Edinburgh History of Scottish Literature: Modern Transformations: New Identities (from 1918) Ian

Brown, 2006-11-13 In almost a century since the First World War ended Scotland has been transformed in many rich ways Its literature has been an essential part of that transformation The third volume of the History explores the vibrancy of modern Scottish literature in all its forms and languages Giving full credit to writing in Gaelic and by the Scottish diaspora it brings together the best contemporary critical insights from three continents It provides an accessible and refreshing picture of both the varieties of Scottish literatures and the kaleidoscopic versions of Scotland that mark literary developments since 1918 LONDON MIDLAND & SCOTTISH Bill Horsfall, 2014 The London Midland Scottish Railway the LMS Great Britain's largest from 1923 1947 has been extensively chronicled but an update is long overdue This unique work achieves it and much more combining detailed information scattered over books and magazines through decades into a concise overview of what the company was about and how it worked Its analyses of locomotive stock provide a further insight into methods of operation The LMS pioneering work in both steam and diesel traction plus that in other fields put it ahead of Britain's other three railways and for this it is here accorded the recognition it deserves Fascinating amusing anecdotes give an insight into the staff's work ethic and into contemporary social conditions Key decisions by the LMS Executive to overcome the rivalry of its two largest constituents resulted in the appointment of an engineer who would create not only modern efficient

locomotives and rolling stock but also an effective and unified design team which would actually outlive the company and provide the spine of the four nationalized railways from 1948 The technical details such as wheel notation 4 4 0 etc boiler pressures and valve gears are well within the ambit of railfans and complete the picture of this Britain's greatest railway

Surfing and Modernity in the North of Scotland Matthew L. McDowell, 2024-09-11 For most people surfing is associated with Hawaii California and Australia with sun sand and scantily clad bodies However after the Second World War surfing also found a more unlikely home the north coast of Scotland In the 1960s and 1970s the first people to surf the Pentland Firth's world class waves braved brutal weather conditions poor or no wetsuits and baffled locals Equally as unlikely as surfing's presence on the north coast was its first permanent community founded amongst workers at a nuclear research facility with a notoriously poor safety record This book discusses the existence and evolution of surfing in the region from the 1960s to the present day It does not however focus just on surfing it also acts as a history of the region itself and examines the possibilities and limits of surfing sport and activities like them being used as a means of reinventing communities This book is therefore a valuable tool for historians sport practitioners and economic policymakers alike what can surfing tell us about the modern Highlands and Islands and indeed contemporary Scotland
