Making Time:

Making Time Jane Lancaster, 2015-12-01 Readers of *Cheaper by the Dozen* remember Lillian Moller Gilbreth 1878 1972 as the working mom who endures the antics of not only twelve children but also an engineer husband eager to experiment with the principles of efficiency especially on his own household What readers today might not know is that Lillian Gilbreth was herself a high profile engineer and the only woman to win the coveted Hoover Medal for engineers She traveled the world served as an advisor on women s issues to five U S presidents and mingled with the likes of Eleanor Roosevelt and Amelia Earhart Her husband Frank Gilbreth died after twenty years of marriage leaving her to raise their eleven surviving children all under the age of nineteen She continued her career and put each child through college Retiring at the age of ninety Lillian Gilbreth was the working mother who did it all Jane Lancaster s spirited and richly detailed biography tells Lillian Gilbreth s life story one that resonates with issues faced today by many working women Lancaster confronts the complexities of how one of the twentieth century s foremost career women could be pregnant nursing or caring for children for more than three decades Yet we see how Gilbreth s engineering work dovetailed with her family life in the professional and domestic partnership that she forged with her husband and in her long solo career The innovators behind many labor saving devices and procedures used in factories offices and kitchens the Gilbreths tackled the problem of efficiency through motion study To this Lillian added a psychological dimension with empathy toward the worker The couple s expertise also yielded the Gilbreth family system a model that allowed the mother to be professionally active if she chose while the parents worked together to raise responsible citizens Lancaster has woven into her narrative many insights gleaned from interviews with the surviving Gilbreth children and from historical research into such topics as technology family work and feminism Filled with anecdotes this definitive biography of Lillian Gilbreth will engage readers intrigued by one of America s most famous families and by one of the nation s most successful women

Making Time Richard Whipp, Barbara Adam, Ida Sabelis, 2002-07-04 Time is an essential feature of social and organizational life and part of the deep structure of business activity Plans performance productivity and pay are all linked to and often measured by time Yet time is often taken for granted in daily life and the business world The aim of this book is to bring time into sharper focus and in particular to look at the way time is constructed made managed and used in organizations The book both provides an overview of some of the key concepts in time time s arrow time s cycle clock time etc and it explores how particular features of the modern world global time futures etc extend and change the temporal dimension of organizational activity *Making Time* emphasizes the richness of the temporal relations within organizations and the wealth of competing attempts to order and control time in the act of managing It describes and explains this temporal complexity as it occurs in management giving full recognition to the way that people create their own sense of time alongside the official temporal apparatus of the clock and diary The contributors use a variety of management perspectives strategy organization theory decision making industrial relations and

marketing and deliberately place the experience of more traditional industrial settings alongside those at the forefront of the new economy *Making Time* seeks to spark a debate across the field of management that does justice to the richness of the temporal features of contemporary organizations The book will be vital reading for those who want to understand the complexities of time in organizations and the modern world and the challenges it presents for the theoretical and practical spheres of management

Making Time Yulia Frumer, 2018-01-19 What is time made of We might balk at such a question and reply that time is not made of anything it is an abstract and universal phenomenon In *Making Time* Yulia Frumer upends this assumption using changes in the conceptualization of time in Japan to show that humans perceive time as constructed and concrete In the mid sixteenth century when the first mechanical clocks arrived in Japan from Europe the Japanese found them interesting but useless because they failed to display time in units that changed their length with the seasons as was customary in Japan at the time In 1873 however the Japanese government adopted the Western equal hour system as well as Western clocks Given that Japan carried out this reform during a period of rapid industrial development it would be easy to assume that time consciousness is inherent to the equal hour system and a modern lifestyle but *Making Time* suggests that punctuality and time consciousness are equally possible in a society regulated by a variable hour system arguing that this reform occurred because the equal hour system better reflected a new conception of time as abstract and universal which had been developed in Japan by a narrow circle of astronomers who began seeing time differently as a result of their measurement and calculation practices Over the course of a few short decades this new way of conceptualizing time spread gradually becoming the only recognized way of treating time

Making Time Carolin Gebauer, 2021-04-19 2023 Perkins Prize of the International Society for the Study of Narrative ESSE Book Award for Junior Scholars for a book in the field of Literatures in the English Language Responding to the current surge in present tense novels *Making Time* is an innovative contribution to narratological research on present tense usage in narrative fiction Breaking with the tradition of conceptualizing the present tense purely as a deictic category denoting synchronicity between a narrative event and its presentation the study redefines present tense narration as a fully fledged narrative strategy whose functional potential far exceeds temporal relations between story and discourse The first part of the volume presents numerous analytical categories that systematically describe the formal structural functional and syntactic dimensions of present tense usage in narrative fiction These categories are then deployed to investigate the uses and functions of present tense narration in selected twenty first century novels including Hilary Mantel's *Wolf Hall* Margaret Atwood's *Oryx and Crake* Ian McEwan's *Nutshell* and Irvine Welsh's *Skagboys* The seven case studies serve to illustrate the ubiquity of present tense narration in contemporary fiction ranging from the historical novel to the thriller and to investigate the various ways in which the present tense contributes to narrative worldmaking

***Making Time* Gavin Lucas, 2021-04-25** *Making Time* grapples with a range of issues that have crystallized in the wake of 15 years of discussion on time in archaeology since the author's seminal volume

The Archaeology of Time synthesizing them for a new generation of scholars The general understanding of time held by both archaeologists and non archaeologists is often very simple a linear notion where time flows along a single path from the past into the future This book sets out to complicate this image to draw out the key problems and issues with time that impact archaeological interpretation Using concrete examples drawn from different periods and places the book challenges the reader to think again Ultimately the book will suggest that if we want to understand what archaeological time is then we need to accept that things do not exist in time they make time The crucial question then becomes what kinds of time do archaeological materialities produce Written for upper level undergraduates and researchers in archaeology the book is also accessible to non academics with an interest in the topic The book is relevant for cognate disciplines especially history heritage studies and philosophy

Making Time for Digital Lives Anne Kaun, Christian Pentzold, Christine Lohmeier, 2020-09-09 It is said that the ontology of data resists slowness and also that the digital revolution promised a levelling of the playing field Both theories are examined in this timely collection of chapters looking at time in the digital world Since data has assumed such a paramount place in the modern neoliberal world contemporary concepts of time have undergone radical transformation By critically assessing the emerging initiatives of slowing down in the digital age this book investigates the role of the digital in ultimately reinforcing neo liberal temporalities It shows that both speed up and slow down imperatives often function as a form of biopolitical social control necessary to contemporary global capitalism Problematic paradoxes emerge where a successful slow down and digital detox ultimately are only successful if the individual returns to the world as a more productive labouring neoliberal subject Is there another way The chapters in this collection broken up into three parts ask that question

Making Time on Mars Zara Mirmalek, 2020-04-07 An examination of how the daily work of NASA s Mars Exploration Rovers was organized across three sites on two planets using local Mars time In 2004 mission scientists and engineers working with NASA s Mars Exploration Rovers MER remotely operated two robots at different sites on Mars for ninety consecutive days An unusual feature of this successful mission was that it operated on Mars time the daily work was organized across three sites on two planets according to two Martian time zones In *Making Time on Mars* Zara Mirmalek shows that this involved more than a resetting of wristwatches the team s struggle to synchronize with Mars time involved technological and communication breakdowns informal workarounds and extra work to support the technology that was intended to support people Her account of how NASA created an entirely new temporality for the MER mission offers insights about the assumptions behind the organizational relationship between clock time and work Mirmalek herself a member of the mission team offers an insider s

view of the MER workplace and community She describes the discord among MER's multiple temporalities and examines issues of professional identity that helped shape the experience of working according to Mars time Considering time and work relationships through a multidisciplinary lens Mirmalek shows how contemporary and historical human technology relationships inform assumptions about the unalterability of clock time She argues that the organizational connection between clock time and work although still operational is outdated

Making Time for the Past Katherine Clarke, 2008-03-20 This book has two main and connected themes the conception and articulation of time in the Greek world and the creation of history especially in the context of the Greek city Both how time is expressed and how the past is presented have often been seen as reflections of society By looking at the construction of the past through the medium of local historiography where we can view these issues in the relatively restricted world of individual city states we can gain a clearer insight into how different versions of the past and different constructions of time were offered to the community for approval In this way the citizens were able to negotiate time past and indeed their own history and thereby to express their values and aspirations

Making Time in Stanley Kubrick's Barry Lyndon Maria Pramaggiore, 2014-12-18 Considered by critics to be Stanley Kubrick's masterpiece Barry Lyndon has suffered from scholarly and popular neglect Maria Pramaggiore argues that one key reason that this film remains unappreciated even by Kubrick aficionados is that its transnational and intermedial contexts have not been fully explored Taking a novel approach she looks at the film from a transnational perspective as a foreign production shot in Ireland and an adaptation of a British novel by an American director about an Irish subject Pramaggiore argues that in Barry Lyndon Kubrick develops his richest philosophical mediation on cinema's capacity to mediate the real and foregrounds film's relationship to other technologies of visibility including painting photography and digital media By combining extensive research into the film's source novel production and reception with systematic textual analysis and an engagement with several key issues in contemporary academic debate this work promises not only to make a huge impact in the field of Kubrick studies but also in 1970s filmmaking cultural history and transnational film practice

Making Time for Greek and Roman Literature Kate Gilhuly, Jeffrey P. Ulrich, 2023-12-01 The essays in this collection explore various models of representing temporality in ancient Greek and Roman literature to elucidate how structures of time communicate meaning as well as the way that the cultural impact of measured time is reflected in ancient texts This collection serves as a meditation on the different ways that cosmological and experiential time are construed measured and manipulated in Greek and Latin literature It explores both the kinds of time deemed worthy of measurement as well as time that escapes notice Likewise it interrogates how linear time and its representation become politicized and leveraged in the service of emerging and dominant power structures These essays showcase various contemporary theoretical approaches to temporality in order to build bridges and expose chasms between ancient and modern ideologies of time Some of the areas explored include the philosophical and social implications of time that is not measured the insights and limitations provided by queer theory for an investigation of the way sex and gender relate to time the relationship of time to power the extent to which temporal discourses intersect with spatial constructs and finally an exploration of experiences that exceed the boundaries of time *Making Time for Greek and Roman Literature* is of interest to scholars of time and temporality in the ancient world as well as those working on time and temporality in English literature comparative literature history sociology and gender and sexuality It is also suitable for those working on Greek and Roman literature and culture more broadly

Making Time Introduction

In the digital age, access to information has become easier than ever before. The ability to download Making Time has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Making Time has opened up a world of possibilities. Downloading Making Time provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Making Time has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Making Time. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Making Time. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Making Time, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Making Time has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF

downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
