Reclaiming The City:

Reclaiming the City Andy Coupland, 2005-10-05 Mixed use development is about retaining or creating a mix of different uses in cities or neighbourhoods The trend in UK development has been towards specialisation and areas with single uses Increasing the mix of uses is thought to reduce the need to travel lower the likelihood of crime improve the ambience and attractiveness of areas and contribute to the sustainability of cities **Women Reclaiming the City** Tigran Haas, 2023-04-04 The originality of *Women Reclaiming the City* lies not only in the variety of themes being presented but also in the variety of all these different highly respected women researchers This book is the first in which current societal themes revolving around urbanism architecture and city planning are put forth solely through female perspectives It reveals the importance of having female lenses on certain societal debates Twenty five leading female urban scholars draw on principles concepts and positions that are foundational to other frameworks and fields specifically critical studies indigenous and ethnic studies postcolonial theory queer theory feminist theory progressive urban theory social ecology urban planning and design architecture urban economics and urban social geography landscape urbanism new urbanism heritage management and urbanism political ecology and cultural studies to present alternatives to the current classical theories and conceptualizations that have failed to engage a truly intersectional analysis of dominant city and urban discourses policies and practices The book is intended for scholars of urban studies policy makers and city planning professionals **Reclaiming the City** Peter Eugen Jurmala, 1994 *Reclaiming the City* Boglarka Zajzon, 2024 **Reflections on 21st Century Human Habitats in India** Mahabir S. Jaglan, Rajeshwari, 2021-07-31 This book highlights various dimensions of human habitats in 21st Century India The human habitats in the country are marked by perceptible inequality in social and economic spheres This is occurring in tandem with rapid socio economic transformation across both rural and urban landscapes There is a plurality of transformative characteristics in terms of social and economic classes gender and space Inequality in access to natural resources such as land and water is still a big factor in socio economic differentiation in rural habitats This constructs a pedestal of unequal opportunities and access to basic human necessities such as healthcare education potable water and sanitation Human habitats experiencing socio spatial segregation and exclusion based on caste community and gender are detrimental in formation of a civil society and its sustainability in long terms The ideal situation for this would be formation of an inclusive society that celebrates age old socio cultural diversities reduces inequalities and reveres composite culture **The City of Detroit** Clarence Monroe Burton, 1922 **The Walkable City** Jennie Middleton, 2021-08-18 This book explores everyday walking in contemporary urban life It brings together important theoretical and empirical insights to understand how the walkability of urban spaces can be imagined planned for and experienced The book focuses on the everyday experiences of the urban walker the bodily experiences of walking and different walking research methods It goes beyond the conventional focus on walkable places by delving into the ways in which urban space is consumed and produced

through different ways of walking Drawing on fieldwork in the UK and international secondary sources the book examines how walking is socially and materially co produced focusing on pedestrian practices infrastructures and the social nature of walking Chapters in the book offer key explorations of the cultural and social inclusions and exclusions of navigating the city on foot The book considers transport planning and policy promoting pedestrian movement pedestrian infrastructures the politics of walking and social interactions of urban pedestrians The book offers vital analyses of how different but overlapping dimensions of walking and their relationship with urban space are often overlooked and the importance of centring the lived experiences of walking in understandings of pedestrian practices This book provides a timely contribution to the field of mobilities due to a growing interest in urban walking It will be of interest to students and scholars of urban studies human geography sociology and public health

Clown of the City Stephan de Beer,2020-11-25 At opening this book everything one has learned or thought about urban ministry is challenged and changed Stephan de Beer offers a fresh exciting and thoroughly engaging approach The title is enticing and playful but the book is a serious grappling with the daunting realities of a shadowed marginalised urban life It does not theorise or pontificate about a concept The author is not a distant neutral observer He is an engaged minister to the people a struggler in their struggles prophet to the powerful This book invites the reader to join the people of the cities under siege by failed policies empty promises and disastrous politics in their struggles for meaningful life and it makes a powerful persuasive case Stephan de Beer has offered us a great gift and a wonderful opportunity to think and hope anew and differently about the life reality and future of the city

Cities around the World Jing Luo,2019-07-10 This two volume set offers a comprehensive overview of major challenges faced by cities worldwide in the 21st century and how cities in different geographic economic and political conditions are finding solutions to them This two volume encyclopedia examines ten critical issues that face cities across the globe today environmental and societal struggles that affect the daily lives of city dwellers Readers will gain a better understanding of our global neighbors and will be able to use this book in order to compare and contrast different approaches to critical issues in our world Volume One examines employment and jobs energy and sustainability green spaces housing and infrastructure and migration and demographic changes Volume Two discusses pollution schools traffic and transportation violence corruption and organized crime and waste management Each issue begins with an introduction providing an overview of the issue from a global perspective Following the introduction are ten alphabetically arranged world city profiles of cities that are struggling with the issue and cities that have found innovative solutions to deal with the crisis The profiles explain how the problem came to be consequences inhabitants face such as compromised health limited access to education and high taxes with low wages and failed and successful initiatives taken by city management
