**The Fantastic of the Fin de Siècle** Zdeněk

Beran, Irena Grubica, 2016-09-23 This volume explores various facets of the relationship between the fantastic and the fin de siècle. The essays included here examine how the fin de siècle reflects the fantastic and its relation to the genesis of aesthetic ideas to the concepts of terror and horror the sublime and evil to Gothic and sensation fiction to the Aesthetic Movement and Decadence. They also raise the question regarding the ways in which fantastic literature reflects the dynamic and all too often controversial development of the concept of the fantastic. At the same time the majority of the contributions also investigate a broader context of specific social political and economic conditions that frame the fantastic of the fin de siècle. They examine how fantastic genres use narrative manipulations and how they incorporate various ideas of scientific development and progress by highlighting the role of religion cultural anxiety and social crisis as well as exploring the ways such genres use the fantastic for various purposes of cultural and social subversion. Fin de siècle fantastic literature is also investigated across a variety of cultures as reflected in Scottish Canadian Australian American and British writing with particular emphasis on their predominant cultural or generic aspects the genesis of the fin de siècle fantastic in some of these cultures and literatures and their relations to a wider historical and cultural framework. The essays as a whole represent the work of scholars working in a diverse range of fields and therefore adopt a wide range of approaches to the fantastic. As such this volume provides a fresh and stimulating platform for further rethinking of the concept of the fantastic and its relation to fin de siècle literature and its theoretical philosophical generic and other implications within a broader literary social and cultural context. , 19?? **Marketing Modernism in Fin-de-Siècle Europe** Robert Jensen, 2022-02-08 In this fundamental rethinking of the rise of modernism from its beginnings in the Impressionist movement Robert Jensen reveals that market discourses were pervasive in the ideological defense of modernism from its very inception and that the avant garde actually thrived on the commercial appeal of anti commercialism at the turn of the century. The commercial success of modernism he argues depended greatly on possession of historical legitimacy. The very development of modern art was inseparable from the commercialism many of its proponents sought to transcend. Here Jensen explores the economic aesthetic institutional and ideological factors that led to its dominance in the international art world by the early 1900s. He emphasizes the role of the emerging dealer gallery market and of modernist art historiographies in evaluating modern art and legitimizing it through the formation of a canon of modernist masters. In describing the canon building of modern dealerships Jensen considers the new ideological dealer and explores the commercial construction of artistic identity through such rhetorical concepts as temperament and independent art and through such institutional structures as the retrospective. His inquiries into the fate of

the juste milieu a group of dissidents who saw themselves as true heirs of Impressionism and his look at a new form of art history emerging in Germany further expose a linear dealer oriented history of modernist art constructed by or through the modernists themselves Catalogue of the City of Edinburgh Art Collection City of Edinburgh Museums and Art
