Temperature rises in the Arctic are already affecting the UK's weather. The report points out that there are already more proven fossil fuel reserves in the world than can be burnt safely and calls on the Government to rethink its approach to combating climate change by tackling the supply of fossil fuels as well as demand.

Searching for Justice After the Holocaust Michael J. Bazylar, Kathryn Lee Boyd, Kristen Nelson (Lawyer), Rajika Shah, 2019. The Nazis and their state sponsored cohorts stole mercilessly from the Jews of Europe. In the aftermath of the Holocaust returning survivors had to navigate a frequently unclear path to recover their property from governments and neighbors who had failed to protect them and who often had been complicit in their persecution. This book is about the less publicized area of post Holocaust restitution involving immovable real property confiscated from European Jews and others during World War II.

Another Look at Governments' Balance Sheets Ms. Elva Bova, Mr. Robert Dippelsman, Ms. Kara C Rideout, Ms. Andrea Schaechter, 2013-05-02. When discussing debt reduction strategies little attention has been given to the role of governments nonfinancial assets. This is in part because data are scarce. Drawing on various data sources this paper looks at the size composition and management of state owned nonfinancial assets across 32 economies with particular focus on the advanced G 20 economies. We find that reported nonfinancial assets comprise mostly structures such as roads and buildings and when valued land. These assets have increased over time mostly due to higher property and commodity prices and are in large part owned by subnational governments. Many countries have launched reforms with a view to streamlining public administrations but receipts and savings have been rather small so far. Governments tend to consider relatively small sets of assets to be disposable though preferences could change in the future. A potential source for future revenues could be greater reliance on user charges such as road tolls. In most cases a first step for more effective asset management has to be the expansion and improvement of data compilation.

A Fair Deal on Talent - Fostering Just Migration Governance Bertelsmann Stiftung, 2015-05-12. If well managed migration generates benefits for migrants their countries of origin and the countries they settle in. For migrants it can help them expand their skill sets and improve their standard of living. For destination countries it can alleviate demographic pressures and foster cultural diversity. For origin countries it can bring benefits associated with remittances and knowledge transfers. However in reality these benefits are rarely achieved as migration policy failures frequently lead to suboptimal or even negative outcomes. Realizing the full potential of migration therefore demands we foster a paradigm shift toward the fair management of migration. Fair migration is driven by the desire to achieve a triple win for migrants destination countries and origin countries. In addition to outlining the key challenges and opportunities associated with fair migration this volume examines the good practices of a variety of countries and institutions which highlight aspects of fair migration. The volume concludes with policy recommendations for effective and fair migration policymaking at the national

and international levels As a conceptual and empirical contribution to both national and international debates on managing migration this volume aims to enrich discussions among policymakers business leaders civil society actors and scholars alike
