An Archaeology of Sympathy James Chandler, 2024-05-31

In the middle of the eighteenth century something new made itself felt in European culture: a tone or style that came to be called the sentimental. The sentimental mode went on to shape not just literature, art, music and cinema, but people's very structures of feeling, their ways of doing and being. In what is sure to become a critical classic, *An Archaeology of Sympathy* challenges Sergei Eisenstein's influential account of Dickens and early American film by tracing the unexpected history and intricate strategies of the sentimental mode and showing how it has been reimagined over the past three centuries. James Chandler begins with a look at Frank Capra and the Capraesque in American public life, then digs back to the eighteenth century to examine the sentimental substratum underlying Dickens and early cinema alike. With this surprising move, he reveals how literary spectatorship in the eighteenth century anticipated classic Hollywood films such as Capra's *It Happened One Night*, *Mr Deeds Goes to Town* and *It's a Wonderful Life*. Chandler then moves forward to romanticism and modernism, two cultural movements often seen as defined by their rejection of the sentimental, examining how authors like Mary Shelley, Joseph Conrad, James Joyce and Virginia Woolf actually engaged with sentimental forms and themes in ways that left a mark on their work. Reaching from Laurence Sterne to the Coen brothers, *An Archaeology of Sympathy* casts new light on the long eighteenth century and the novelistic forebears of cinema and our modern world.

National Medievalism in the Twenty-first Century Matthias D. Berger, 2023

How ideas and ideals of an imagined protean national Middle Ages have once again become a convergence point for anxieties about politics, history and cultural identity in our time, and why. After a period of abeyance, the link forged in the nineteenth century between the Middle Ages and national identity is increasingly being reclaimed, with numerous groups and individuals mining an imagined medieval past to present ideas and ideals of modern nationhood. Today's national medievalism asserts itself at the interface of culture and politics in literature and television programming, in journalism and heritage tourism, and in the way political actors of various stripes use a deep past that supposedly proves the nation's steady exceptionalism in a hectic globalised world. This book traces these ongoing developments in Switzerland and Britain, two countries where the medieval past has recently been much invoked in negotiations of national identity, independence and Euroscepticism. Through comparative analysis, it explores examples of reemerging stories of national exceptionalism, stories that ironically echo those of other nations. The author analyses depictions of Robert the Bruce and Wilhelm Tell, medievalism in the discourse surrounding Brexit, as well as at the Welsh Senedd, novels like Paul Kingsnorth's *The Wake*, community-based art such as the Great Tapestry of Scotland, and elaborate public commemorations of Swiss victories and defeats in battle.

Basing his critical readings in current theories of cultural memory heritage and nationalism the author explores how the protean national Middle Ages have once again become a convergence point for anxieties about politics history and cultural identity in our time and why
