**Early Medieval Studies in Memory of Patrick Wormald** Stephen Baxter, Catherine Karkov, Janet L. Nelson, David Pelteret, 2017-05-15 Patrick Wormald was a brilliant interpreter of the Early Middle Ages whose teaching writings and generous friendship inspired a generation of historians and students of politics law language literature and religion to focus their attention upon the world of the Anglo Saxons and the Franks Leading British American and continental scholars his colleagues friends and pupils here bear witness to his seminal influence by presenting a collection of studies devoted to the key themes that dominated his work kingship law and society ethnic religious national and linguistic identities the power of images pictorial or poetic in shaping political and religious institutions Closely mirroring the interests of their honoree the collection not only underlines Patrick Wormald's enormous contribution to the field of Anglo Saxon studies but graphically demonstrates his belief that early medieval England and Anglo Saxon law could only be understood against a background of research into contemporary developments in the nearby Welsh Scottish Irish and Frankish kingdoms He would have been well pleased therefore that this volume should make such significant advances in our understanding of the world of Bede of the dynasty of King Alfred and also of the workings of English law between the seventh and the twelfth century Moreover he would have been particularly delighted at the rich comparisons and contrasts with Celtic societies offered here and with the series of fundamental reassessments of aspects of Carolingian Francia Above all these studies present fundamental reinterpretations not only of published written sources and their underlying manuscript evidence but also of the development of some of the dominant ideas of that era In both their scope and the quality of the scholarship the collection stands as a fitting tribute to the work and life of Patrick Wormald and

his lasting contribution to early medieval studies      The Archaeology of the Early Medieval Celtic Churches: No. 29 Nancy Edwards, 2017-10-23 This volume focuses on new research on the archaeology of the early medieval Celtic churches c AD 400-1100 in Wales Ireland Scotland south west Britain and Brittany The 21 papers use a variety of approaches to explore and analyse the archaeological evidence for the origins and development of the Church in these areas The results of a recent multi disciplinary research project to identify the archaeology of the early medieval church in different regions of Wales are considered alongside other new research and the discoveries made in excavations in both Wales and beyond The papers reveal not only aspects of the archaeology of ecclesiastical landscapes with their monasteries churches and cemeteries but also special graves relics craftworking and the economy enabling both comparisons and contrasts They likewise engage with ongoing debates concerning interpretation historiography and the concept of the Celtic Church conversion to Christianity Christianization of the landscape and the changing functions and inter relationships of sites the development of saints cults sacred space and pilgrimage landscapes and the origins of the monastic town      *The Chapel and Burial Ground on St Ninian's Isle, Shetland: Excavations Past and Present: v. 32* Rachel C. Barrowman, 2017-12-02 This volume is the definitive account of the excavation which led to the discovery of the magnificent hoard of 28 pieces of Pictish silverware on St Ninian's Isle Shetland in 1958 It includes a reassessment of the original archives and finds including an ogham stone found on the site in 1876 and a fantastic collection of glass beads as well as several new small scale excavations on the site of the chapel and its burial ground Taken together this work reveals a long sequence of settlement beginning in the Iron Age The first church was built on the site in the 8th century and accompanied by a long cist cemetery with cross incised stones and shrine sculpture The church may have continued in use into the 9th or 10th centuries and the recent work has confirmed that the famous hoard was buried into its floor There was a degree of continuity between the pre Christian and Christian burials with evidence that the site was a special place for burial before the advent of Christianity The report describes these burials in detail ending the story sometime between the 11th and end of the 12th centuries when an adult male who had died a violent death was moved to be buried on the site Thereafter the site was inundated with wind blown sand A new chapel with an accompanying long cist cemetery was then built above the earlier church and a chancel was added later The associated graveyard continued in use until around 1840 long after the building was demolished      *Early Medieval Settlement in Upland Perthshire: Excavations at Lair, Glen Shee* 2012-17 David Strachan, David Sneddon, Richard Tipping, 2019-10-31 Excavation of seven turf buildings at Lair in Glen Shee confirms the introduction of Pitcarmick buildings to the hills of north east Perth and Kinross in the early 7th century AD Clusters of these at Lair and elsewhere in the hills are interpreted as integrated spatially organised farm complexes comprising byre houses and outbuildings      **The Iron Age Round-House** D. W. Harding, 2009-11-19 A fully illustrated study of Iron Age round houses which explores not just their architectural aspects but more importantly their role in the social economic and ritual structure of their communities and their significance as

symbols of Iron Age society in the face of Romanization      **Anglo-Saxon England: Volume 26** Michael Lapidge, Malcolm Godden, Simon Keynes, 1998-06-04 In the present volume the two essays that frame the book provide exciting insight into the mental world of the Anglo Saxons by showing on the one hand how they understood the processes of reading and assimilating knowledge and on the other how they conceived of time and the passage of the seasons In the field of art history two essays treat two of the best known Anglo Saxon manuscripts The lavish symbol pages in the Book of Durrow are shown to reflect a programmatic exposition of the meaning of Easter and a posthumous essay by a distinguished art historian shows how the Anglo Saxon illustrations added to the Galba Psalter are best to be understood in the context of the programme of learning instituted by King Alfred The usual comprehensive bibliography of the previous year's publications in all branches of Anglo Saxon studies rounds off the book      Corpus of Anglo-Saxon Stone Sculpture in England Rosemary Cramp, 1984 This analytical catalogue of sculpture from the historic counties of Devon Dorset Somerset and Wiltshire provides a new perspective on the artistic achievement of the late Saxon kingdom The volume includes individual pieces of the highest quality such as the Bradford on Avon and Winterbourne Steepleton angels or the newly discovered figures from Congresbury Most of the monuments were carved at a time when Wessex art was at its zenith in the tenth and eleventh centuries a formative period for English cultural identity This volume sets the sculpture within an historical topographical and art historical context highlighting the close links with contemporary styles in manuscripts and metalwork Full photographic records of each monument present many new illustrations unique to this volume An indispensable research tool for all those interested in the early medieval world this volume is also an authoritative aid for local historians      **The Battles of King Arthur** Tony Sullivan, 2022-07-20 The ninth century Historia Brittonum is the first source that mentions Arthur and lists twelve battles including the famous Badon Hill Much ink has been spilt debating the identity and location of Arthur This book will demonstrate that some of the battles can indeed be located with some confidence Rather than fit a specific theory as to his identity the battles are placed in the fragmenting provincial political and military context of the late fifth and early sixth century Britain At a time of rapid changes in cultural identity and a significant increase in Germanic material culture and migration These battles might be expected to be found along borders and in zones of potential conflict Yet this is not what is discovered In addition the simplistic idea of Romano Britons holding back invading Anglo Saxons is found wanting Instead we discover a far more nuanced political and cultural situation One with increasing evidence of continuation of land use and the indigenous population The most Romanised and urbanised regions of the south and east are the very areas that experienced the arrival of Germanic settlement The conclusion gives the reader a new insight into what sort of man Arthur was and the nature of the battles he fought      **A Norse Settlement in the Outer Hebrides** Niall Sharples, 2019-12-19 The settlement at Bornais in the Western Isles of Scotland is one of the largest rural settlements known from the Norse period in Britain It spans the period from the fifth to the fifteenth century AD when the Atlantic seaboard was subject to drastic changes The

islands were systematically ravaged by Viking raiders and then colonised by Norse settlers. In the following centuries the islanders were central to the emergence of the Kingdom of Man and the Isles played a crucial role in the development of the Lordship of the Isles and were finally assimilated into the Kingdom of Scotland. This volume explores the stratigraphic sequence uncovered by the excavation of Bornais mounds 2 and 2A. The excavation of mound 2 revealed a sequence of high status buildings that span the Norse occupation of the settlement. One of these houses constructed at the end of the eleventh century AD was a well preserved bow walled longhouse and the careful excavation and detailed recording of the floor layers has revealed a wealth of finds that provides invaluable insight into the activities taking place in this building. The final house in this sequence is very different in form and use and clearly indicates the increasing Scottish influence on the region at the beginning of the thirteenth century. The excavation of mound 2A provides an insight into the less prestigious areas of the settlement and contributes a significant amount of evidence on the settlement economy. The area was initially cultivated before it became a settlement local and throughout its life a focus on agricultural activities such as grain drying and processing appears to have been important. In the thirteenth century the mound was occupied by a craftsman who produced composite combs gaming pieces and simple tools. The evidence presented in this volume makes a major contribution to the understanding of Norse Scotland and the colonisation of the North Atlantic in a period of dramatic transformations.

*Celtic-Norse Relationships in the Irish Sea in the Middle Ages 800-1200*, 2013-11-29 This volume contains the proceedings of a conference held in Oslo in late 2005 which brought together scholars working in a wide variety of disciplines from Scandinavia Great Britain and Ireland. The papers here began as those read at the conference augmented by two written immediately after by attendees but have been updated in light of the discussions in Oslo and more recent scholarship. They offer historical archaeological art historical religious historical and philological views of the interaction and interdependence of Celtic and Norse populations in the Irish Sea region in the period 800 A D 1200 A D. Contributors are Ian Beuermann Barbara Crawford Claire Downham Fiona Edmonds Colm n Etchingham Zanette T Gl rstad John Hines Alan Lane Julie Lund Jan Erik Rekdal and David Wyatt.

**Scotland in Dark Age Britain** B. E. Crawford, 1996      **Christians and Pagans** Malcolm D. Lambert, 2010-06-29 *Christians and Pagans* offers a comprehensive and highly readable account of the coming of Christianity to Britain its coexistence or conflict with paganism and its impact on the lives of both indigenous islanders and invading Anglo Saxons. The Christianity of Roman Britain so often treated in isolation is here deftly integrated with the history of the British churches of the Celtic world and with the histories of Ireland Iona and Pictland. Combining chronicle and literary evidence with the fruits of the latest archaeological research Malcolm Lambert illuminates how the conversion process changed the hearts and minds of early Britain.      Mercia Michelle P. Brown, Carol A. Farr, 2005-03-01 The kingdom best remembered for Offa and his famous dyke was not only a dominant power on the island of Britain in the eighth century but also a significant player in early medieval European politics and culture. Although the volume focuses on

the eighth and ninth centuries when Mercian power was at its height it also looks back to the origins of the kingdom and forward to the period of Viking settlement and West Saxon reconquest With state of the art contributions from experts in palaeography art history archaeology numismatics and landscape as well as from historians this book establishes a new baseline for Mercian scholarship by covering the rise and fall of the kingdom its major institutions relations with other political entities as well as its visual and material culture     *A Crannog of the First Millennium, AD* Anne Crone,Ewan Campbell,2005 The early medieval crannog in Loch Glashan was excavated in 1960 by Jack Scott in advance of dam construction The crannog produced a rich organic assemblage of wood and leather objects as well as exotic items such as continental imported pottery and a brooch studded with amber This title examines all the evidence from the crannog     *A Confusion of Tongues* Charles W. A. Prior,2012-02-02 A study of the political and religious ideas that contributed to the collapse of the authority of Charles I in 1642 Aids the historical understanding of the causes and nature of the English civil war and challenges two of the dominant interpretations of the conflict     *Alfred's Wars* Ryan Lavelle,2012 Although this book provides a selection from sources and interpretations of warfare in Viking Age England and presents a consideration of them it is more than a purely historiographical study It investigates the current state of scholarship and the key points of its development indicating areas for enquiry and point out some less familiar sources along the way The intention is not to deal with the canon of historical works on the Anglo Saxon army for remarkably there is no canon as such Much though by no means all scholarship on the organization of military systems in the Anglo Saxon state has been undertaken by historians and scholars from related disciplines for whom warfare is not a primary concern Many of the sources used will be familiar to students of early medieval England but others are included because they are less often considered I have not attempted to use a chronological structure nor have I retold any particular narrative history of the English Kingdom during the Viking Age although for the reader s convenience a chronology of events is included as an appendix The focus is rather the exploration of the practice and politics of warfare Preface
