Herbal Drugs for the Management of Infectious Diseases Inderbir Singh, Rakesh K. Sindhu, Atul A.

Shirkhedkar, Pharkphoom Panichayupakaranant, 2022-07-22 *Herbal Drug for the Management of Infectious Diseases* The book is a comprehensive compilation of herbal drug applications for the treatment and management of infectious diseases and addresses issues related to development challenges and future prospects associated with the use of herbal medicine. The use of herbal medicines has evolved in various cultures around the world over many millennia. In many developing Asian and African countries, the use of herbal medicines as supplied by traditional medicinal practitioners has always been popular. In the last two to three decades, many people in developed countries have begun to turn to alternative or complementary therapies including the use of herbal medicines, nutraceuticals, functional foods, and other supplements. This resurgence in interest in plant-derived medicines is partly due to the growing dissatisfaction with allopathic medicines as well as the perception that plant-derived medicines are natural and therefore pure and without side effects, and the progress in the production of higher quality herbal medicines, including some with proven clinical efficacy and safety. Infectious diseases are generally caused by pathogenic microorganisms like bacteria, viruses, parasites, or fungi and are a significant cause of morbidity and mortality worldwide. Therefore, the 16 chapters of this book have been intentionally sequenced to cover the therapeutic potential and applications of herbal extracts and phytochemicals for the management of various infectious diseases. Disease pathophysiology, an overview of current medication or treatment, in vitro and in vivo evaluations of relevant biological activities of herbal extracts and phytochemicals, mechanisms of action, clinical trials, and novel technologies for the delivery of herbal bioactive compounds, as well as patents, have also been included. Audience: Chemists, pharmaceutical scientists, biologists, herbal Ayurvedic medicinal practitioners, as well as all those in the medical sciences working on medicinal plants and infectious diseases. Navaneethaiyer, Teruyuki Nakanishi, Samuel A. M. Martin, Javier Santander, 2023-06-01 *Guide to Nutritional Supplements*, 2009-09-02 The rapidly expanding world of nutrition, functional foods, and nutraceuticals is increasingly complex. This Guide to Nutritional Supplements provides a concise and complete reference to the most common nutritionally significant elements. Including dietary guidelines, intake measurements, and other contextual information, this Guide is the ideal reference for nutritionists and dietitians facing an increasing public awareness of supplements and who may be augmenting their diets with OTC supplements. Focused on the nutritional values, impacts, and interactions of supplements, it provides a science-based approach to determining the appropriate selection and application of supplements for improved diet and nutrition.

Sport-Related Skin Conditions Keyvan Nouri, 2025-08-20 This work reviews the various types of dermatological conditions that affect athletes and sports participants and provides relevant treatment options in each of the cases. Although there are many articles pertaining to sports medicine in relation to orthopedic and musculoskeletal injuries, there is a shortage of comprehensive literature pertaining to the effects of athletics on skin health. Considering the popularity of sports and athletic pursuits, it is important for clinicians to be able to provide preventative guidance and treatment recommendations related to

the sports that patients participate in Previous literature related to sports and dermatology has been confined to review articles that do not provide a thorough breakdown into the various types of sports that have unique biomechanical and environmental components that are worth describing in a book format e g scuba diving and cutaneous decompression sickness Sport Related Skin Conditions A Guide for Clinicians informs dermatologists medical students and residents and the general sporting population about the types of dermatoses associated with various sports methods of identifying them preventing them and treating them For example providing information about the epidemiology of sun exposure in athletes in combination with sun protective guidelines tailored for those athletes e g UV and waterproof sun protection for sailors could help to improve patient care Additionally highlighting the current state of dermatological knowledge relevant to sports can help guide research scientists in finding areas to expand the knowledge base of dermatology Additionally by organizing chapters related to groups of sports this will allow for comparison between different sports in terms of the epidemiology of skin conditions and to stimulate future research into comprehensive prevention and management guidelines for overlapping dermatological conditions in related sports Textbook Of Dermatology, 2nd Edition And Sexually Transmitted Diseases
