Balancing Individualism and Collectivism Janet McIntyre-Mills, Norma Romm, Yvonne Corcoran-Nantes, 2017-10-03 This book addresses the social and environmental justice challenge to live sustainably and well It considers the consequences of our social economic and environmental policy and governance decisions for this generation and the next The book tests out ways to improve representation accountability and regeneration It addresses the need to take into account the ethical implications of policy and governance decisions in the short medium and long term based on testing out the implications for self other and the environment This book recognizes the negative impact that humans have had on the Earth's ecosystem and recommends a less anthropocentric way of looking at policies and governance The chapters discuss the geologic impact that people have had on the globe both positive and negative and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era Based on these observations the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience and to conduct an egalitarian lifestyle These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority the growth in unsustainable food choices and of displaced people and the need for a new sense of relationship with nature and other animals among other issues The chapters included in *Balancing Individualism and Collectivism* Social and Environmental Justice encourage readers to challenge the sustainability agenda of the anthropocentric life Proposed solutions to these unsustainable actions include structuralized interventions and volunteerism through encouragement and education with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance

Asking Harry T. Cook, 2010-06-01 Too much communication in the world of religion is one way from clergy to lay persons who if ever respectfully engaged would become serious inquirers The most desirable means of effective engagement is the give and take method of eliciting and clarifying questions and then drawing the questioner into the answering process That combined with the intellectual rigor of Enlightenment thinking in the formation of beliefs will go a long way toward making contemporary religion a here and now enterprise thus saving it from hopeless irrelevance

Degrees of Difference Nancy S. Niemi, 2017-04-19 This volume investigates the dissonance between the supposed advantage held by educated women and their continued lack of

economic and political power Niemi explains the developments of the so called female advantage and boy crisis in American higher education setting them alongside socioeconomic and racial developments in women s and men s lives throughout the last 40 years Exploring the relationship between higher education credentials and their utility in creating political economic and social success Degrees of Difference identifies ways in which gender and academic achievement contribute to women s and men s power to shape their lives This important book brings new light to the issues of power gender identities and the role of American higher education in creating gender equity *Harvard Review* ,1992

Racial Propositions Daniel Martinez HoSang,2010-10-28 This book looks beyond the headlines to uncover the controversial history of California s ballot measures over the past fifty years As the rest of the U S watched California voters banned public services for undocumented immigrants repealed public affirmative action programs and outlawed bilingual education among other measures Why did a state with a liberal political culture an increasingly diverse populace and a well organized civil rights leadership roll back civil rights and anti discrimination gains Daniel Martinez HoSang finds that contrary to popular perception this phenomenon does not represent a new wave of color blind policies nor is a triumph of racial conservatism Instead in a book that goes beyond the conservative liberal divide HoSang uncovers surprising connections between the right and left that reveal how racial inequality has endured Arguing that each of these measures was a proposition about the meaning of race and racism his deft convincing analysis ultimately recasts our understanding of the production of racial identity inequality and power in the postwar era

Planetary Passport Janet McIntyre-Mills,2017-08-31 This book explores the implications of knowing our place in the universe and recognising our hybridity It is a series of self reflections and essays drawing on many diverse ways of knowing The book examines the complex ethical challenges of closing the wide gap in living standards between rich and poor people communities The notion of an ecological citizen is presented with a focus on protecting current and future generations The idea is to track the distribution and redistribution of resources in the interests of social and environmental justice The central argument looks for ways to hold the powerful to account so as to enable virtuous living by the majority to be demonstrated in what the author calls a planetary passport a careful use of resources and a way to provide safe passage to those in need of safe habitat The book argues that nation states need to find ways to control the super rich through the governance process and to enhance a sense of shared ecological citizenship and responsibility for biodiversity The fundamental approach is collaborative research Planetary Passport Representation Accountability and Re Generation is comprised of six chapters Chapter 1 begins by making a case for a paradigm shift away from business as usual and the pursuit of profit at the expense of the social and environmental fabric of life The aim is to explore alternatives and to discuss some ways of achieving wellbeing whilst the focus is on human rights discrimination and outlining the notion of a planetary passport Chapter 2 makes a specific link between people and the planet as a basis for understanding the nature of hybridity and interconnectedness and the implications for ethics Chapter 3 focuses on building this planetary passport for social and

environmental justice in order to enable people with complex needs to consider the consequences of either continuing to live the same way as before or making changes to the way that they live Meanwhile Chapter 4 does the same as the previous chapter but explores the political context of consumption and short term profit Chapter 5 examines the challenges and opportunities that come from explorations within a cross cultural learning community This includes a look at co creation and co determination Finally Chapter 6 ends with a look to the future and a potential new framework for people and the planet through a planetary passport
