The Queer Coming of Age Film Genre Brad Windhauser, 2024-10-15. In *The Queer Coming of Age Film Genre*, Brad Windhauser argues for the existence of this genre and using a genre and queer theory lens, investigates how the initial classic cluster of this genre's films represent the unique issues experienced by queer people, including trans, non-binary, and intersex individuals coming of age in society in the mid to late 90s. As society evolved, the book posits so too did the ways in which these films explored additional factors influencing the queer coming of age experience, such as race and economic status. In the genre's second stage, Windhauser explores how this genre depicts the way queer people often engage with the coming of age process earlier than their cis-het peers due to their queer identity, but also how this process can extend beyond adolescence into emerging adulthood and adulthood itself. Ultimately, the book demonstrates how these films have become a tool to both further political goals of queer advocacy and acceptance and to offer guidance to queer people looking to gain a deeper understanding of their own lives and experiences. Scholars of film studies, genre studies, pop culture, and queer studies will find this book of particular interest.

Organizational and Social Perspectives on Information Technology Richard Baskerville, Jan Stage, Janice I. DeGross, 2013-03-14. The articles in this book constitute the proceedings/papers from the IFIP WG 8.2 Working Conference IS2000: The Social and Organizational Perspective on Research and Practice in Information Technology, held June 10-12, 2000, in Aalborg, Denmark. The focus of the conference, and therefore this book, is on the basic aim of the working group, namely the investigation of the interrelationships among four major components: information systems, IS, information technology, IT, organizations, and society. This basic social and organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group, for example, increasing the emphasis on IS development. The plan for the conference was partially rooted in the early WG 8.2 traditions in which

working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the opportunity to revise their papers prior to its final incorporation in this book

Consuming Environments Mike Budd,Steve Craig,Clayton M. Steinman,1999 This is an exploration of how much TV people watch why they watch too much and what they see The authors argue that while people may have good reasons for watching television they seem to be unaware that such habits might be harmful to their environmental health The book examines how advertising and media companies have shaped the commercial content of most television tracing industry motives and operations and their increasing concentration in fewer hands
