

The Scientific Council on Problems of the Physiological Theory of Academician I. P. Pavlov: A Study in Control

Ivan D. London

Russian Research Center, Harvard University, Cambridge, Massachusetts

EVEN IN THE SOVIET UNION it is one thing to decree the ideological line for the several sciences, and another thing to implement, interpret, and enforce it. Falling into the Party line is not an automatic affair and poses, moreover, difficulties even for the scientist who wants to conform: He is never quite sure whether he is following the line as intended or as will be intended—whether he is underadhering or overadhering. The many publicized instances of displeasure feed and justify his apprehensions. But he continues to try to operate within the limitations imposed from above and to salvage what he can—that is, unless he has abused himself to the equivalent of a Party hack. There are very, very many of these.¹

The scientific council, which the presidium of the USSR Academy of Sciences set up to act as a watchdog over physiological and related research, provides through its published decrees some insight into the manner of holding scientists to adopted lines. From these decrees, with their sometimes inquisitorial language, one surmises also the private drama of those persons unfortunate enough to have been singled out as symbols for public ire, as well as the drabber problems of the routine, pedestrian researcher.

This council, known in full as the Scientific Council on Problems of the Physiological Theory of Academician I. P. Pavlov (Affiliated with the Presidium of the USSR Academy of Sciences), was established in 1950 under charge by the joint assemblage of the USSR Academy of Sciences and the USSR Academy of Medical Sciences to facilitate and guarantee the Pavlovianization of physiology and related disciplines. Its chairman is the same Bykov who, along with Ivanov-Smolenskii, had come to head the newly formed Pavlovian front (1).

Since its inception, according to the available literature, the Scientific Council has been called into session at least six times. Its activities, although little publicized, are nevertheless clearly reflected in its decrees, some of which are documents of considerable human interest.

The first meeting of the Scientific Council took place in Moscow, October 13–14, 1950. A variety of questions was taken up for discussion: Bykov spoke

of the “principal tasks of the Council;” a second edition of the complete works of Pavlov was proposed; and so forth. But the chief items on the council’s agenda were the research plans submitted by Airapet’iants, Asratian, and others for the year 1951. Although these plans were the subject of detailed discussion, there was never really much doubt that the official seal of approval would be theirs—Airapet’iants and Asratian had long been playing pro-Pavlovian roles of some prominence, and Airapet’iants was, moreover, secretary of the Scientific Council (2).

The second meeting took place December 25–27, 1950. Bykov detailed the progress that had been made toward “realization of the decrees of the joint session of the USSR Academy of Sciences and the USSR Academy of Medical Sciences.” Kupalov presented his plans for the organization of a “scientific session” to commemorate the anniversary of Pavlov’s death. Ivanov-Smolenskii discussed what went into readying for publication the new journal—*Zhurnal Vyssheĭ Nерvnoi Деятельности Имени I. P. Павлова* (*The Pavlov Journal of Higher Nervous Activity*)—decreed to be established by the “joint session” of six months before, and scheduled for first issue in January 1951. The research plans of Speranskii, Kupalov, and others were presented and discussed. Finally, Asratian was unanimously voted honorary lecturer for the “Pavlovian Readings” of 1951, with Kiev designated as the place of the next lecture (3, 4).

The calm and matter-of-fact reporting of the first two meetings of the Scientific Council creates an impression of harmonious concurrence among Pavlovians—the old and the new—which the third and fourth meetings sharply belie. On keeping to slogans and verbal stereotypes, it is true, all manage to be properly Pavlovian. On getting down to the real business of theory and experiment, however, the oneness of scientific faith may be seen for the false façade that it is. Orbeli and Beritov, for example, may affirm day after day their Pavlovian orthodoxy, but they seem always somehow to stay out of step, no matter how hard they try to go along (5, 6). As a matter of fact, just this discrepancy between actual practice and outer appearance is the *raison d’être* of the Scientific Council itself. The council is an agency of control both to give direction and to correct any erroneous course.

¹Two sources contribute to this interpretation: the literature of the Soviet scientific and public press itself, and the interviews conducted both here and in Germany by the Harvard Refugee Interview Project (now termed Harvard Project on the Soviet Social System), of which the writer is a member.

Scientific Session On The Physiological Teachings:

Stalin and the Soviet Science Wars Ethan Pollock, 2021-05-11 Between 1945 and 1953 while the Soviet Union confronted postwar reconstruction and Cold War crises its unchallenged leader Joseph Stalin carved out time to study scientific disputes and dictate academic solutions He spearheaded a discussion of scientific Marxist Leninist philosophy edited reports on genetics and physiology adjudicated controversies about modern physics and wrote essays on linguistics and political economy Historians have been tempted to dismiss all this as the megalomaniacal ravings of a dying dictator But in *Stalin and the Soviet Science Wars* Ethan Pollock draws on thousands of previously unexplored archival documents to demonstrate that Stalin was in fact determined to show how scientific truth and Party doctrine reinforced one another Socialism was supposed to be scientific and science ideologically correct and Stalin ostensibly embodied the perfect symbiosis between power and knowledge Focusing on six major postwar debates in the Soviet scientific community this elegantly written book shows that Stalin's forays into scholarship can be understood only within the context of international tensions institutional conflicts and the growing uncertainty about the proper relationship between scientific knowledge and Party dictated truths The nature of Stalin's interventions makes clear that more was at stake than high politics these science wars were about asserting that the Party was rational and modern and about codifying the Soviet worldview in a battle for the hearts and minds of people around the globe during the early Cold War Ultimately however the effort to develop a scientific basis for Soviet ideology undermined the system's legitimacy **S. Foundations of Soviet Psychology T.R.S.L. Payne, 2012-12-06 This work is intended as an introduction to the study of Soviet psychology In it we have tried to present the main lines of Soviet psychological theory in particular the philosophical principles on which that theory is founded There are surprisingly few books in English on Soviet psychology or indeed in any Western European language The works that exist usually take the form of symposia or are collections of articles translated from Soviet periodicals The most important of these are *Psychology in the Soviet Union* ed by Brian Simon *Recent Soviet Psychology* ed by Neil O'Connor and *Soviet Psychology A Symposium* ed by Ralf Winn Raymond Bauer has also edited an interesting symposium entitled *Some Views on Soviet Psychology* Only two systematic studies of Soviet psychology have been published to date Joseph Wortis *Soviet Psychiatry* and Raymond Bauer's *The New Man in Soviet Psychology* Both are valuable introductions to Soviet psychology Bauer's book in particular gives a good account of the debates on psychological theory in the Soviet Union in the nineteen twenties and thirties Both however are somewhat out of date There are also a number of interesting articles written by Ivan D London and Gregory Razran which give general surveys of particular periods or aspects of Soviet psychology These have been listed in the bibliography *Psychology in the Soviet Union* Brian Simon, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informal company *The Art of Piano Playing* George Kochevitsky, 1995-11-16 So many of the great pianists and teachers have come out of Poland and Russia

elaborate devices to avoid and exploit this control system than any advocate of academic freedom could have reasonably hoped Nikolai Krementsov argues that the model of Stalinist science already taking hold during the thirties was reversed by the need for inter Allied cooperation during World War II Science as a tool for winning the war and as a diplomatic and propaganda instrument began to enjoy higher status better funding and relative autonomy Even the reinstated Science Department within the Central Committee was staffed by a leading geneticist and others sympathetic to conventional science However the onset of the Cold War led to a campaign for eliminating such servility to the West Then the Western links that had benefited genetics and other sciences during the war and through 1946 became a liability and were used by Lysenko and others to turn back to the repressive past and to delegitimize whole research directions **Advanced Educational**
