Measuring the Global Shadow Economy Colin C. Williams, Friedrich Schneider, 2016-01-29 This book brings together two leading researchers in the field to provide a comprehensive overview of the shadow economy from a global perspective Reviewing the advantages and disadvantages of different ways of measuring the informal sector the authors evaluate its size and key determinants across the world Williams and Schneider clearly establish the persistence and prevalence of the shadow economy analysing the narrowness of existing policy approaches and explaining how these fail to address the key factors for its existence and may even exacerbate the problem Proposing an alternative way forward the authors argue that little headway will ever be made in reducing the shadow economy until there are changes not only to the character of formal institutions but also informal institutions the values beliefs and norms of citizens through the introduction of macro level structural changes This timely cutting edge review of the global shadow economy and how it can be measured and tackled is an invaluable resource for postgraduate students researchers and policy makers particularly those with an interest in tax evasion and informal labour

From Shadow to Presence Jelena Šesnić, 2007 This volume departs from a more static concept of identity politics to engage the varied and entangled processes of ethnic racial national and gender identifications in a range of contemporary US ethnic texts from the mid 1960s to the mid 1990s Recognizing the growing salience of variously named ethnic multicultural and minority literatures as they are produced and circulated in the USA and worldwide nowadays this work charts four broadly defined models of approaching such texts cultural nationalism ethnic feminism borderlands and contact

zones and finally the diasporic model Drawing extensively on psychoanalytic theory feminist gender studies critical race theory postcolonial theory and its revision of ethnography the book offers a fresh engaged theoretically and analytically well rehearsed overview of the distinctive and determining features of a rapidly expanding domain of contemporary US literary production namely ethnic literatures Of potential interest to scholars of American US literature but also minority and postcolonial literatures and to students of American literature the book attempts an interethnic comparative approach to well and lesser known texts Among the authors represented are Shawn Wong Oscar Zeta Acosta Toni Morrison Maxine Hong Kingston Sherman Alexie Denise Ch vez Rolando Hinojosa Roberto Fernandez and Edwidge Danticat

In the Shadow of Powers Patrick Bellegarde-Smith, 2021-04-30 Out of a slave rebellion Haiti was forged as an independent nation This fact in and of itself should have been enough to perpetuate an image of Haitians as strong and agentive people But leaders of countries on both sides of the Atlantic felt threatened by Haiti's beginnings and were intent on sapping it of resources More than a century of various restrictions on trade the imposition of crippling fines and eventually a US occupation followed Yet even as they suffered economically under these penalties Haitians persisted some of them becoming influential actors in the world of global politics Throughout much of the twentieth century and even to this day there has been a dearth of scholarship on the intellectual and political contributions of Haitians In the Shadow of Powers first published in 1985 was a corrective to this oversight and remains a foundational text Bellegarde Smith traces the history of Haiti through the life and career of his grandfather Dant's Bellegarde one of Haiti's influential diplomats and preeminent thinkers As Brandon R Byrd describes in his foreword to this new edition Bellegarde was driven by a subversive racially inclusive vision of civilized progress He believed in and continued to push for Haiti to establish an existence for itself black people and the colonized world independent of the considerable shadow cast by the world's military economic and industrial powers Scholars and students who want to learn about the intellectual and political foundations of Haiti its influence on other intellectuals worldwide and its struggles against imperialism continue to find this to be an invaluable classic

In the Shadow of the Giant Jürgen Buchenau, 1996 This book analyzes Mexico's initiatives in Central America during the Porfirian and Revolutionary periods and pays particular attention to Mexico's persistent challenge to U.S. influence in Central America

In the Shadow of the State Nicola Miller, 1999 Carlos Fuentes once observed that to be a Spanish American intellectual was to fulfill the roles by default of a tribune a member of parliament a labor leader a journalist a redeemer of his society Such statements reflect the view that the region's intellectuals have often acted as substitutes for the structures of a civil society An alternative view casts Spanish American intellectuals in a far more reactionary role Here it is suggested that the elaboration of inert popular stereotypes such as the stoic Indian and the heroic gaucho has resulted in an infinite postponement of authentic cultural identity and a perpetuation aided by intellectuals of a social order in which popular demands were either ignored or repressed In the context of this debate this book explores the roles played by intellectuals in the creation of popular national

identities in twentieth century Spanish America and seeks to identify the factors which lie behind two such contrasting evaluations of their contribution. Ranging across the intellectual centers of Argentina, Chile, Cuba, Mexico, and Peru, it illustrates vividly the diversity and evolution of intellectual life in the region. Particular attention is paid to the idea of peripheral modernity and its influence on intellectual activity as well as to the contributions made by intellectuals to the three major strands in debates on popular national identity: bi-culturalism, anti-imperialism, and history.

Identity in the Shadow of Slavery Paul E. Lovejoy, 2000-09-13. Addresses issues relating to the gender, ethnic, and cultural factors through which enslaved Africans and their descendants interpreted their lives under slavery, thereby creating communities with a shared sense of identity. The focus of the book is on the ways in which identities were formulated under slavery and the ways in which the struggle to escape slavery and its legacy continued to affect the lives of descendants of slaves. The introductory essay explores an approach to the study of the African diaspora that looks outward from Africa and places the following chapters, written by leading authorities from Europe and North and South America, in the context of the theoretical literature.

Medea's Long Shadow in Postcolonial Contexts Ana Filipa Prata, Rodrigo Verano, 2024-06-10. This interdisciplinary volume explores the ancient Greek myth of Medea and its global analogues found in other mythic and folk tales of deadly exiled women, such as those of La Malinche and La Llorona, examining the connections between these figures and their depictions from antiquity to modernity. The book considers the figure of the foreign woman, her exile, fratricide, and infanticide, in its ancient Greek form and in global postcolonial receptions in a range of media, including drama, film, novels, and the visual arts. The chapters illuminate the contradictions of considering the classical Medea as a central reference point for analysis of other female figures from peripheral territories while simultaneously acknowledging the insights that such comparisons can yield. Emphasizing the ways in which Medea's seditious nature enables the establishment of an extensive and heterogeneous intertextual network with other mythic characters who represent a similarly disruptive role in their specific local historical and cultural contexts, the book argues for a comparative analysis that is equally attentive to myths and folk tales from all regions. These essays, by scholars of classics, comparative and world literatures, and postcolonial studies, represent a plurality of perspectives from different academic contexts in Africa, Latin America, North America, and Europe, and examine how different cultures have depicted women, foreigners, crime, and abjection. The foundations of Greek myth and subsequently of the classical tradition itself are interrogated from a postcolonial perspective. In tracing the portrayals of Medea and other mythic women through the overlapping features of different female characters and plots and intertwining local cultural and literary materials with broader debates, this volume challenges Eurocentric narratives of power and cultural domination and works to decentralize the discussion of Medea from the exclusive domain of classical studies. *Medea's Long Shadow in Postcolonial Contexts* will be of interest to students and scholars working on Greek tragedy and its reception as well as to those studying postcolonial and global approaches to literature, culture, and gender studies.

In the Shadow of International

Law Michael Poznansky,2020-04-28 In this book Michael Poznansky asks why countries sometimes pursue activities such as regime change in the shadows rather than out in the open for the world to see He finds that international law plays a key role in this decision making process because senior government officials especially in the United States are sensitive to brazenly violating rules surrounding when countries should and shouldn't intervene in the internal affairs of others He argues that while the existence of such restrictions don't always prevent great powers from undertaking regime change when it suits their interests they do have meaningful impacts Verbal-Visual Configurations in Postcolonial Literature Birgit

Neumann,Gabriele Rippl,2020-04-23 Examining a range of contemporary Anglophone texts this book opens up postcolonial and transcultural studies for discussions of visibility and vision It argues that the preoccupation with visual practices in Anglophone literatures addresses the power of images vision and visual aesthetics to regulate cultural visibility and modes of identification in an unevenly structured world The representation of visual practices in the imaginative realm of fiction opens up a zone in which established orders of the sayable and visible may be revised and transformed In 12 chapters the book examines narrative fiction by writers such as Michael Ondaatje Derek Walcott Salman Rushdie David Dabydeen and NoViolet Bulawayo who employ word image relations to explore the historically fraught links between visual practices and the experience of modernity in a transcultural context Against this conceptual background the examination of verbal visual relations will illustrate how Anglophone fiction models alternative modes of representation that reflect critically on hegemonic visual regimes and reach out for new more pluralized forms of exchange

The Shadow that Lingers Allan D Cooper,2023-06-05 Allan D Cooper demonstrates how the resistance to slavery served to unveil the nature of freedom that made possible the abolition movement and anti colonial struggles The corpus of human rights law that has evolved over the past two centuries is constructed around the negation of slavery This book analyzes how slavery mutated into racial identification that governments enforce against their own population to advance more efficient methods of discipline and control The Shadow that Lingers reveals how race is used to traumatize human beings by embodying inferiority and powerlessness even for whites that claim privilege under racialized regimes As an ideology of power race becomes contextualized to fit local cultures resulting in contradictory understandings of race from one culture to another This book focuses attention on how racial hybridity among mixed race communities poses challenges for racial purists and how such communities endeavor to construct racial identities that often differentiate themselves from being black The book concludes with an analysis of how the pursuit of freedom inevitably requires the reification of a non racial identity **Crystal Jewelry**

Beyond the Eagle's Shadow Julio E. Moreno, 2013-12-30 The dominant tradition in writing about U S Latin American relations during the Cold War views the United States as all powerful That perspective represented in the metaphor talons of the eagle continues to influence much scholarly work down to the present day The goal of this collection of essays is not to write the United States out of the picture but to explore the ways Latin American governments groups companies organizations and individuals promoted their own interests and perspectives The book also challenges the tendency among scholars to see the Cold War as a simple clash of left and right In various ways several essays disassemble those categories and explore the complexities of the Cold War as it was experienced beneath the level of great power relations
