As Warren Buffet says, "When stocks are down, we're going to be buying on balance, and who wouldn't rather buy at a lower price than at a higher price?"

The Wave Rider Ajit

Balakrishnan,2012-12-06 Ajit Balakrishnan is quietly experimenting with the new and fascinating technologies of the Internet in 1995 when the dot com fever grips the world Venture capitalists investment bankers and lawyers pound at the doors of his tiny office in a low rent area of Mumbai urging him to take his company public on New York s NASDAQ stock market Balakrishnan sets out on this enterprise a path that takes him through the world s financial centres of London Hamburg New York Boston and San Francisco This story recounts how he battles adversaries many times his size fends off avaricious lawyers who try to extort money through class action suits in the tough courts of lower Manhattan rebuffs investment bankers who try to engineer the sale of his company and tries to make sense of a world where technology and business models change every few months He steers his company through the financial crashes of 2000 and 2008 watches in awe as terrorists bring down New York s World Trade Centre towers puzzles over the decline of once famous names such as AOL and Netscape and the rise of new behemoths like Facebook and Google wrestles with India s legal system and pushes to bring Rediff into the new world of the Internet Gradually he realizes that the battles he is part of are not just business battles they signal the dawn of the Information Age Sources of Chinese Economic Growth, 1978-1996 Chris Bramall,2000-09-14

This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era China By adopting an approach which echoes the pioneering work of Chalmers Johnson Alice Amsden and Robert Wade on other East Asian Economies and which makes full use of the rich statistical materials that have become available since 1978 this book shows that Chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the Maoist era And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions it avoids over simplistic macroeconomic generalization Nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution The policy implications are stark The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit the pace of growth But attempts to replicate China s success in Latin America sub Saharan Africa and South Asia will fail because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even Chinese growth may prove unsustainable **EU Fiscal Policy Coordination in Hard**

**Times** Charlotte Rommerskirchen,2019-01-24 What happens to European Union EU fiscal policy coordination in hard times Recent accounts of the EU have portrayed the union as plagued by an austerity regime and rampant moral hazard Charlotte

Rommerskirchen provides an alternative account of economic cooperation in Europe during the Great Recession and the European Debt Crisis Drawing on Mancur Olson's theory of collective action this volume combines evidence from statistical analysis and extensive interviews with key players This book reaches an unexpected conclusion regarding the state of collective action in times of crises Free riding was not rife Despite heated accusations member states crisis policies matched their fiscal room for manoeuvre The real collective action failure is instead diagnosed in the inability to sanction free riders at the EU level and empowering erratic bond markets to discipline governments
