Screenwriting A Method:

The 15-Minute Movie Method Wallace Evan Wang, 2013-11 If you've always wanted to write a screenplay or a novel you may be wondering What makes a great story It's not just interesting characters memorable dialogue or explosive action scenes What makes a great screenplay or novel is a great story Every great story from classic novels and stage plays to today's modern films follow the same basic proven story structure that alternates between contrasting problems and solutions to maintain and maximize suspense In the traditional three Act structure a story looks like this Act I Exposition Act II Rising Action Act III Climax Act I and Act III are roughly the same length corresponding to a 30 minute length in a 120 minute screenplay but Act II is typically twice as long as either Act I or Act III The result is that the traditional three Act structure sets you up for failure by forcing you to write a huge chunk of your story without any guidelines whatsoever In contrast a four Act structure makes each Act manageable while also providing the necessary contrast to create a compelling story Stories are interesting and suspenseful because they alternate between problems facing the hero followed by solutions that the hero achieves In the four Act structure a story looks like this Act I Exposition Act IIa Positive Rising Action Act IIb Negative Rising Action Act III Climax Another way to look at this four part story structure is as follows Act I Problem facing the hero Act IIa Hero solves the problem and appears to achieve success Act IIb New problems occur Act III Hero finally solves the problem Let's look at how this four part story structure works in Star Wars Act I Problem Luke is stuck in a dead end life on his uncle's farm Act IIa Solution Luke leaves with Obi wan to deliver the stolen Death Star plans Act IIb Problem Luke gets trapped on the Death Star Act III Solution Luke blows up the Death Star The four Act structure clearly lets you tell a story with alternating problems and solutions which is how you generate suspense to keep an audience glued to the edge of their seats Notice that with Act IIa the action continues to rise but in a positive direction Yet in Act IIb the action also continues to rise but in a negative direction This subtle difference is what the typical three Act structure fails to identify which is why the three Act structure so easily misleads writers to create less than compelling stories Once you understand how this four part story structure works you can use it as a guide to help shape your story into a well crafted screenplay The 15 Minute Movie Method isn't a formula for writing a story but a set of guidelines that you can test for yourself with your own favorite movies By following The 15 Minute Movie Method guidelines you can learn how to structure your screenplay to tell a compelling intriguing story with any idea You'll learn the four basic parts of any story how to divide your screenplay into eight 15 minute segments that each tell a mini story what type of information each story segment needs to show the audience how the beginning and end of your story is related how to create the toughest villain for your particular hero who the most important character of your story really is Hint it's not your hero and much more with specific exercises that anyone can follow whether you're a novice trying to write a first screenplay or a veteran screenwriter who needs to fix a problem with an existing screenplay By taking you step by step through the process of turning a good idea into a well structured story

The 15 Minute Movie Method can show you how to write a screenplay with less hassle frustration and confusion so you can spend more time actually writing and enjoying the process of creating the story that you want to share with the world

Screenwriting Stephen Geller,1985-01-01 Screenwriting Paul Gulino,2004-04-27 The great challenge in writing a feature length screenplay is sustaining audience involvement from page one through 120 Screenwriting The Sequence Approach expounds on an often overlooked tool that can be key in solving this problem A screenplay can be understood as being built of sequences of about fifteen pages each and by focusing on solving the dramatic aspects of each of these sequences in detail a writer can more easily conquer the challenges posed by the script as a whole The sequence approach has its foundation in early Hollywood cinema until the 1950s most screenplays were formatted with sequences explicitly identified and has been rediscovered and used effectively at such film schools as the University of Southern California Columbia University and Chapman University This book exposes a wide audience to the approach for the first time introducing the concept then providing a sequence analysis of eleven significant feature films made between 1940 and 2000 The Shop Around The Corner Double Indemnity Nights of Cabiria North By Northwest Lawrence of Arabia The Graduate One Flew Over the Cuckoo s Nest Toy Story Air Force One Being John Malkovich The Fellowship of the Ring *The Process* Clive Frayne,2019-11-27 The main difference between an early career screenwriter and a great screenwriter is their process Screenwriters with an effective and professional process tend to write great scripts This book teaches a method called process driven screenwriting The process is a series of planning steps we take before writing our script This process works for any kind of movie It works for Hollywood Blockbusters or experimental art house films As long as our intention is to create drama the process will help us write better scripts This book doesn t offer a formula or plot template Instead it helps screenwriters find a writing technique that works for them At the heart of this book is a simple idea dogma is the enemy of creativity This book contains a set of practical tools Tools designed to help writers create drama and to craft great cinematic stories This is also a book that explores the ideas behind drama story and what it means to write cinema Although the tools in this book are simple the conversation about how we write movie scripts isn t I have not separated the conversation about writing from the discussion about the tools That s because the two things are connected We need tools like this because writing cinematic drama is complicated It s not possible to separate the process from the challenges of screenwriting Process driven screenwriting is very simple Anyone can learn the basic steps in a short period of time However as with any tools it takes time and practice to master their use These tools can be used to create simple stories or to craft complex narratives So what are these tools What are the steps raw idea our initial inspiration or ideatheme decide what facet of human experience we re exploringcompass logline decide who the film is about when and where it is setchase our fascination to create the world of story creating a fictional worldcharacter development populate the world with characterscreate a plot decide what happens and the order in which the audience finds things outwrite the script write cinematic drama in a form that is

acceptable to the production team In reality everyone is a process driven screenwriter whether they know it or not Every writer has a process even if that process is to stare at a blank page until they have an idea Every writer's process is unique to them We do what works best for us Writers with great processes write great screenplays In this book we will look at ways any writer can improve their process without giving up the things that make them unique *Exploring Doctor Who Fandom Through Screenwriting Practice-As-Research* Kathryn Beaton, 2025-09-12 *Exploring Doctor Who Fandom Through Screenwriting Practice As Research* Otherness Intersectionality and Fan Studies explores the diversity of fans and how they form and express their identity within fandom Main themes in this book include otherness fans with disabilities fans within the LGBTQIA community and how fandom can enrich the life of a fan This book asks readers how a fan develops and performs their identity and proposes a screenwriting practice methodology Otherness in this scenario includes people who have disabilities are within the LGBTQIA spectrum and are neurodiverse Screenwriting methodology also allows concepts such as disability sexuality and otherness to be humanized through characterization and world building as seen in screenwriting practice *Exploring Doctor Who Fandom Through Screenwriting Practice As Research* Otherness Intersectionality and Fan Studies examines world building characterization and story arcs that explore the development of fan identity and how otherness through fandom is expressed It draws on the lived experience of the author as a disabled LGBTQIA aca fan to add a layer of authenticity to the research By offering a unique perspective on fandom and identity and how screenwriting methodology is a viable approach to researching these concepts it looks to spread understanding of a neglected point of view and enhance future works Readers who would be interested in this book are scholars and students of fandom theory screenwriting practice and those interested in the development and expression of identity as a fan
