

# Correct riding position

## Side view

When looking at the position from a side view, the rider should have an imaginary straight line that drops through the ear, shoulder, hip and heel. This line keeps the body in balance with the horse and the lower leg in the correct position for maximum effectiveness.

The other straight line runs from the elbow, through the hand to the horse's mouth. This maintains a consistent even contact. It also prevents the rider's reins from becoming too long or short, and can aid control of the horse.
