Traulsen,1993-10-14 How well does technology assessment TA relate to women s lives If women are underrepresented in the long term research and development process that leads to scientific advancements how can TA understand technology aimed at women It can t claims the author of *Technology Assessment A Feminist Perspective* A relative new field TA examines the social aspect of technology and provides information critical to decision making policy development safety standards and avoiding litigation Until gender analysis is introduced into all assessments of new technologies Janine Marie Morgall argues

TA can't evaluate technology's impact upon women Morgall investigates two areas of technology that affect women's lives: productive clerical work and reproductive health care. Case studies of clerical workers and health care recipients illustrate gender-specific effects of technology ranging from word processors to treatments for infertility. These studies convincingly demonstrate that TA encourages innovations without questioning their effects on women. Issues of dominance, control, and conflicting values emerge from Morgall's feminist perspective and support her call for gender analysis of new technologies. In the series *Labor and Social Change* edited by Paula Rayman and Carmen Sirianni, Widows: The Middle East, Asia, and the Pacific Helena Znaniecka Lopata, 1987. What happens when the husband dies depends on the society, on the location of the widow in urban, rural, or class terms, and on the widow's own personal resources. In some societies the woman is totally dependent upon a grown son and cannot remarry; in others, such as that in the United States, she is more dependent upon her own resources and wishes. For some, widowhood results in a great loss of status; for others, it can mean loneliness and social isolation. Yet widowhood can mean greater social freedom for some women, a blooming of personality. Even grief is experienced in various ways and degrees. Thus, there is no such thing as a widow type; only a great heterogeneity in widowhood. As in *Wifedom*, Volume I analyzes the support systems and life styles of widows in Australia, the Philippines, Korea, Iran, China, a Pacific island, India, Turkey, and Israel. Volume II, *North America*, examines two communities in Canada, a Florida retirement community, and communities in several other locations, as well as the relative situations of homeowners, blacks, and poor ethnic populations.
