

The Scientific Basis of KRSNA CONSCIOUSNESS

by SVARUPA DAMODARA DASA, Ph.

It is also to be noted that so-called scientific theories are changing constantly. For example, at the beginning of the Nineteenth Century (1808), John Dalton, in developing his atomic theory, stated that atoms could not be further divided. However, toward the end of the Nineteenth Century and the beginning of the Twentieth Century, it was found that Dalton's atomic theory could no longer be considered correct.

It was observed that atoms could be further divided into fundamental particles like electrons, protons and neutrons. It was also found that some atoms could emit alpha and beta particles, thereby producing new atoms, and so on. As a matter of fact, the so-called nuclear bombs are a result of these findings. In a similar manner, during the Eighteenth and Nineteenth Centuries Newton's mechanics had a tremendous influence on the minds of scientists, since they could be applied to gross material objects. However, at the beginning of the Twentieth Century, with the discoveries of the fundamental particles, it was realized that Newton's mechanics failed in describing the motions of these particles. Thus quantum mechanics has been developed to explain the phenomena they exhibit.

These theories are filled with speculation, and they are also changing, just as past and present scientific theories are changing, so we can understand that future scientific theories will also change.

This simply shows that the brains of the highly honored material scientists are imperfect, and, as a result, the theories proposed by these brains will always be imperfect. Actually, perfect knowledge cannot be changed. In order to get perfect knowledge, one has to take knowledge from the perfect scientist, Lord Krsna, and His bona fide representative, the spiritual master.
