Military Thought of Asia Kaushik Roy,2020-11-04 Military Thought of Asia challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu At the same time it also highlights publications on military affairs by small men like mid ranking officers and scattered ideas regarding the origin nature and societal impact of organised violence present in miscellaneous sources like coins inscriptions paintings and fictional literature In so doing the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age It is essential reading for those interested in the evolution of military thought throughout history particularly in Asia

The World of the Axial Sages John C. Stephens,2020-11-25 This book presents an engaging analysis of the global spiritual changes of the first millennium BCE Between the sixth and fourth centuries BCE several new revolutionary religious and philosophic movements were born throughout the world Rather than using the well known label Axial Age to refer to this time of religious change the book argues that a better choice would be the Age of Awakening since it places more emphasis upon the personal internal dimension of religious experience lying at the core of these developments Earthshattering spiritual encounters with the sacred led the prophets and sages of the Age of Awakening to redirect people s attention away from the stagnant traditions of the past towards new forms of dynamic spirituality The era saw the emergence of a variety of innovative spiritual pathways in both the eastern and western worlds In classical Greece Pythagoras and Plato proposed new spiritual and intellectual alternatives to the outdated religious myths and rituals of the polis The Middle East also played a significant role in the spiritual revolution of the first millennium BCE As early as the sixth century BCE the Persian prophet Zoroaster s revelatory visions about the Truth and the Lie led to the birth of a new religious movement known as Zoroastrianism At the time of the Babylonian Exile ancient Judaism underwent a process of radical spiritual

renewal largely due to the inspired teachings of the Hebrew prophets In India the writers of the Upanishads provided a spiritual reinterpretation of many of the old Vedic myths and rituals Sages including the Buddha and Mahavira rejected the old sacrificial system of the brahmins and asserted that liberation from the cycle of birth and death could only be found through the practice of asceticism and a general withdrawal from the illusory material world As such this book highlights the importance of the de stabilizing influences of religious experience for understanding the revolutionary spiritual developments of the first millennium BCE
