Looking Good And Doing Good Corporate Philanthropy And Corporate Power By Himmelstein:

Looking Good and Doing Good Jerome L. Himmelstein, 1997-05-22 Political controversy is a lens through which the author examines corporate philanthropy. He explains why corporate philanthropy has become politicized, how corporations respond to controversy about their donations, and what the conflicts tell us about corporate philanthropy and corporate politics. Himmelstein argues that corporate giving sometimes becomes politicized because it is inherently a complex social and political act. Drawing on in-depth interviews with managers at fifty-five of the largest corporate giving programs in the U.S., Himmelstein shows that corporate giving often finds itself as one manager put it, locked in a struggle between looking good and doing good. Back cover [Communication in International Development](#) Florencia Enghel, Jessica Noske-Turner, 2018-05-23 International development stakeholders harness communication with two broad purposes: to do good via communication for development and media assistance, and to communicate doing good via public relations and information. This book unpacks various ways in which different efforts to do good are combined with attempts to look good in the eyes of donor constituencies at large or among more specific audiences such as journalists or intra-agency decision makers. Development communication studies have tended to focus primarily on interventions aimed at doing good among recipients at the expense of examining the extent to which promotion and reputation management are elements of those practices. This book establishes the importance of interrogating the tensions generated by overlapping uses of communication to do good and to look good within international development cooperation. The book is a critical text for students and scholars in the areas of development communication and international development and will also appeal to practitioners working in international aid who are directly affected by the challenges of communicating for and about development. *Handbook of Global Education Policy* Karen Mundy, Andy Green, Bob Lingard, Antoni Verger, 2016-05-02 This innovative new handbook offers a comprehensive overview of the ways in which domestic education policy is framed and influenced by global institutions and actors. Surveys current debates about the role of education in a global polity, highlights key transnational policy actors, accessibly introduces research methodologies, and outlines global agendas for education reform. Includes contributions from an international cast of established and emerging scholars at the forefront of the field, thoughtfully edited and organized by a team of world-renowned global education policy experts. Each section features a thorough introduction designed to facilitate readers' understanding of the subsequent material and highlight links to interdisciplinary global policy scholarship. Written in an accessible and engaging style that will appeal to domestic and international policy practitioners, social scientists, and education scholars alike. [The Politics of Partnerships](#) Maria May Seitanidi, 2010-03-22 In the late 1990s, the idea of cross-sector collaborations was relatively new in Europe. The term partnership was employed primarily to refer to partnerships between government and businesses, usually termed PPP (Public-Private Partnerships). On the other hand, strategic alliances was the term employed for business-to-business partnerships. Until then, sponsorship was the most

practised associational form between nonprofit organisations NPOs and businesses BUSs which was included within the broad area of corporate community involvement The relations between NPOs and BUSs witnessed a gradual intensification over the last 200 years Gray 1989 Young 1999 Austin 2000 Googins and Rochlin 2000 resulting in increased interactions within both the philanthropic and trans tional types of relationships Seitanidi and Ryan 2007 However the more recent gradual prominence of the concept of corporate social responsibility CSR within all sectors of society elicited an intensification of the debate with regard to the responsibilities of each sector in addressing environmental and social issues In effect CSR contributed to the increase of the interactions across the sectors and propelled NPO BUS Partnerships a type of social partnership as a key mechanism for corporations to delve into a process of engaging with NPOs in order to improve their business practices by contributing their resources to address social issues Heap 1998 Mohiddin 1998 Fowler 2000 Googins and Rochlin 2000 Mancuso Brehm 2001 Drew 2003 Hemphill and Vonortas 2003

Giving Circles Angela M. Eikenberry,2009-06-29 Describes giving circles and how they work to meet social needs and solve community problems and examines the role of philanthropy in democratic society

Regulating Multinationals in Developing Countries Edwin Mujih,2016-04-08 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries with a particular focus on extractive industries The author highlights the need to establish an international legally binding framework to ensure that multinationals operate in a socially responsible manner to protect local communities and the environment Edwin Mujih s analysis reveals that the existing mechanisms for controlling the behaviour of huge multinational entities are of normative force only that these are particularly inadequate and that the notion of corporate social responsibility is only meaningful where behaviour can be legally regulated

Regulating Multinationals in Developing Countries features a study of the Chad and Cameroon Oil and pipeline project which highlights the problems arising in countries that have neither the capacity nor the will to effectively regulate those operating within their borders The author has evaluated compliance by the parties with their social and environmental obligations He has found that despite controversy surrounding inadequate regulation of this project in its incipient stages the system that was put in place following huge opposition from the affected communities and from NGOs is worthy of attention and could stand as a model for similar projects elsewhere This first title in Gower s Corporate Social Responsibility Series to approach CSR from a legal perspective provides insight not just into the complexity surrounding efforts to regulate multinationals operating in countries with weak regulatory regimes but also into the fundamental nature of multinational corporations and the debate about different notions of CSR itself
