There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny [www.thelastbook.co.uk](http://www.thelastbook.co.uk)      *Spiritual Intelligence and the Neuroplastic Brain* Charles W. Mark Ph. D.,Charles W. Mark,2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person s life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain s ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>

Roy E. Bourque,2021-02-24 We Believe A Journey into Christ Consciousness By Roy E Bourque After a profound spiritual experience at the age of nine the author found clarity in some of what the church was teaching while bringing into question other teachings of the church Eleven years later during a nuclear physics lecture this spiritual experience coincided with what the instructor was teaching Numerous additional spiritual experiences would soon follow We Believe A Journey into Christ Consciousness details the bridge that was formed between science and spirituality from those experiences Since that time the author has researched religious history looking for connections that would correlate modern science with what the ancient writers knew This endeavor has brought clarity to much of what the church teaches as well as serving as the basis to weed out misconceptions that have muddled up the waters This book may serve the reader who is looking for connections between science and religion *The Way It Is* R Preston Todd,2016-07-25 RPTodd has been involved with Scientific

here is a book that helps pull it all together for us written by William Pillow ex US Air Force and retired pharmacist with thirty four years at Eli Lilly Pillow began a quest to discover where we go after death and why when a long and lingering illness befell his wife and he confronted aging Initially a Southern Baptist and a skeptic about all things metaphysical he changed his mind while reading the incredible body of research on soul survival After prodigious investigation much of which concerns NDEs and studies on fetal awareness Pillow concluded there is a soul a God and a Heaven His conclusions may challenge your philosophy but parenthetical documentation and a fifteen page bibliography encourage independent verification The book starts slowly and carefully as Pillow builds his case by conscientiously stitching together scientific religious and metaphysical literature both ancient and modern on the nature of God the spark of life souls the human superconsciousness and Heaven the spirit world The brain begins to smoke while chugging through study after study on NDE s shared NDE s life between lives LBL out of body experiences OBE past life regression after death communications ADC pre birth visions neurological pathways the transcendent source of consciousness the ego and more We long for an index a glossary and less use of quotes around words that don t require them Halfway through our mental labors are rewarded with chapter 7 Our Incomparable Souls This is the heart of the book a behind the scenes look at the soul and a parting of the veil of forgetfulness produced by the ego Pillow discusses studies on fetal consciousness which provide the strongest circumstantial evidence for existence of the soul and gives a moving testament to the soul s purpose to instill compassion empathy and benevolence in its human host The second half of the book flies by as we greedily gobble mainstream studies on energy healing brain waves and the need for face to face friendships in an electronically connected world Tucked unobtrusively at the end of chapter 11 are three paragraphs titled For Me Personally in which the author shares his private definition of faith Such unheralded brevity from a man who once considered entering the Christian ministry shows great respect for the reader and for the role of science in decoding religion and spirituality The final chapter implores us to at least consider the possible importance of these concepts and commentaries for your loved ones and for you Pillow believes that by knowing there is a God a soul and a Heaven we can sustain our inner journey toward purpose and meaning in our lives and that by recognizing our shared humanity we can save civilization One hopes and prays this is true as murders by children mass killings by governments greed corruption materialism apathy mental illness addiction and more threaten to suffocate humanity s life force Pillow is an accomplished author having written or edited five educational textbooks several dozen articles one murder mystery involving reincarnation and the paranormal and five books about the search for self and the meaning of life through science self awareness and spirituality Spirituality Beyond Science and Religion is his first book written with theologian Jack McMahan and clinical psychologist Lillian Stover Wells Pillow brilliantly connects his philosophy on the soul God and Heaven with salient literature in the field of science and religion The MBS genre has come a long way from the Indian fables and drug induced journeys of the sixties and seventies Pillow s overall message that the power of love

is greater than the love of power points us in the right direction for the twenty first century      The Truth Seeker ,1991

*Problems of Living* Dan J. Stein,2021-05-11 *Problems of Living Perspectives from Philosophy Psychiatry and Cognitive Affective Science* addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living      **Basic Types of Pastoral Care & Counseling** Howard John Clinebell,Howard Clinebell,Bridget Clare McKeever,2011 *Basic Types of Pastoral Care and Counseling* remains the standard in pastoral care and counseling This third edition is enlarged and revised with updated resources methods exercises and illustrations from actual counseling sessions This book will help readers be sensitive to cultural diversity ethical issues and power dynamics as they practice holistic growth oriented pastoral care and counseling in the parish      Suitable Heresies Graham Rabey,2009 The theory suggests that there is a structural similarity between certain basic brain forms and certain basic mind forms and that the former provide a credible explanation for the latter It does not suggest that the causative link has been proved thereby What is claimed is that in the jungle of brain mind research where fundamental physical evidence for speculation is often in short supply the theory provides a scientifically and philosophically arguable clearing and thus a hypothesis worthy of investigation by anyone interested in the mysteries of human thought One implication of the theory amounts to a central heresy namely that on the accumulating evidence our traditional and much cherished one truth thinking conventions will need to be replaced by two truth thinking conventions Another implication of the theory is that it now seems entirely possible that the emergence and nature of philosophy itself have been crucially dependent on our long human struggle to extract single responses from thinking equipment that appears necessarily i e anatomically double and circular the double cycles being mutually inverted      **Science, Religion, and the Meditative Mind** J. Richard Wingenter,2003-05-07 *Meditative mind awareness* gives one a proper understanding of what science and what religion is The meditative mind sees itself as fundamentally different from the scientific mind and from the mind to which ordinary religion relates
