Risk Vs Risk Tradeoffs In Protecting Health And The Environment:

Risk Vs. Risk John D. Graham, Jonathan Baert Wiener, 1995-11-15 We see the stories in the newspaper nearly every day a drug hailed as a breakthrough treatment turns out to cause harmful side effects controls implemented to reduce air pollution are shown to generate hazardous solid waste bans on dangerous chemicals result in the introduction of even more risky substitutes Could our efforts to protect our health and the environment actually be making things worse In Risk versus Risk John D Graham Jonathan Baert Wiener and their colleagues at the Harvard Center for Risk Analysis marshal an impressive set of case studies which demonstrate that all too often our nation s campaign to reduce risks to our health and the environment is at war with itself **Risk Versus Risk** John D. Graham, Jonathan Baert Wiener, 1995 Risk vs. Risk John

D. Graham, Jonathan Baert Wiener, 2009-07-01 We see the stories in the newspaper nearly every day a drug hailed as a breakthrough treatment turns out to cause harmful side effects controls implemented to reduce air pollution are shown to generate hazardous solid waste bans on dangerous chemicals result in the introduction of even more risky substitutes Could our efforts to protect our health and the environment actually be making things worse In Risk versus Risk John D Graham Jonathan Baert Wiener and their colleagues at the Harvard Center for Risk Analysis marshal an impressive set of case studies which demonstrate that all too often our nation s campaign to reduce risks to our health and the environment is at war with itself *Comparative Law and Regulation* Francesca Bignami, David Zaring, 2016-09-30 Governance by regulation rules propounded and enforced by bureaucracies is taking a growing share of the sum total of governance Once thought to be an American phenomenon it is now a central form of state action in every part of the world including Europe Latin America and Asia and it is at the core of much international lawmaking In *Comparative Law and Regulation* original contributions by leading scholars in the field focus both on the legal dimension of regulation and on how this dimension operates in those places that have turned to regulation to meet their obligations S. 981, the Regulatory Improvement Act of 1997 United States. Congress. Senate. Committee on Governmental Affairs, 1998 *Risk Regulation in the Internal Market* Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory

approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Risk Management and Governance Terje Aven,Ortwin Renn,2010-09-27 Risk is a popular topic in many sciences in natural medical statistical engineering social economic and legal disciplines Yet no single discipline can grasp the full meaning of risk Investigating risk requires a multidisciplinary approach The authors coming from two very different disciplinary traditions meet this challenge by building bridges between the engineering the statistical and the social science perspectives The book provides a comprehensive accessible and concise guide to risk assessment management and governance A basic pillar for the book is the risk governance framework proposed by the International Risk Governance Council IRGC This framework offers a comprehensive means of integrating risk identification assessment management and communication The authors develop and explain new insights and add substance to the various elements of the framework The theoretical analysis is illustrated by several examples from different areas of applications

An Inconvenient Deliberation Miriam Haritz,2011-05-27 There is increasing evidence to suggest that adaptation to the inevitable is as relevant to climate change policymaking as mitigation efforts Both mitigation and adaptation as well as the unavoidable damage occurring both now and that is predicted to occur all involve costs at the expense of diverse climate change victims The allocation of responsibilities implicit in terms of the burden sharing mechanisms that currently exist in public and private governance demands recourse under liability law especially as it has become clear that most companies will only start reducing emissions if verifiable costs of the economic consequences of climate change including the likelihood of liability outweigh the costs of taking precautionary measures This vitally important book asks Can the precautionary principle make uncertainty judiciable in the context of liability for the consequences of climate change and if so to what extent Drawing on the full range of pertinent existing literature and case law the author examines the precautionary principle both in terms of its content and application and in the context of liability law She analyses the indirect means offered by existing legislation being used by environmental groups and affected individuals before the courts to challenge both companies and regulators as responsible agents of climate change damage In the process of responding to its fundamental question the analysis explores such further questions as the following What is the role of the precautionary principle in resolving uncertainty in scientific risk assessment when faced with inconclusive evidence and how does it affect decision making particularly in the regulatory choices concerning climate change To this end what is the concrete content of the precautionary principle How does liability law generally handle scientific uncertainty What different types of liability exist and how are they equipped to

handle a climate change liability claim What type of liability is best suited for precautionary measures or a lack thereof Can the application of the precautionary principle make a difference to the outcomes of climate change liability claims In order to draw conclusions concerning the legal uncertainties posed by climate change the author draws examples from national legislations representative of the various legal systems as well as from existing treaties General rules and obligations relevant to climate change liability are examined and a selection of actual legal cases from around the world concerning climate change be it actual liability claims or litigation indirectly relevant to a claim is also presented As an overview of the different legal challenges created by climate change liability this book is without peer The practical meaning and impact of these findings for lawyers whether corporate or activist for regulators and policymakers and for decision makers in governmental bodies and private companies is immeasurable

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin

Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance

Environment and Social Justice Dorceta E. Taylor, 2010-08-26 The environmental justice movement an organized social and political force in America in the 80s is a global phenomenon today as activists worldwide try to understand the relationship between environment race

ethnicity and social inequality This volume examines domestic and international environmental issues **Arguing about Science** Alexander Bird, James Ladyman, 2013 Arguing About Science is an outstanding engaging introduction to the essential topics in philosophy of science edited by two leading experts in the field This exciting and innovative anthology contains a selection of classic and contemporary readings that examine a broad range of issues from classic problems such as scientific reasoning causation and scientific realism to more recent topics such as science and race forensic science and the scientific status of medicine The editors bring together some of the most influential contributions of famous philosophers in the field including John Stuart Mill and Karl Popper as well as more recent extracts from philosophers and scientists such as Ian Hacking Stephen Jay Gould Bas van Fraassen Nancy Cartwright and John Worrall The anthology is organised into nine clear sections science non science and pseudo science race gender and science scientific reasoning scientific explanation laws and causation science and medicine probability and forensic science risk uncertainty and science policy scientific realism and anti realism The articles chosen are clear interesting and free from unnecessary jargon The editors provide lucid introductions to each section in which they provide an overview of the debate as well as suggestions for further reading

Does Regulation Kill Jobs? Cary Coglianese, Adam M. Finkel, Christopher Carrigan, 2014-01-06 As millions of Americans struggle to find work in the wake of the Great Recession politicians from both parties look to regulation in search of an economic cure Some claim that burdensome regulations undermine private sector competitiveness and job growth while others argue that tough new regulations actually create jobs at the same time that they provide other benefits Does Regulation Kill Jobs reveals the complex reality of regulation that supports neither partisan view Leading legal scholars economists political scientists and policy analysts show that individual regulations can at times induce employment shifts across firms sectors and regions but regulation overall is neither a prime job killer nor a key job creator The challenge for policymakers is to look carefully at individual regulatory proposals to discern any job shifting they may cause and then to make regulatory decisions sensitive to anticipated employment effects Drawing on their analyses contributors recommend methods for obtaining better estimates of job impacts when evaluating regulatory costs and benefits They also assess possible ways of reforming regulatory institutions and processes to take better account of employment effects in policy decision making Does Regulation Kills Jobs tackles what has become a heated partisan issue with exactly the kind of careful analysis policymakers need in order to make better policy decisions providing insights that will benefit both politicians and citizens who seek economic growth as well as the protection of public health and safety financial security environmental sustainability and other civic goals Contributors Matthew D Adler Joseph E Aldy Christopher Carrigan Cary Coglianese E Donald Elliott Rolf F re Ann Ferris Adam M Finkel Wayne B Gray Shawna Grosskopf Michael A Livermore Brian F Mannix Jonathan S Masur Al McGartland Richard Morgenstern Carl A Pasurka Jr William A Pizer Eric A Posner Lisa A Robinson Jason A Schwartz Ronald J Shadbegian Stuart Shapiro **Resolution of International Water Disputes** Permanent Court of

Arbitration. International Bureau, Permanent Court of Arbitration, 2003-01-01 This fifth volume in the Permanent Court of Arbitration Peace Palace Papers series reproduces the work of the 6th International Law Seminar held at the Peace Palace on November 8 2002 The Seminar's distinguished panelists and participants focused on the settlement of international disputes over that most essential of natural resources water They explored a range of questions Which settlement mechanisms are most promising in the field of transboundary freshwater disputes Is adjudication a suitable method of apportioning water rights which are vital not only to human life but to the agriculture and industry of every nation on the planet Given the need for win win solutions to most water disputes are negotiation and regional cooperation the only realistic and viable methods for settling them What is the potential role of conciliation mediation good offices and other ad hoc mechanisms This volume also contains the 1997 United Nations Convention on the Law of the Non Navigational Uses of International Watercourses a multilateral framework treaty dealing with transboundary freshwater which provides a variety of tools such as the submission of disputes to fact finding commissions for the peaceful resolution of water disputes

Wallace Hayes, 2007-09-25 Founded on the paradox that all things are poisons and the difference between poison and remedy is quantity the determination of safe dosage forms the base and focus of modern toxicology In order to make a sound determination there must be a working knowledge of the biologic mechanisms involved and of the methods employed to define these mechanisms

Future Flooding and Coastal Erosion Risks Colin R Thorne, Edward Evans, E. Penning-Rowsell, 2007-01-10 Over 200 billion worth of assets are at risk around British rivers and coasts and those risks are likely to increase over the next 100 years due to changes in climate and in society Sir David King Government Chief

Scientific Adviser This book presents a comprehensive insight into the flooding system spanning multiple disciplines across different sectors of the flood and flood management professions It forecasts the manner in which flooding and coastal erosion risks may increase during the 21st century due to climate change *The Promise and Peril of Environmental Justice*
Christopher H. Foreman, 2011-02-01 Are we environmentally victimizing perhaps even poisoning our minority and low income citizens Proponents of environmental justice assert that environmental decisionmaking pays insufficient heed to the interests of those citizens disproportionately burdens their neighborhoods with hazardous toxins and perpetuates an insidious environmental racism In the first book length critique of environmental justice advocacy Christopher Foreman argues that it has cleared significant political hurdles but displays substantial limitations and drawbacks Activism has yielded a presidential executive order management reforms at the Environmental Protection Agency and numerous local political victories Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda The movement refuses to confront the need for environmental priorities and trade offs politically inconvenient facts about environmental health risks and the limits of an environmental approach to social justice Ironically environmental justice advocacy may also threaten the very constituencies it aspires to serve distracting attention from the many significant health hazards challenging minority and disadvantaged populations Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental protection
