How did chemistry and physics acquire their separate identities and are they on their way to losing them again Mary Jo Nye has written a graceful account of the historical demarcation of chemistry from physics and subsequent reconvergences of the two from Lavoisier and Dalton in the late eighteenth century to Robinson Ingold and Pauling in the mid twentieth century Using the notion of a disciplinary identity analogous to ethnic or national identity Nye develops a theory of the nature of disciplinary structure and change She discusses the distinctive character of chemical language and theories and the role of national styles and traditions in building a scientific discipline Anyone interested in the history of scientific thought will enjoy pondering with her the question of whether chemists of the mid twentieth century suspected chemical explanation had been reduced to physical laws just as Newtonian mechanical philosophers had envisioned in the eighteenth century Write and Publish a Scientific Paper Barbara Gastel, Robert A. Day, 2022-06-30 Thoroughly updated throughout this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible The purpose of scientific writing according to Barbara Gastel and Robert A Day is to communicate new scientific findings Science is simply too important to be communicated in anything other than words of certain meaning This clear beautifully written and often funny text is a must have for anyone who needs to communicate scientific information whether they re writing for a professor other scientists or the general public The thoughtfully revised 9th edition retains the most important material including preparing text and graphics publishing papers and other types of writing and plenty of information on writing style while adding up to date advice on copyright presenting online identifying authors creating visual abstracts and writing in English as a non native language A set of valuable appendixes provide ready reference including words and expressions to avoid SI prefixes a list of helpful websites and a glossary Students and working scientists will want to keep How to Write and Publish a Scientific Paper at their desks and refer to it at every stage of writing and publication Living Books Janneke Adema, 2021-08-31 Reimagining the scholarly book as living and collaborative not as commodified and essentialized but in all its dynamic materiality In this book Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project not as linear bound and fixed but as fluid remixed and liquid a space for experimentation She presents a series of cutting edge experiments in arts and humanities book publishing showcasing the radical new forms that book based scholarly work might take in the digital age Adema's proposed alternative futures for the scholarly book go beyond such print based assumptions as fixity stability the single author originality and copyright reaching instead for a dynamic and emergent materiality Adema suggests ways to unbind the book describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship radical open access publishing and processual living and remixed publications among other practices She doesn't cast digital as the solution and print as the problem in scholarly publishing she argues is not print itself but the way print has been commodified and essentialized Adema explores alternative more ethical models of authorship constructs an alternative genealogy of openness and examines opportunities

for intervention in current cultures of knowledge production Finally asking why it is that we cut and bind our research together at all she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book apparatus by taking responsibility for the cuts they make **Unifying Systems** Aarne Mämmelä, 2025-04-29 Interdisciplinary systems thinking is complementary but does not replace conventional disciplinary analytical thinking The book is valuable for researchers their advisors and other thinkers interested in deep knowledge of science Interdisciplinary systems thinking is valuable for three reasons The goal of all science is a unified view of the world we cannot solve the significant problems of our time without interdisciplinary collaboration and general theories of systems and system archetypes support the solution to those problems System archetypes are generic system models that have stood the test of time As specialists within a discipline we must be able to communicate between disciplines Interdisciplinary generalists can offer us reliable visions and relevant research problems The goal of interdisciplinary research is to find unified solutions to those problems The book provides a lot of information from over a thousand sources in a structured manner to help the reader The book includes a comprehensive chronology vocabulary and bibliography The author has been a research professor in information engineering for over 25 years During his career he became interested in systems thinking which is closely related to the philosophy and history of science A Historical Catalogue of Scientific Periodicals, **1665-1900** Robert Mortimer Gascoigne,1985 **Book catalog of the Library and Information Services Division** Environmental Science Information Center. Library and Information Services Division, 1977 **Book Catalog of the** Library and Information Services Division: Shelf List catalog Environmental Science Information Center. Library and Information Services Division, 1977 **English** David Graddol, Dick Leith, Joan Swann, 2024-11-01 The story of English is often presented as one of progress from a set of Germanic dialects to a fully fledged national and international language The emphasis in this book is on the diversity of English throughout its history and the changing social meanings of different varieties of English
