Scientist Of The Empire Sir Roderick Murchison Scientific Exploration And Victorian Imperialism:

Scientist of Empire Robert A. Stafford, 2002-07-18 Sir Roderick Murchison 1792 1871 was a giant of the imperial age His career was tied intimately to the expansion of the political economic and scientific realm of the British Empire A founding father of geological science and geographical exploration he was both President of the Royal Geographical Society and Director General of the Geological Survey His identification of the Silurian system in geology and subsequent prediction of the location of economic riches are as notable as his patronage of David Livingstone and other figures of Victorian exploration More than any contemporary Murchison emerged as the eminent Victorian who sold science to the imperial government on the grounds of utility as much as prestige Robert Stafford uses this study of a man's life and work to investigate the bargain struck between science and the forces of imperialism in mid Victorian Britain This illuminates the broader and still present intimacy between science and government

Biographies of Scientists for Sci-Tech Libraries Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments

The Oxford Illustrated History of Science Iwan Rhys Morus, 2017 The Oxford Illustrated History of Science offers readers an accessible and entertaining introduction to the history of science as well as a valuable and authoritative reference work

The Arctic in the British imagination 1818-1914 Rob David, 2017-03-01 The Arctic region has been the subject of much popular writing This book considers nineteenth century representations of the Arctic and draws upon an extensive range of evidence that will allow the widest connections to emerge from a cross disciplinary analysis using different methodologies and subject matter It positions the Arctic alongside more thoroughly investigated theatres of Victorian enterprise In the nineteenth century most images were in the form of paintings travel narratives lectures given by the explorers themselves and photographs The book explores key themes in Arctic images which impacted on subsequent representations through text painting and photography For much of the nineteenth century national and regional geographical societies promoted exploration and rewarded heroic endeavor The book discusses images of the Arctic which originated in the activities of the geographical societies The Times provided very low key reporting of Arctic expeditions as evidenced by its coverage of the missions of Sir John Franklin and James Clark Ross However the illustrated weekly became one of the main sources of popular representations of the Arctic The book looks at the exhibitions of Arctic peoples Arctic

exploration and Arctic fauna in Britain Late nineteenth century exhibitions which featured the Arctic were essentially nostalgic in tone The Golliwogg s Polar Adventures published in 1900 drew on adult representations of the Arctic and will have confirmed and reinforced children s perceptions of the region Text books board games and novels helped to keep the subject alive among the young *The Spiritual in the Secular* Patrick Harries, David Maxwell, 2012-07-20 David Livingstone s visit to Cambridge in 1857 was seen as much as a scientific event as a religious one But he was by no means alone among missionaries in integrating mission with science and other fields of research Rather many missionaries were remarkable pioneering polymaths This collection of essays explores the ways in which late nineteenth and twentieth century missionaries to Africa contributed to various academic disciplines such as linguistics ethnography social anthropology zoology medicine and many more This volume includes an introductory chapter by the editors and eleven chapters that analyze missionary research and its impact on knowledge about African contexts Several themes emerge including many missionaries positive views of indigenous discourses and the complicated relationship between missionaries and professional anthropologists Contributors John Cinnamon Erika Eichholzer Natasha Erlank Deborah Gaitskell Patrick Harries Walima T Kalusa John Manton David Maxwell John Stuart Dmitri van den Bersselaar Honor Vinck **Kipling's Art of Fiction 1884-1901** David Sergeant, 2013-10 David Sergeant grew up in west Cornwall and studied English at Oxford where he is now a Junior Research Fellow He is a published poet and has also written on Robert Burns and Ted Hughes **The Last Great Quest** Max Jones, 2004-11-11 The story of Captain Scott s last Antarctic expedition is one of the greatest adventure stories ever told Captain Robert Falcon Scott Lieutenant Henry Bowers Petty Officer Edgar Evans Captain Lawrence Oates and Dr Edward Wilson all died on the return trek from the South Pole starved and frozen only eleven miles from a supply camp In November 1912 a rescue party discovered their last letters and diaries which told a story of bravery hardship and self sacrifice that shocked the world Recent decades have seen controversy rage over whether Scott was the last of a line of great Victorian explorers intent on discovering uncharted lands or a hopeless incompetent driven by personal ambition Rejecting the stereotypes Max Jones reveals a complex figure a product of the passions and preoccupations of an imperial age He also shows how heroes are made and manipulated through a close examination of the unprecedented outpouring of public grief at the news of the death of Scott **Maritime Empires** National Maritime Museum (Great Britain), 2004 Britain s overseas Empire pre eminently involved the sea In a two way process ships carried travellers and explorers trade goods migrants to new lands soldiers to fight wars and garrison colonies and also ideas and plants that would find fertile minds and soils in other lands These essays deriving from a National Maritime Museum London conference provide a wide ranging and comprehensive picture of the activities of maritime empire They discuss a variety of issues maritime trades among them the trans Atlantic slave trade Honduran mahogany for shipping to Britain the movement of horses across the vast reaches of Asia and the Indian Ocean the impact of new technologies as Empire expanded in the nineteenth century the sailors who manned

The Explorer's Roadmap to National-Socialism Sarah K. Danielsson,2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians Whilst this influence was to become most visible within Hitler s Germany the debates were not by any means restricted to or even originated in Germany Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British French and Russian geographic societies and institutions Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin s close involvement with the Nazi elite as a culmination of decades of political and scientific work In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide

The Inglorious Arts of Peace Elsbeth Heaman,1999-01-01 Heaman examines the ways in which British North America was

advertised at home and abroad in the pursuit of productivity markets capital and immigrants and evaluates the exhibitions impact on private industry the government and Canadian identity She also considers the participation of women and native peoples at local and international exhibits showing how they transcended the limited spheres of representation imposed upon them *A Global History of Gold Rushes* Benjamin Mountford, Stephen Tuffnell, 2018-10-16 Nothing set the world in motion like gold Between the discovery of California placer gold in 1848 and the rush to Alaska fifty years later the search for the precious yellow metal accelerated worldwide circulations of people goods capital and technologies *A Global History of Gold Rushes* brings together historians of the United States Africa Australasia and the Pacific World to tell the rich story of these nineteenth century gold rushes from a global perspective Gold was central to the growth of capitalism it whetted the appetites of empire builders mobilized the integration of global markets and economies profoundly affected the environment and transformed large scale migration patterns Together these essays tell the story of fifty years that changed the world

Learning to Divide the World John Willinsky, 1998 The barbarian rules by force the cultivated conqueror teaches This maxim from the age of empire hints at the usually hidden connections between education and conquest In *Learning to Divide the World* John Willinsky brings these correlations to light offering a balanced humane and beautifully written account of the ways that imperialism s educational legacy continues to separate us into black and white east and west primitive and civilized

The Cambridge Companion to John Herschel Stephen Case, Lukas M. Verburgt, 2024-05-09 The first ever comprehensive account of John Herschel s life work and legacy shedding new light on the history of Victorian science **A Walk across Africa** Roy Bridges, 2018-02-15 The Nile Expedition of 1860 1863 was one of the most important exploratory expeditions made in the nineteenth century The long debated question of the location of the source of the Nile was answered despite continuing arguments and the venture had important historical consequences Earlier accounts of the expedition have assumed James Augustus Grant to have been no more than the loyal second in command to John Hanning Speke the leader This new edition of Grant s 1864 book *A Walk across Africa* provides the opportunity to re examine his role The original text has been fully annotated with explanatory notes and also supplemented by extracts from the very remarkable detailed day to day journal which Grant kept Even more unusually this edition includes reproductions of the whole visual record which he made consisting of 147 watercolours and sketches This was the first ever visual record of large parts of East Africa and the Upper Nile Valley region These documentary and illustrative materials have been drawn from the extensive collection of Grant s papers now in the care of the National Library of Scotland The Library has co operated in the preparation of this volume to make possible its special features Grant emerges as a much more impressive and important figure than has previously been recognised He was a trained scientist and his narrative is a well organised perspective on the expedition and its activities His own growing understanding of Africa and of Africans becomes apparent and helps to explain his later activities The editor provides a context to the expedition and its results and this includes a new approach to the

understanding of the Nile source problem by exposing the credulity of the way many previous commentators have used Ptolemy's information and also by suggesting that the problem should be approached in the light of geological and geomorphological as well as historical information. The Introduction in addition discusses Grant's work in the light of the development of the academic understanding of the history of Africa and of European involvement in the region.
