Sciences The Humanities And The Technological Threat:

The Sciences, the Humanities, and the Technological Threat William Roy Niblett, 1975 *The Sciences, the Humanities, and the Technological Threat* William Roy Niblett, 1975 **Combining Two Cultures** Herb Jenkins, Barbara Ferrier, Michael L. Ross, 2004 Research intensive universities have long struggled to reconcile the imperative of specialized learning with the need for a broader more liberal education Combining Two Cultures provides a comprehensive account of a degree program at a distinguished Canadian university McMaster aimed at accomplishing this synthesis This innovative program has stood up well over more than two decades It has a curriculum balanced between arts and sciences and is committed to developing broadly applicable intellectual skills above all those that underlie scholarly inquiry into questions of importance to students and to the society they live in It attempts to harmonize the excitement of exploring a broad range of fields with students needs to meet the requirements for advanced study in professional and academic graduate disciplines This book offers insights into the challenges of planning and establishing a program of this kind Brief personal reflections from many of the program s graduates firsthand observations from current students and instructors accounts of their experiences give a vivid sense of what the program has meant to its participants *Interactions of Technology and Society* , 1974 *A Reference Guide for English Studies* Michael J. Marcuse, 2023-11-15 *Teaching Technology* Frank Banks, 2013-10-18 Technology is a new and rapidly changing area of the curriculum For experienced teachers in school as well as for students and novices it has involved the need for a whole new range of knowledge and skills in teaching This reader draws together already published articles and newly commissioned material from leading authors in the field to help teachers at all stages of their professional development to understand the principles which need to be considered whatever the detail of the National Curriculum in this subject It looks at the development of technology as a school subject at the ways in which pupils learn and teachers teach it and at its place within the wider contexts of education as a whole and of the society which technological developments help to shape *Environmental and Technological Threats in the Arctic Region* Mathieu Landriault, Magali Vullierme, Michael Delaunay, 2025-09-09 Arctic subregions have undergone major structural changes in the past few decades Looking past traditional military and geopolitical understandings of these regions this book focuses rather on climate change and on the emergence of the digital economy and its infrastructures as two of the most fundamental challenges for Arctic communities and inhabitants To this end Section I on Arctic re newned environment focuses on the acceleration of permafrost thaw protection of submarine cables and the importance of an all domain military approach Section II analyses infrastructure challenges linked to this new Arctic environment providing examples within maritime transportation and digital physical infrastructures Finally Section III provides results of research focusing on the emerging geopolitical and strategic threats posed by data routes technological dependencies cryptocurrency mining and disinformation Over the course of the book authors offer practical insights into how to tackle these threats lessons learned best practices and

recommendations By bringing together analyses from a range of authors from different interdisciplinary backgrounds the book provides a holistic understanding of these phenomena This volume will be useful for students scholars and researchers of Arctic studies environmental governance and environmental security Thomas Kuhn Steve Fuller,2000 This work discusses whether Kuhn s *The Structure of Scientific Revolutions* was revolutionary Steve Fuller argues that Kuhn held a profoundly conservative view of science and how one ought to study its history **Science and Society in the Face of the New Security Threats** Mary Sharpe,Abimbola Agboluaje,2006 Contains papers that explore the challenges faced by the science establishments in the new security environment across a range of NATO countries This work examines possible solutions by looking in closer detail at some national case studies It sets out the importance of the NATO Security Through Science programme in the new security environment *A Will to Learn: Being a Student in an Age of Uncertainty* Ronald Barnett,2007-10-16 There is an extraordinary but largely unnoticed phenomenon in higher education by and large students persevere and complete their studies How should we interpret this tendency Students are living in uncertain times and often experience anxiety and yet they continue to press forward with their studies The argument here is that we should understand this propensity on the part of students to persist through a will to learn This book examines the structure of what it is to have a will to learn Here a language of being becoming authenticity dispositions voice air spirit inspiration and care is drawn on As such this book offers an idea of student development that challenges the dominant views of our age of curricula understood largely in terms of skill or even of knowledge and pedagogy understood as bringing off pre specified outcomes The will to learn though can be fragile This is of crucial importance for if the will to learn dissolves the student s commitment may falter Accordingly more than encouraging an interest in the student s subject or in the acquiring of skills the primary responsibility of teachers in higher education is to sustain and develop the student s will to learn This is a radical thesis for it implies a transformation in how we understand the nature of teaching in higher education **Steel City** M.J. Dear,J.J. Drake,L.G. Reeds,1987-12-15 From its establishment nearly 200 years ago as a village at the centre of an agricultural district Hamilton has grown into one of Canada s biggest industrial centres at the heart of a highly developed regional municipality The story of its changing landscapes both physical and human is presented in the nineteen essays that make up this volume all by geographers associated with Hamilton s McMaster University Change is the essence of the story Each contributor focuses on one aspect of the past present or future landscapes of Hamilton and places it within the context of change in the region The first series of essays explores physical landscapes geology and relief climate soils vegetation and hydrology and shows how human activity has moulded them The second group charts the evolution of human landscapes in the region paying special attention to contemporary Hamilton with its rich and diverse combination of people and cultures and also to the political intrigue that surrounded the introduction of regional government to the area Finally a third series focuses on the functioning of the Hamilton region Within a highly complex system the city and region balance a broad range of often

contradictory trends and activities The contributors examine the difficulties facing agriculture in a rapidly urbanizing region the importance of Hamilton in caring for welfare dependent populations the future of steel in Steel City the challenges posed by energy requirements in the region and the hard choices facing policy makers The last two essays discuss the role played by McMaster University in the life of the region and the landscape of Hamilton today a remarkable complex of historical interest great natural beauty and modern city life Routledge Library Editions: Higher Education Various,2021-03-29 The volumes in this set originally published between 1964 and 2002 draw together research by leading academics in the area of higher education and provide a rigorous examination of related key issues The volume examines the concepts of learning teaching student experience and administration in relation to the higher education through the areas of business sociology education reforms government educational policy business and religion whilst also exploring the general principles and practices of higher education in various countries This set will be of particular interest to students and practitioners of education politics and sociology Yorick's World Peter Caws,2023-04-28 Peter Caws provides a fresh and often iconoclastic treatment of some of the most vexing problems in the philosophy of science explanation induction causality evolution discovery artificial intelligence and the social implications of technological rationality Caws s work has been shaped equally by the insights of Continental philosophy and a concern with scientific practice In these twenty eight essays spanning more than a quarter of a century he ranges from discussions of the work of French philosopher Gaston Bachelard to relations between science and surrealism to the concept of intentionality to the limits of quantitative description A lively mix of history theory speculation and analysis Yorick s World presents a vision of science that includes human history and social life It will interest professional philosophers and scientists and at the same time its directness will make it readily accessible to nontechnical readers Peter Caws provides a fresh and often iconoclastic treatment of some of the most vexing problems in the philosophy of science explanation induction causality evolution discovery artificial intelligence and the social implications of technological r **Science in the National Curriculum** Mike Watts,1991 Designed as an easy reference guide this work examines the implications of the UK National Curriculum for science in secondary schools It looks at the direction in which things are moving and examines what teachers should be working on in the light of the implications of the National Curriculum The Study of Education Peter Gordon,2019-05-20 The inaugural lectures published in this volume reflect the many changes which have taken place in the study of education between the late 1970s and the mid 1980s Changes in society are reflected in the lectures on special needs education and multicultural education and the contributions of educational administration and comparative educations as a field of study **Barcoding Nature** Claire Waterton,2017-07-05 DNA Barcoding has been promoted since 2003 as a new fast digital genomics based means of identifying natural species based on the idea that a small standard fragment of any organism s genome a so called micro genome can faithfully identify and help to classify every species on the planet The fear that species are becoming extinct

before they have ever been known fuels barcoders and the speed scope economy and user friendliness claimed for DNA barcoding as part of the larger ferment around the genomics revolution has also encouraged promises that it could inspire humanity to reverse its biodiversity destructive habits This book is based on six years of ethnographic research on changing practices in the identification and classification of natural species Informed both by Science and Technology Studies STS and the anthropology of science the authors analyse DNA barcoding in the context of a sense of crisis concerning global biodiversity loss but also the felt inadequacy of taxonomic science to address such loss The authors chart the specific changes that this innovation is propelling in the collecting organizing analyzing and archiving of biological specimens and biodiversity data As they do so they highlight the many questions ambiguities and contradictions that accompany the quest to create a genomics based environmental technoscience dedicated to biodiversity protection They ask what it might mean to recognise ambiguity contradiction and excess more publicly as a constitutive part of this and other genomic technosciences Barcoding Nature will be of interest to students and scholars of sociology of science science and technology studies politics of the environment genomics and post genomics philosophy and history of biology and the anthropology of science
