Scientists At Work The Creative Process Of Scientific Research:

Creativity, Psychology and the History of Science H.E. Gruber, Katja Bödeker, 2005-12-28 Creativity Psychology and the History of Science offers for the first time a comprehensive overview of the oeuvre of Howard E Gruber who is noted for his contributions both to the psychology of creativity and to the history of science The present book includes papers from a wide range of topics In the contributions to creativity research Gruber proposes his key ideas for studying creative work Gruber focuses on how the thinking motivation and affect of extraordinarily creative individuals evolve and how they interact over long periods of time Gruber s approach bridges many disciplines and subdisciplines in psychology and beyond several of which are represented in the present volume cognitive psychology developmental psychology history of science aesthetics and politics The volume thus presents a unique and comprehensive contribution to our understanding of the creative process Many of Gruber s papers have not previously been easily accessible they are presented here in thoroughly revised form

Practicing Art/Science Philippe Sormani, Guelfo Carbone, Priska Gisler, 2018-07-11 Over the last two decades multiple initiatives of transdisciplinary collaboration across art science and technology have seen the light of day Why by whom and under what circumstances are such initiatives promoted What does their experimental character look like and what can be learned epistemologically and institutionally from probing the multiple practices of art science at work In answer to the questions raised Practicing Art Science contrasts topical positions and insightful case studies ranging from the detailed investigation of art at the nanoscale to the material analysis of Leonardo s Mona Lisa and its cracked smile In so doing this volume brings to bear the practice turn in science and technology studies on the empirical investigation of multifaceted experimentation across contemporary art science and technology in situ Against the background of current discourse on artistic research the introduction not only explains the particular relevance of the practice turn in STS to tackle the interdisciplinary task at hand but offers also a timely survey of varying strands of artistic experimentation In bringing together ground breaking studies from internationally renowned scholars and upcoming researchers in sociology art theory and artistic practice as well as history and philosophy of science Practicing Art Science will be essential reading for practitioners and professionals in said fields as well as postgraduate students and representatives of higher education and research policy more broadly

Creative Model Construction in Scientists and Students John Clement, 2008-06-10 How do scientists use analogies and other processes to break away from old theories and generate new ones This book documents such methods through the analysis of video tapes of scientifically trained experts thinking aloud while working on unfamiliar problems Some aspects of creative scientific thinking are difficult to explain such as the power of analogies the use of physical intuition and the enigmatic ability to learn from thought experiments The book examines the hypothesis that these processes are based on imagistic mental simulation as an underlying mechanism This allows the analysis of insight Aha episodes of creative theory formation Advanced processes examined include specialized conserving transformations

Gedanken experiments and adjusted levels of divergence in thinking Student interviews are used to show that students have natural abilities for many of these basic reasoning and model construction processes and that this has important implications for expanding instructional theories of conceptual change and inquiry I regard this work as the most comprehensive account ever attempted to show how imagistic analogic and sensory motor representations participate in creative thinking Professor Ryan Tweney

Design Science Research Aline Dresch, Daniel Pacheco Lacerda, José Antônio Valle Antunes Jr, 2014-08-19 Consolidating existing knowledge in Design Science this book proposes a new research method to aid the exploration of design and problem solving within business science and technology It seeks to overcome a dichotomy that exists in the field between theory and practice to enable researches to find solutions to problems rather than focusing on the explanation and exploration of the problems themselves Currently researches concentrate on to describing exploring explaining and predicting phenomena and little attention is devoted to prescribing solutions Herbert Simon proposes the need to develop a Science of the Artificial Design Science arguing that our reality is much more artificial than natural However the research conducted on the Design Science premises has so far been scattered and erratic in different fields of research such as management systems information and engineering This book aims to address this issue by bringing these fields together and emphasising the need for solutions This book provides a valuable resource to students and researchers of research methods information systems management and management science and production and operations management

Science as a Career Choice Bernice T. Ediuson, Linda Beckman, 1973-09-28 How can we identify the young men and women who as social and behavioral scientists of tomorrow will do the needed research to resolve our burgeoning social problems How can the most promising be attracted to an investigatory career How can they become identified with the behaviors attitudes and values that persons in science share A provocative body of literature about the psychology of the scientist and his career emerged in the post Sputnik era Drs Ediuson and Beckman bring together more than seventy of the most significant and representative studies These range over childhood and family influences academic experiences motivations interests and intellectual and personality strengths that have been examined as precursors for choosing science as adult work The psychological mechanisms involved in socializing a young person toward a scientific career are suggested in readings from the outstanding theoreticians in the field Selections on scientific career lines decisions and options at various stages of work and factors influencing goals and career development contribute to the understanding of the psychological life of the highly endowed and well functioning professional adult Through showing the certain completeness of effort of what has been learned about the psychology of scientists to date the authors anticipate a resurgence of interest in the creative individual a renewed enthusiasm for application and a refocusing of research on the issues unique to the social and behavioral research scientist

Science and Synthesis, 2012-12-06 This volume is a collection of the lectures and discussions at an international colloquium organized by Unesco on the theme of Science and Synthesis to mark the occasion of the 10th anniversary of the death of both Einstein and Teilhard de Chardin also the 50th anniversary of the theory of general relativity Despite the great gulf which lies between the work of Einstein and Teilhard de Chardin the coincidence in the dates provided an opportunity to examine the urge towards a synthesis of the scientific and philosophical approaches which lies at the very heart of the work of these two great men It was indeed their common desire for an all embracing concept of the universe which led them both to try to construct a cosmology for the modern world So it seemed that the best way of honoring Einstein and Teilhard de Chardin was to arrange a free discussion of the current likelihood of effecting a synthesis of scientific knowledge which would bring together some of today's most eminent scholars inspired by the wish to make their research more meaningful by philosophic

reflection The resulting give and take of ideas would go far beyond mere commemoration it would bring their ideas to life by setting them against the present state of science
