Japanese Sentence Processing Reiko Mazuka, Noriko Nagai, 2013-05-13 This volume is a direct result of the International Symposium on Japanese Sentence Processing held at Duke University The symposium provided the first opportunity for researchers in three disciplinary areas from both Japan and the United States to participate in a conference where they could discuss issues concerning Japanese syntactic processing The goals of the symposium were three fold to illuminate the mechanisms of Japanese sentence processing from the viewpoints of linguistics psycholinguistics and computer science to synthesize findings about the mechanisms of Japanese sentence processing by researchers in these three fields in Japan and the United States to lay foundations for future interdisciplinary research in Japanese sentence processing as well as international collaborations between researchers in Japan and the United States The chapters in this volume have been written from the points of view of three different disciplines with various immediate objectives from building usable speech understanding systems to investigating the nature of competence grammars for natural languages All of the papers share the long term goal of understanding the nature of human language processing mechanisms The book is concerned with two central issues the universality of language processing mechanisms and the nature of the relation between the components of linguistic knowledge and language processing This volume demonstrates that interdisciplinary research can be fruitful and provides groundwork for further research in Japanese sentence processing

Reading and Language Processing John M. Henderson, Murray Singer, Fernanda Ferreira, 2013-11-19 This volume was designed to identify the current limits of progress in the psychology of reading and language processing in an information processing framework Leaders in their fields of interest the chapter authors couple current theoretical analyses with new formally presented experiments The research cutting edge and sometimes controversial reflects the prevailing analysis that language comprehension results in numerous levels of representation including surface features lexical properties linguistic structures and idea networks underlying a message as well as the situations to which a message refers As a group the chapters highlight the impact that input modality auditory or written has on comprehension Finally the studies also capture the evolution of new topic matter and ongoing debates concerning the competing paradigms global proposals and methods that form the foundation of the enterprise The book presents current accounts of research on word sentence and text processing It will prove informative for experimental psychologists as well as investigators in cognitive science disciplines such as computer science linguistics and educational psychology The book will also be very helpful to graduate students who wish to develop expertise in the psychology of language processes For them it collects in a single volume readings that are representative of progress concerning many central problems in the field As such it is distinct from the numerous collected volumes that concentrate on a single issue Complete author and subject

A and A movement properties This volume will be most relevant to researchers and advanced students interested in generative syntax as well as typologists working on German Japanese Slavic Turkish Dravidian and Austronesian languages We regret that due to a layout error the title of Miyagawa s article on EPP and semantically vacuous scrambling is misrepresented in the printed version of the book You can download the article with the corrected title here [Constituent Order in Language and Thought](#) Masatoshi Koizumi,2023-01-19 Based on a field based comparative psycholinguistics case study this is the first book to explore neurocognition in endangered languages *Spectrum Sight Words, Grade 1* Spectrum,2014-08-15 Sight Words Workbook for 1st graders ages 6 Support your child s educational journey with the Spectrum Grade 1 Sight Words Workbook that teaches essential phonics skills to first graders First Grade Sight Word Books are a great way for children to learn essential skills such as reading sentence building and writing practice basic sight words and more through a variety of sight word activities that are both fun AND educational Why You ll Love This 1st Grade Phonics Workbook Engaging and educational sight words games and activities Unscrambling sentences Coloring and Word searches are a few of the fun activities that incorporate phonics into your child s homeschool or classroom curriculum to help inspire learning Tracking progress along the way An answer key is included in the back of the sight words workbook to track student progress before moving on to new and exciting activities Sight words flash cards are also included to reinforce vocabulary words and skills Practically sized for every activity The 160 page vocabulary workbook is sized at about 8 1 2 x 10 1 2 giving your child plenty of space to complete each exercise About Spectrum For more than 20 years Spectrum has provided solutions for parents who want to help their children get ahead and for teachers who want their students to meet and exceed set learning goals providing workbooks that are a great resource for both homeschooling and classroom curriculum The Spectrum Grade 1 Sight Words Workbook Contains Sight word vocabulary builder activities Cloze sentences scrambled sentences and sight word flash cards Answer key **The Lexical/Functional Divide in Aphasic Production - Poorly Studied Aphasic Syndromes and Theoretical Morpho-Syntax** Ludovico Franco,2014-06-12 This monograph is structured as a collection of clinical case studies all addressing the relationship between lexicon and morphosyntax It shows that various less studied aphasic syndromes including Logopenic Primary Progressive Aphasia Mixed Trascortical Aphasia and Crossed Aphasia and not only classic Broca s Aphasia can enhance findings worthy of consideration in contemporary theoretical debates on the status of traditional categories and particularly on the lexical functional divide in grammar The rationale of this study is precisely to build a bridge between experimental evidence from clinical linguistics and theoretical arguments from morpho syntactic analysis Furthermore this book addresses the recent resurgence of interest within neuropsychology in single case studies which can be crucial in order to corroborate or falsify theoretical advancements in linguistics **Interaction Between Linguistic and Nonlinguistic Factors** Masatoshi Koizumi,2023-12-04 Issues in Japanese Psycholinguistics from Comparative Perspectives compiles over 30 state of the art articles on Japanese

psycholinguistics It emphasizes the importance of using comparative perspectives when conducting psycholinguistic research Psycholinguistic studies of Japanese have contributed greatly to the field from a cross linguistic perspective However the target languages for comparison have been limited Most research focuses on English and a few other typologically similar languages As a result many current theories of psycholinguistics fail to acknowledge the nature of ergative absolutive and or object before subject languages The cross linguistic approach is not the only method of comparison in psycholinguistics Other prominent comparative aspects include comprehension vs production native speakers vs second language learners typical vs aphasic language development Many of these approaches are underrepresented in Japanese psycholinguistics The studies reported in the volumes attempt to bridge these gaps Using various experimental and or computational methods they address issues of the universality diversity of the human language and the nature of the relationship between human cognitive modules Volume 2 Interaction Between Linguistic and Nonlinguistic Factors provides studies on the interaction between linguistic and non linguistic factors

Working Memory, Thought, and Action Alan Baddeley, 2007-03-15

Working Memory Thought and Action is the magnum opus of one of the most influential cognitive psychologists of the past 50 years This new volume on the model he created with Graham Hitch discusses the developments that have occurred within the model in the past twenty years and places it within a broader context Working memory is a temporary storage system that underpins our capacity for coherent thought Some 30 years ago Baddeley and Hitch proposed a way of thinking about working memory that has proved to be both valuable and influential in its application to practical problems This book updates the theory discussing both the evidence in its favour and alternative approaches In addition it discusses the implications of the model for understanding social and emotional behaviour concluding with an attempt to place working memory in a broader biological and philosophical context Inside are chapters on the phonological loop the visuo spatial sketchpad the central executive and the episodic buffer There are also chapters on the relevance to working memory of studies of the recency effect of work based on individual differences and of neuroimaging research The broader implications of the concept of working memory are discussed in the chapters on social psychology anxiety depression consciousness and on the control of action Finally Baddeley discusses the relevance of a concept of working memory to the classic problems of consciousness and free will This new volume from one of the pioneers in memory research will doubtless emulate the success of its predecessor and be a major publication within the psychological literature

Asymmetries between Language

Production and Comprehension Petra Hendriks, 2013-07-31 This book asserts that language is a signaling system rather than a code based in part on such research as the finding that 5 year old English and Dutch children use pronouns correctly in their own utterances but often fail to interpret these forms correctly when used by someone else Emphasizing the unique and sometimes competing demands of listener and speaker the author examines resulting asymmetries between production and comprehension The text offers examples of the interpretation of word order and pronouns by listeners and word order

freezing and referential choice by speakers It is explored why the usual symmetry breaks down in children but also sometimes in adults Gathering contemporary insights from theoretical linguistic research psycholinguistic studies and computational modeling *Asymmetries between Language Production and Comprehension* presents a unified explanation of this phenomenon Through a lucid comprehensive review of acquisition studies on reference related phenomena Petra Hendriks builds a striking case for the pervasiveness of asymmetries in comprehension production In her view listeners systematically misunderstand what they hear and speakers systematically fail to prevent such misunderstandings She argues that linguistic theory should take stock of current psycholinguistic and developmental evidence on optionality and ambiguity and recognize language as a signaling system The arguments are compelling yet controversial grammar does not specify a one to one correspondence between form and meaning and the demands of the mapping task differ for listeners and speakers Her proposal is formalized within optimality theory but researchers working outside this framework will still find it of great interest In the language as code vs language as signal debate Hendriks puts the ball firmly in the other court Ana P rez Leroux University of Toronto Canada Processing and Producing Head-final Structures Hiroko Yamashita,Yuki Hirose,Jerome L. Packard,2010-11-05 This book is the first collection of studies on an important yet under investigated linguistic phenomenon the processing and production of head final syntactic structures Until now the remarkable progress made in the field of human sentence processing had been achieved largely by investigating head initial languages such as English The goal of the present volume is to deepen our understanding by examining head final languages and offering a comparison of those results to findings from head initial languages This book brings together cross linguistic investigations of languages with prominent head final structures such as Basque Chinese German Japanese Korean and Hindi It will inform readers of linguistics with both theoretical and experimental backgrounds as it provides accounts of previous studies offers experimentally based theoretical discussions and includes experimental stimuli in the original languages **Understanding Word and Sentence** G.B. Simpson,1991-01-14 Research concerning structure and processing in the mental lexicon has achieved central prominence within cognitive psychology and psycholinguistics Historically however much of the research on the lexicon focussed not on its role in language comprehension but as a medium for studying semantic memory This picture has changed in recent years with much more research examining the role of lexical processes and output in language comprehension Gathered together in this volume is the work of some of those researchers who are responsible for this shift of emphasis Chapters deal with the role of sentence contexts in word recognition processes involved in the activation and enhancement of lexical information and the interaction of lexical and syntactic information in sentence processing A wide range of theoretical and empirical issues relating to language understanding are discussed **Empty Categories in Sentence Processing** Sam Featherston,2001 Annotation Featherston Eberhard Karls U Tübingen presents the results of three experiments on the role of empty categories phonetically null place holders for locally absent constituents in sentence

processing The experiments used probe recognition sentence matching and event related potentials as well as self paced reading Coverage includes a discussion of the predictions of both Principles and Parameters Theory and Head Driven Phrase Structure Grammar Annotation c Book News Inc Portland OR booknews com

Handbook of Generative Approaches to Language Acquisition Jill de Villiers, Tom Roeper, 2011-08-27 Modern linguistic theory has been based on the promise of explaining how language acquisition can occur so rapidly with such subtlety and with both surprising uniformity and diversity across languages This handbook provides a summary and assessment of how far that promise has been fulfilled exploring core concepts in acquisition theory including notions of the initial state parameters triggering theory the role of competition and frequency and many others across a variety of syntactic topics that have formed the central domains of investigation and debate These topics are treated from the unique perspective of central actors in each domain who have helped shape the research agenda The authors have presented a summary of the data the theories under discussion and their own best assessments of where each domain stands Providing as well the agenda for future work in the field showing both particular needs and general directions that should be pursued in the coming decades

Applied Construction Grammar Sabine De Knop, Gaëtanelle Gilquin, 2016-04-25 Current research within the framework of Construction Grammar CxG has mainly adopted a theoretical or descriptive approach neglecting the more applied perspective and especially the question of how language acquisition and pedagogy can benefit from a CxG based approach The present volume explores various aspects of Applied Construction Grammar through a collection of studies that apply CxG and CxG inspired approaches to relevant issues in L2 acquisition and teaching Relying on empirical data and covering a wide range of constructions and languages the chapters show how the cross fertilization of CxG and L2 acquisition teaching can improve the description of learners use of constructions provide theoretical insights into the processes underlying their acquisition e g with reference to inheritance links or transfer from the L1 or lead to novel teaching practices and resources aimed to help learners make the generalizations that native speakers make naturally from the input they receive
