The Disparity of European Integration Borzel Tanja, 2013-10-31 This new study revisits the work of the late Ernst Haas assessing his relevance for contemporary European integration and its disparities With his seminal book The Uniting of Europe Haas laid the

foundations for one of the most prominent paradigms of European integration neofunctionalism He engaged in inductive reasoning to theorize the dynamics of the European integration process that led from the Treaty of Paris in 1951 to the Treaty of Rome in 1957 The Treaty of Rome set the constitutional framework for a Common Market Today a second Treaty of Rome may lay the foundation for a European Constitution that embeds the Common Market in a European polity Unfortunately Haas will not be able to witness this path breaking step in the development of a European political community which he so aptly theorized almost five decades ago This is all the more regrettable since students of European integration are more than ever challenged to tackle a major empirical puzzle After 50 years of European integration the member states managed to adopt a single currency and to develop common policies and institutions on justice and home affairs The integration of foreign policy and defence by contrast is still lagging behind This text delivers sharp insights into these issues This book previously published as a special issue of the Journal of European Public Policy will be of great interest to all students and scholars of international relations the European Union European politics and Public Policy New Approaches to EU Foreign Policy Maciej Wilga,Ireneusz Pawel Karolewski,2014-06-05 EU foreign policy once existed in the form of the European Political Cooperation with only a limited political leverage and symbolic institutional underpinnings In recent years rapid changes have occurred including an expanding institutional apparatus increased responsibility and growing demand for action This book examines new approaches to the EU s foreign policy that address its rapidly changing character presenting the newest theoretical perspectives and dealing with novel empirical developments Rather than simply considering structural variations and changes in the agency of the EU it explores the new complexity in EU foreign policy The authors offer new theoretical perspectives and new empirical studies dealing among others with issues such as Power delegation to the Commission EU diplomacy Parliamentarisation and constitutionalisation Committees involvement in foreign policy process This book will be of interest to students and scholars of European politics European foreign policy and European integration

pioneer projects in such areas as a technological services delivery system for small industries a local technology system for rural areas a fund syndicating technology delivery system for later enterprises and investors linkages to improved productivity in under utilized capacity and identifications of needs in the least developed countries Transboundary Environmental Negotiation Lawrence Susskind, William Moomaw, Kevin Gallagher, 2002-10-08 Transboundary Environmental Negotiation is an important collection of articles generated by faculty and graduate students at MIT the Fletcher School of Law and Diplomacy at Tufts University and the Program on Negotiation at Harvard Law School The contributors emphasize the ways in which global environmental treaty making can be improved They highlight new environmental problems that pose difficult global negotiation challenges and suggest new strategies for involving a range of nongovernmental actors in ways that can overcome the obstacles to transboundary environmentalism *Between Dependency and Autonomy* Joseph M. Grieco, 2023-11-15 Between Dependency and Autonomy offers a compelling exploration of India s evolving relationship with the international computer industry between 1960 and 1980 showcasing a significant shift in power dynamics Joseph M Grieco presents a thorough analysis of how India increased its capacity to manage and negotiate with high tech multinational corporations challenging the long standing imbalance between developing countries and advanced capitalist enterprises Grieco s study not only documents this shift in power but also provides a critical evaluation of two competing schools of thought One perspective argues that developing countries can significantly improve their bargaining power with multinationals while the other suggests that these nations remain perpetually disadvantaged Using India s experience with computer firms as a pivotal case Between Dependency and Autonomy offers valuable insights into how developing nations can assert greater control in their interactions with global industries This groundbreaking work is essential reading for scholars policymakers and professionals interested in international relations economic development and the global technology landscape It highlights India s success in reshaping its relationship with multinational firms offering a blueprint for other developing countries seeking to enhance their autonomy in the international economic system This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984 *Bulletin of the Atomic Scientists* , 1978-08-31
