Introduction of Advanced State Space Grids and Their Application to the Analysis of Physics Teaching Niklas Litzenberger, 2023-10-25 Teaching is characterized by complex interactions Therefore it is difficult to make global statements about a teaching sequence However methods that aim at a global assessment of teaching have often been used in indicator based lesson observation It remains unclear how reliable global assessments of entire lesson sequences are since no statements can be made about dynamic processes taking place One approach is the State Space Grids SSG developed by Hollenstein 2013 These make it possible to relate the development of two teaching characteristics to each other over time to visualize dynamic processes However there is no suitable way to numerically capture the relationship between indicators e g to compare such moment to moment assessments with global assessments The aim of this work is therefore to extend the

SSG approach to Advanced State Space Grids with mathematically based parameters to test their practicability to compare them with global assessments of entire teaching sequences and to investigate their applicability to physics teaching Numerical and graphical elements are added to the SSG plot These include new relation types between the recorded indicators chi square tests and parameters for densities and deviations **Orphans of Space-Time** Robby

Charters,2016-11-01 If you remember something that didn't happen it either means you're crazy or you have the ability to time travel but don't know it yet When Drake was nine he was sure he had a best friend named Timmy But Timmy didn't exist Now at age sixteen he still remembers Timmy When he looks deeper he recognises pictures of people that he shouldn't because he wasn't born yet when they were last seen He even remembers a name Then he meets Johann who tells him to cover his tracks The name he remembers is of a time travelling assassin Now Drake is in over his head because the fact that he can remember means he also has the latent gift of time travel But that's not something to get all giddy about like discovering you're a superhero or something First off who's going to believe you For goodness sake this is real life So begins Drake's quest to save his best friend from non-existence and stop the assassin from changing the world beyond recognition because now the assassin has murdered Johann and Drake is the only one who can stop him It's a series of interconnected stories ranging in size from short story to novella You'll be hooked at the end of the first as it ends in a cliffhanger that can only be resolved in the second Drake and his friends have to clean up a mess that resulted from the first adventure If you like time travel stories about down to earth people this is definitely for you Buy now with just one click **Space Alliance**

The beaches were pristine The rooms were comfortable Everything was so relaxing The only area off limits was the northern beaches and an area they called the trench He asked a Mr Jones why Mr Jones told him that since he was head of security He would take him out to the cliffs and show him the reason While out there they saw a large sea bird flying over the water That was when a large shark leaped from the water and snatched it from the air Mr Jones pointed out that is why the northern beaches and the trench were off limits Bancroft decided that was a good reason The rest of the crew was just having a good time Mrs Svedberg ran the resort like a general The service staff seemed happy despite the fact that she seemed demanding

to work for He also was confused by the large canus that seemed to have free run of the island Till he was told they were part of the security detail Yet he liked what he saw These Maxumus were good at what they did Bancroft decided he was a lucky bear At the very least his life would probably never be boring He was going to be right **Parallels in Time and Space**
