The Illusion of the Post-Colonial State W. Alade Fawole, 2018-06-01 This book challenges the long-held conventional wisdom that Africa is a post-colonial society of sovereign nation-states despite the outward attributes of statehood: demarcated territories, permanent populations, governments, national currencies, police, and armed forces. While it is true that African nation-states have been gifted flag independence by their respective colonial masters, few have reached fully developed status as a secure nation-state. Most African nation-states have since independence been grappling with the crisis of state building, nation building, governance, and myriad security challenges which have been chronically exacerbated by the dynamics of the post-Cold War era. To focus merely on the agency of the African political elite and their inability to sustain functional modern nation-states misses the point. The central argument of the book is that an understanding of Africa's contemporary governance and security challenges requires us to historicize the discourse surrounding nation building and state building throughout Africa.

In Search of Democracy Larry Diamond, 2015-07-16 This book evaluates the global status and prospects of democracy with an emphasis on the quality of democratic institutions and the effectiveness of governance as key conditions for stable democracy. Bringing together a wide range of the author's work over the past three decades, it advances a framework for assessing the quality of democracy and analyzes alternative measures of democracy. Drawing on the most recent data from Freedom House, it assesses the global state of democracy and freedom as of the beginning of 2015 and explains why the world has been experiencing a mild but now deepening recession of democracy and freedom since 2005. A major theme of the book across the three decades of the author's work is the relationship between democratic quality and stability. Democracies break down, Diamond argues, not so much because of economic factors but because of corrupt, inept governance that violates individual rights and the rule of law. The best way to secure democracy is to ensure that democracy is accountable, transparent, genuinely competitive, respectful of individual rights, inclusive of diverse forms and sources of participation, and responsive to the needs and aspirations of ordinary citizens. Viable democracy requires not only a state that can mobilize power to achieve collective goals but also one that can restrain and punish the abuse of power, a particularly steep challenge for poor countries and those with natural resource wealth. The book examines these themes both in broad comparative perspective and with a deeper analysis of historical trends and future prospects in Africa and Asia. Concluding with lessons for sustaining and reforming policies to promote democracy internationally, this book is essential reading for students and scholars interested in democracy as well as politics and international relations more generally.

Unknown Conflicts of the Second World War Chris Murray, 2019-01-10 *Unknown Conflicts of the Second World War: Forgotten Fronts* is a collection of chapters dealing with various overlooked aspects of the Second World War. The aim is to give greater depth and

context to the war by introducing new stories about regions of the world and elements of the war rarely considered These chapters represent new discussions on previously undeveloped narratives that help to expand our understanding of the interconnectedness of the war It also provides an expanded view of the war as a mosaic of overlapping conflicts rather than a two sided affair between massive alliance structures The Second World War saw revolutions civil wars social upheaval subversion and major geopolitical policy shifts that do not fit neatly into the Allied vs Axis 1939 1945 paradigm This aim is to connect the unseen dots from around the globe that influenced the big turning points we think we know well but have really only a superficial understanding of and in so doing shed new light on the scope and influence of the war

Political Development and the New Realism in Sub-Saharan Africa David Ernest Apter, Carl Gustav Rosberg, 1994 Since the 1950s David Apter and Carl Rosenberg have been among the leading American scholars in African Studies In this volume they along with other major specialists in the field explore the new configurations of African politics With tentative efforts at a revival of democracy now taking place it seems appropriate to reassess the theoretical debates and empirical themes that have characterized postwar Sub-Saharan African politics Focusing on new realism that has emerged among Africanists since the dismantling of colonial rule the essays are presented as a corrective both to the initial euphoria informing African studies and to the later tendency to place blame for all Africa's political and economic difficulties on the receding specter of colonial oppression

Political Ideologies: A Comparative Approach Mostafa Rejai, 2020-07-24 Designed for classroom use this book develops a framework for the comparative analysis of political ideologies and examines the most prominent political ideologies of modern time This revised edition has been enlarged to include feminism and environmentalism

A History of Modern Africa Richard J. Reid, 2020-01-09 The new fully updated edition of the acclaimed textbook covering 200 years of African history A History of

Modern Africa explores two centuries of the continent's political, economic and social history. This thorough yet accessible text helps readers to understand key concepts, recognize significant themes and identify the processes that shaped the modern history of Africa. Emphasis is placed on the consequences of colonial rule and the links between the precolonial and postcolonial eras. Author Richard Reid, a prominent scholar and historian on the subject, argues that Africa's struggle for economic and political stability in the nineteenth century escalated and intensified through the twentieth century, the effects of which are still felt in the present day. The new third edition offers substantial updates and revisions that consider recent events and historiography. Greater emphasis is placed on African agency, particularly during the colonial period and the importance of the long-term militarization of African political culture. Discussions of the postcolonial period have been updated to reflect recent developments, including those in North Africa. Adopting a long-term approach to current African issues, this text explores the legacies of the nineteenth century and the colonial period in the context of the contemporary era. Highlights the role of nineteenth-century and long-term internal dynamics in Africa's modern challenges. Combines recent scholarship with concise and effective narrative. Features maps, illustrations, expanded references and comprehensive endnotes. *A History of Modern Africa 1800 to the Present* 3rd Edition is an excellent introduction to the subject for undergraduate students in relevant courses and for general readers with interest in modern African history and current affairs.

Federalism in Africa: Framing the national question Aaron Tsado Gana, Samuel G. Egwu, 2003. The world's first attempt at a scholarly historicisation of the African crisis of development, this book interrogates the problem of national integration within the context of ethno-religious and cultural pluralism. Here, top scholars offer refreshing insight into the prospects for transforming Africa into a super power of the third millennium. The breadth and depth of coverage and analytical rigour unites the essays, providing one of the most comprehensive and authoritative treatments of the subject in recent years.

Citizenship, Belonging, and Political Community in Africa Emma Hunter, 2016-09-15. Africa, it is often said, is suffering from a crisis of citizenship. At the heart of the contemporary debates, this apparent crisis has provoked lively dynamic relations between the present and the past, between political theory and political practice and between legal categories and lived experience. Yet studies of citizenship in Africa have often tended to foreshorten historical time and privilege the present at the expense of the deeper past. *Citizenship, Belonging and Political Community in Africa* provides a critical reflection on citizenship in Africa by bringing together scholars working with very different case studies and with very different understandings of what is meant by citizenship. By bringing historians and social scientists into dialogue within the same volume, it argues that a revised reading of the past can offer powerful new perspectives on the present in ways that might also indicate new paths for the future. The project collects the works of up and coming and established scholars from around the globe. Presenting case studies from such wide-ranging countries as Sudan, Mauritius, South Africa, Côte d'Ivoire and Ethiopia, the essays delve into the many facets of citizenship and agency as they have been expressed in the colonial and

postcolonial eras In so doing they engage in exciting ways with the watershed book in the field Mahmood Mamdani's *Citizen and Subject* Contributors Samantha Balaton Chrimes Frederick Cooper Solomon M Gofie V Adefemi Isumonah Cherry Leonardi John Lonsdale Eghosa E Osaghae Ramola Ramtohul Aidan Russell Nicole Ulrich Chris Vaughan and Henri Michel Y
