A New Approach to Kant Zehou Li,2018-05-21 Originally written during the Cultural Revolution this book introduces and interprets Kant s critical philosophy through the lens of its author Li Zehou s own philosophical approach anthropological historical ontology Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies Over millions of years these ever evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li s views draw upon Marx s theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence Beginning with the assumption that the question at heart of Kant s philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant s transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future

The First Marx Peter Lamb, Douglas Burnham, 2018-11-15 Marx's early work is well known and widely available but it usually interpreted as at best a kind of stepping stone to the Marx of Capital This book offers something completely different it reconstructs from his first writings spanning from 1835 to 1846 a coherent and well rounded political philosophy The influence of Engels upon the development of that philosophy is discussed This it is argued was a philosophy that Marx could have presented had he put the ideas together as he hinted was his eventual intention Had he done so this first Marx would have made an even greater contribution to social and political philosophy than is generally acknowledged today Arguments regarding revolutionary change contradiction and other topics such as production alienation and emancipation contribute to a powerful analysis in the early works of Marx one which is worthy of discussion on its own merits This analysis is distributed among a range of books papers letters and other writings and is gathered here for the first time Marx's work of the period was driven by his commitment to emancipation Moreover as is discussed in the conclusion to this book his emancipatory philosophy continues to have resonance today This new book presents Marx in a unique new light and will be indispensable reading for all studying and following his work
