Scott Of The Antarctic:

Scott of the Antarctic Elspeth Joscelyn Grant Huxley, 1990-01-01 After Robert Peary claimed to have reached the North Pole in 1909 polar explorers looked toward the South Robert Falcon Scott whose 1901-1904 expedition into Antarctica's frozen shoulder had made him a celebrity in England began plans to return In June 1910 the Terra Nova sailed toward the earth's underbelly When Scott's party reached the South Pole on January 17, 1912 after severe hardships they discovered that the Norwegian explorer Roald Amundsen had beat them to it a month before Demoralized, frozen, exhausted, and starved they started to retrace their painful steps over the ice but were forced to stop only eleven miles from a supply depot By a supreme act of will the captain managed to write his last letters which were found with the bodies in November Elspeth Huxley draws on those letters and diaries in her luminous biography It reaches back to Scott's first voyage to the Antarctic introduces the charming sculptor he married in middle age after a whirlwind of self-doubt and builds up to the last expedition a marvel of teamwork that will always be remembered for the nobility shown by men facing death The story of Robert Falcon Scott is all the more interesting because he was a complex self-questioning man whose conquest of the self was a feat perhaps more admirable than the conquest of the Pole

The Lost Photographs of Captain Scott Dr. David M. Wilson, 2012-01-16 The myth of Scott of the Antarctic Captain Robert Falcon Scott icon of fortitude and courage who perished with his fellow explorers on their return from the South Pole on March 29th, 1912 is an enduring one elevated, dismantled, and restored during the turbulence of the succeeding century Until now the legend of the doomed Terra Nova expedition has been constructed out of Scott's own diaries and those of his companions the sketches of Uncle Bill Wilson and the celebrated photographs of Herbert Ponting Yet for the final fateful months of their journey the systematic imaging of this extraordinary scientific endeavor was left to Scott himself trained by Ponting In the face of extreme climactic conditions and technical challenges at the dawn of photography Scott achieved an iconic series of images breathtaking polar panoramas, geographical and geological formations and action photographs of the explorers and their animals remarkable for their
