William A Pizer Eric A Posner Lisa A Robinson Jason A Schwartz Ronald J Shadbegian Stuart Shapiro Environmental Law Peter S. Foreman,2011-02-01 Are we environmentally victimizing perhaps even poisoning our minority and low income citizens Proponents of environmental justice assert that environmental decisionmaking pays insufficient heed to the interests of those citizens disproportionately burdens their neighborhoods with hazardous toxins and perpetuates an insidious environmental racism In the first book length critique of environmental justice advocacy Christopher Foreman argues that it has cleared significant political hurdles but displays substantial limitations and drawbacks Activism has yielded a presidential executive order management reforms at the Environmental Protection Agency and numerous local political victories Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda The movement refuses to confront the need for environmental priorities and trade offs politically inconvenient facts about environmental health risks

and the limits of an environmental approach to social justice Ironically environmental justice advocacy may also threaten the very constituencies it aspires to serve distracting attention from the many significant health hazards challenging minority and disadvantaged populations Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental protection
