Behave Robert M. Sapolsky, 2017-05-02 New York Times bestseller Winner of the Los Angeles Times Book Prize One of the Washington Post's 10 Best Books of the Year It's no exaggeration to say that *Behave* is one of the best nonfiction books I've ever read David P. Barash The Wall Street Journal It has my vote for science book of the year Parul Sehgal The New York Times Immensely readable often hilarious Hands down one of the best books I've read in years I loved it Dina Temple Raston The Washington Post From the bestselling author of *A Primate's Memoir* and the forthcoming *Determined: A Science of Life Without Free Will* comes a landmark genre-defining examination of human behavior and an answer to the question Why do we do the things we do *Behave* is one of the most dazzling tours d'horizon of the science of human behavior ever attempted Moving across a range of disciplines Sapolsky a neuroscientist and primatologist uncovers the hidden story of our actions Undertaking some of our thorniest questions relating to tribalism and xenophobia hierarchy and competition and war and peace *Behave* is a towering achievement a majestic synthesis of cutting edge research and a heroic exploration of why we ultimately do the things we do for good and for ill *WebMD Scientific American* David C. Dale, Daniel D. Federman, 2003 A leading textbook in the internal medicine field for more than 25 years this publication is based on a continually updated electronic database where new and updated information is fully integrated monthly and the entire database published annually in print Each annual edition contains up to as much as 40% new and updated information published in 2 volumes with four color illustrations throughout The text covers all of internal medicine plus bio terrorism and medical emergencies dermatology office gynecology neurology and psychiatry More than 200 expert sub specialists with extensive clinical experience provide clear actionable diagnosis and treatment recommendations Key recommendations are readily accessible in the 778 tables on drug regimens differential diagnoses common presenting symptoms and risk factors References to current best evidence support the recommendations and lead the reader to scientifically sound research

The Neuroscience of Autism Spectrum Disorders Joseph D. Buxbaum, Patrick R. Hof, 2012-12-31 Autism is no longer considered a rare disease and the Center for Disease Control now estimates that upwards of 730 000 children in the US struggle with this isolating brain disorder New research is leading to greater understanding of and ability to treat the disorder at an earlier age It is hoped that further genetic and imaging studies will lead to biologically based diagnostic techniques that could help speed detection and allow early more effective intervention Edited by two leaders in the field this volume offers a current survey and synthesis of the most important findings of the neuroscience behind autism of the past 20 years With chapters authored by experts in each topic the volume explores

etiology neuropathology imaging and pathways models Offering a broad background of ASDs with a unique focus on neurobiology the volume offers more than the others on the market with a strictly clinical focus or a single authored perspective that fails to offer expert comprehensive coverage Researchers and graduate students alike with an interest in developmental disorders and autism will benefit as will autism specialists across psychology and medicine looking to expand their expertise Uniquely explores ASDs from a neurobiological angle looking to uncover the molecular cellular basis rather than to merely catalog the commonly used behavioral interventions Comprehensive coverage synthesizes widely dispersed research serving as one stop shopping for neurodevelopmental disorder researchers and autism specialists Edited work with chapters authored by leaders in the field around the globe the broadest most expert coverage available Alzheimer's Disease Jude Poirier, Serge Gauthier, 2014-07-12 Explains the disease and addresses recent strides in treatment while dispelling myths intended for patients families and caregivers Breath James Nestor, 2020-05-26 A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR A fascinating scientific cultural spiritual and evolutionary history of the way humans breathe and how we've all been doing it wrong for a long long time Elizabeth Gilbert author of Big Magic and Eat Pray Love No matter what you eat how much you exercise how skinny or young or wise you are none of it matters if you're not breathing properly There is nothing more essential to our health and well being than breathing take air in let it out repeat twenty five thousand times a day Yet as a species humans have lost the ability to breathe correctly with grave consequences Journalist James Nestor travels the world to figure out what went wrong and how to fix it The answers aren't found in pulmonology labs as we might expect but in the muddy digs of ancient burial sites secret Soviet facilities New Jersey choir schools and the smoggy streets of S o Paulo Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama Sudarshan Kriya and Tummo and teams up with pulmonary tinkerers to scientifically test long held beliefs about how we breathe Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump start athletic performance rejuvenate internal organs halt snoring asthma and autoimmune disease and even straighten scoliotic spines None of this should be possible and yet it is Drawing on thousands of years of medical texts and recent cutting edge studies in pulmonology psychology biochemistry and human physiology Breath turns the conventional wisdom of what we thought we knew about our most basic biological function on its head You will never breathe the same again
