Sustainable Development in Amazonia Kei Otsuki,2013 This book argues against the assumption that sustainability and environmental conservation are naturally the common goal and norm for everyone in Amazonia This is the first book focusing on agency reflexivity and social development to address sustainable development in the region It discusses the importance of looking into societal dynamics in order to deal with deforestation and sustainable development policies through the ethnography of an Amazonian settlement named New Paradise This book demystifies utopian and overtly conservationist views that depict the Amazon rainforest as a troubled paradise Engaging with social theory of practice with particular focus on emergentist perspectives and Foucault s analysis of heterotopia the author shows that Amazonia is a set of settlement heterotopias in which various local and external initiatives interact to make up real lived in places The settlers placemaking continually rearranges power and material relations while the process usually emphasises utopian developmentalist and conservationist policy intervention This book explores in detail how as power relations are arranged and governance reshaped sustainable development and construction of a green society also need to become a goal for the settlers themselves The book s insights on the relationship between the sustainable development frameworks used in environmental policy and ongoing societal development on the ground inform debate both within Amazonia and in comparable communities worldwide It also offers institutional pathways to realise new more engaging policy intervention for development professionals and policy makers
