Upgren,2013-12-11 *The Golden Treasury of Thought* Theodore Taylor,1873 Night Skies of Southern Africa Peter Mack,2012-03-30 Star watching enthusiasts as well as more seasoned astronomers will welcome this update of the popular Guide to Night Skies of Southern Africa which provides an accessible illustrated introduction to our solar system the Milky Way galaxy and the expanding universe **Stars of Night- Stars of Ice** Gabriele Rose de Ginant,2022-03-14 In this magical tale you will meet golden haired Fiona and a young lad named Gregor Unlike traditional fairy tales in this case Fiona rescues Gregor from his mishap The two spend the long cold months underground in Mother Earth's protection By springtime they have become close friends and spend many seasons together in joy Yet there comes a time when Gregor becomes restless seeks adventure and leaves Fiona to explore lands unknown The story comes to a miraculous conclusion for both of them and at the same time they bring a gift to us This book is suitable for all ages Stars of Night Stars of Ice is truly a magical original fairy tale A tender love story so thoughtfully written with lovable characters like sweet Fiona and a young lad in distress The mighty Night Wind enters the story to ensure a happy ending This is truly a luminous and mysterious woven tale Don't miss it Eve Jacobson Artist Other titles available from Gabriele Rose de Ginant My Camelot Rosabella Snow Flower Fleur de Neige Signed and numbered limited prints available 1 **Why Is It Dark at Night?** Peter Zamarovský,2013-11-18 Why is it dark at night might seem a fatuous question at first sight In reality it is an extremely productive question that has been asked from the very beginning of the modern age not only by astronomers for whom it is most appropriate but also by physicists philosophers and even poets The book you have just opened uses this question as a pretext to relate in the most interesting way the history of human thought from the earliest times to the here and now The point is that if we want to appreciate the magic power of this ostensibly naive question we need to discover how it fits into the wider context of the natural sciences and learn something of the faltering steps towards an answer In doing so the author guides us through periods that we regard as the dim and distant past However as we start reading these passages we are amazed to discover just how searching were the questions the ancient philosophers asked themselves in spite of their fragmentary knowledge of the universe and how clairvoyantly they were able to gaze into its mysterious structure The author goes on to explain very graphically how this increasingly prickly question was tackled by many great men of science It is bound to come as a surprise that it was not a philosopher a physicist or an astronomer but instead the poet Edgar Allan Poe who hinted at the right answer I know of no other similar publication that has dealt so graphically or so succinctly with a question which after four centuries of fumbling and chasing up blind alleys was only solved in our lifetime Jir Grygar president of Czech Learned Society honorary Chairman of the Czech Astronomical Society The Sky at Night Tim Hunter,2023-02-14 Ideal for backyard stargazers this introduction to astronomy offers a unique blend of advice and personal
