Science de l'information Jacqueline Deschamps, 2010 Quels savoirs sont mobilisés pour constituer le cœur de la science de l'information et quels sont les enjeux de la discipline ? C'est ces questions que répond cet ouvrage. Des pistes sont proposées pour construire un programme de formation, l'objectif étant de fournir un corpus de concepts qui ne soient pas conjoncturels mais qui constituent un socle initial sur lequel peuvent s'appuyer les enseignants en science de l'information.

Tout en prenant la mesure de changements considérables dans l'économie matérielle de la culture, le livre se dresse des perspectives pour étudier méthodiquement ce que l'invention des objets apporte à la circulation sociale des informations et des savoirs. Le mot information dont le sens paraît évident masque toute la complexité des relations entre technologie et culture. Prenant une distance historique et théorique, l'auteur mène un examen précis

Health Research Practices in a Digital Context

Laurent Morillon, 2020-10-29 The current generalized digitization of society is influencing the health environment healthcare organizations as well as actors In this context human and social sciences deconstruct nuance and sometimes even challenge certain preconceived ideas and/or dominant discourses In this book researchers of four nationalities and three different disciplines have agreed to open the black box of their work They display their scientific practices from the perspective of epistemology ethics and methodology They present and analyze their values and postulates but also what may have influenced the project the definition of the object and objectives as well as their approaches In a contextual way the first part presents some changes in environments and infocommunicational practices related to digital health The second part opens space to reflect on ethics and deontology Finally postulating that scientific fact is not an essence but the result of a process the last part discusses the methods implemented which may be different from those initially envisaged This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them
